*Advancing  
Conversations across  
Disciplines* Springer  
Nature  
"Philosophers, lawyers,

political, and social  
theorists debate  
normative concepts  
such as democracy,  
justice, human rights.  
Concepts are  
fundamental to  
description. Hence for  
anthropology,  
ethnography, grounded  
theory and similar

methodologies developing concepts is a core theoretical and empirical activity. Concepts are thus core in causal theories, normative philosophy and empirical description. This book provides a unified framework for working with, constructing, and evaluating concepts that applies in these different domains"--

### **Situation and Socialization**

University of Notre Dame Press  
Fairness of wage distribution – or the perception of such – is a phenomenon crucial for the stability of new democracies. While theories exist about how change of the political system trickles down to the attitudinal level, the systematic analysis of the effect of economic transition on

public attitudes has been neglected to a large extent. Wage Distribution Fairness in Post-Socialist Countries proposes a conceptual framework to measure the fairness of wage distribution. Indeed, looking particularly at wage distribution fairness in three post-socialist societies (Hungary, East Germany, Czech Republic) since the transition in 1989, this challenging monograph also aims to understand if, and to what extent, the experience of a socialist regime motivates individuals to consider wage distribution as fair. Contributing to our understanding of the relevance of socialization and other situational factors influencing economic

legitimacy, Wage Distribution Fairness in Post-Socialist Countries will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields including: Sociology, Eastern European Studies and Political Economics.

Shame, Gender Violence, and Ethics  
SAGE Publications  
"A study prepared by the United Nations University World Institute for Development Economics Research (UNU-WIDER)".

*The Management of Resources as a Driver of Sustainable Development*  
Routledge  
"Sylvia Jane Burrow explores self-confidence as integral to autonomy development within

everyday contexts threatening gender violence, arguing that self-defense training is significant to resistance and resilience"--

*Terrors of Injustice*  
Taylor & Francis  
From coverage of the United States 2012 presidential election to the upheaval in the Arab world, POLITICS IN A CHANGING WORLD offers up-to-date information and in-depth coverage of the key topics of political science: legislative, executive, judicial, and bureaucratic institutions; political parties; voting; interest groups; political culture and ideology. Illustrated by a series of brief country studies, the Seventh Edition will help you gain a comparative

understanding of the actors and institutions that play a part in diverse political systems, the political choices people make, the causes and consequences of war, and the stakes of politics. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Theory, Gender, Context* Routledge Critically evaluates how international relations theories have conceived culture, and advances a new account of cultural diversity and international order.

**Making Market Women** Gender, Violence and the Social Order  
Gender-Based Violence in Latin American and

Iberian Cinemas rethinks the intersection between violence and its gendered representation. This is a groundbreaking contribution to the international debate on the cinematic construction of gender-based violence. With essays from diverse cultural backgrounds and institutions, this collection analyzes a wide range of films across Latin America and the Iberian Peninsula. The volume makes use of varied perspectives including feminist, postcolonial, and queer theory to consider such issues as the visual configuration of power and inequality, the objectification and the invisibilization of women's and LGBTQ subjects' resistance,

the role of female filmmakers in transforming hegemonic accounts of violence, and the subversion of common tropes of gendered violence. This will be of significance for students and scholars in Latin American and Iberian studies, as well as in film studies, cultural studies, and gender and queer studies.

**Transgressing Feminist Theory and Discourse** SAGE

This book presents in accessible form the most relevant readings from the diverse criminology literature, and provides students with direct access to the main theories and perspectives, which underpin and shape the discipline of criminology.

**Culture, Health and Sexuality** Routledge

This is an exciting and innovative book which provides a thorough introduction to contemporary social theory by examining the way in which the widespread existence of violence against women is explored. A wide range of theories from liberalism to evolutionary psychology are considered culminating in the development of a distinctive feminist realist position. The theories discussed are tested against a large-scale survey, the findings of which challenge many conventional wisdoms as to the patterning of violence in contemporary society.

**Understanding Gender-Based Violence** Springer

As in the cascading of water, violence and

nonviolence can cascade down from commanding heights of power (as in waterfalls), up from powerless peripheries, and can undulate to spread horizontally (flowing from one space to another). As with containing water, conflict cannot be contained without asking crucial questions about which variables might cause it to cascade from the top-down, bottom up and from the middle-out. The book shows how violence cascades from state to state. Empirical research has shown that nations with a neighbor at war are more likely to have a civil war themselves (Sambanis 2001). More importantly in the analysis of this book, war cascades from hot spot to hot spot within

and between states (Autesserre 2010, 2014). The key to understanding cascades of hot spots is in the interaction between local and macro cleavages and alliances (Kalyvas 2006). The analysis exposes the folly of asking single-level policy questions like do the benefits and costs of a regime change in Iraq justify an invasion? We must also ask what other violence might cascade from an invasion of Iraq? The cascades concept is widespread in the physical and biological sciences with cascades in geology, particle physics and the globalization of contagion. The past two decades has seen prominent and powerful applications of the cascades idea to

the social sciences (Sunstein 1997; Gladwell 2000; Sikkink 2011). In his discussion of ethnic violence, James Rosenau (1990) stressed that the image of turbulence developed by mathematicians and physicists could provide an important basis for understanding the idea of bifurcation and related ideas of complexity, chaos, and turbulence in complex systems. He classified the bifurcated systems in contemporary world politics as the multicentric system and the statecentric system. Each of these affects the others in multiple ways, at multiple levels, and in ways that make events enormously hard to predict (Rosenau 1990, 2006). He replaced the idea of events with

cascades to describe the event structures that 'gather momentum, stall, reverse course, and resume anew as their repercussions spread among whole systems and subsystems' (1990: 299). Through a detailed analysis of case studies in South Asia, that built on John Braithwaite's twenty-five year project Peacebuilding Compared, and coding of conflicts in different parts of the globe, we expand Rosenau's concept of global turbulence and images of cascades. In the cascades of violence in South Asia, we demonstrate how micro-events such as localized riots, land-grabbing, pervasive militarization and attempts to assassinate political

leaders are linked to large scale macro-events of global politics. We argue in order to prevent future conflicts there is a need to understand the relationships between history, structures and agency; interest, values and politics; global and local factors and alliances.

### **Wage Distribution Fairness in Post- Socialist Countries**

Routledge

The last twenty years have seen a growth in multi-disciplinary work in the area of sexuality, culture and health.

What was once a set of specialist concerns has been steadily mainstreamed.

Alongside this, a broader interest has developed in 'social' and 'cultural' factors relating to sexuality and sexual health,

from family planning and STI management to gender and intimate partner violence and the technologisation of sex. This book offers a research-based overview of key topics relevant to social and cultural perspectives on sexuality and sexual health. Beginning with an extended introduction and divided into six sections, it looks at culture, sex and gender, sexual diversity, sex work, migration and sexual violence. Each section opens with an editorial discussion which places the theme, and the chapters that follow, in a contemporary context. Six additional substantive chapters can be accessed online at [www.routledge.com/cw](http://www.routledge.com/cw)

/aggleton. Including cutting-edge conceptual and empirical material from around the world, this is a key resource for students in, and across, a variety of academic disciplines in the social and health sciences. It is especially suitable for readers from sexuality studies, gender studies, development studies, anthropology and sociology as well as those with public health and social work backgrounds.

**Daphne and the Centaurs - Overcoming Gender Based Violence**

Princeton University Press

Through cutting-edge accounts and interdisciplinary critiques of shame, this collection responds to the epidemic of

gendered violence that the world witnesses daily. Contributors expose and challenge how oppression and violence connect to regimes of injustice that have dominated modern times.

*Health Communication, Gender Violence, and ICTs in Nigeria*

University of Toronto Press

Gender-sensitive policy and programming have an integral role to play in fostering inclusive agricultural growth to meet the commitments of African countries to the Malabo Declaration goals. The 2019 Annual Trends and Outlook Report from ReSAKSS applies a gender lens to key issues that must be addressed to fully achieve these goals. Chapters examine the intersections between gender and (1) the

context and institutions within which rural people operate; (2) the natural resources that men and women depend on for agriculture, sources of vulnerability, and resilience to shocks; (3) assets and income; and (4) livelihood strategies and well-being. The report serves as the official M&E report for the Comprehensive Africa Agriculture Development Programme (CAADP), tracking progress on over 30 CAADP indicators.

**International Theory in a World of Difference** SAGE Publications

This volume of *Studies in Law, Politics, and Society* presents a diverse array of interdisciplinary research. It contains

articles by scholars from political science, sociology, and law. These articles examine the legal treatment of "suspect" populations, the work of legal actors, and the works of various legal devices. Taken together the work published in this volume exemplifies the kind exciting and innovative work now being done by legal scholars from different disciplines. *Studies in Law, Politics, and Society* is now available online at ScienceDirect full-text online of volumes 18 onwards. Elsevier book series on ScienceDirect gives multiple users throughout an institution simultaneous online access to an important compliment to primary research. Digital

delivery ensures users reliable, 24-hour access to the latest peer-reviewed content. The Elsevier book series are compiled and written by the most highly regarded authors in their fields and are selected from across the globe using Elsevier's extensive researcher network. For more information about the Elsevier Book Series on ScienceDirect Program, please visit: [http://www.info.science-direct.com/bookseries/On Cultural Diversity](http://www.info.science-direct.com/bookseries/On-Cultural-Diversity) Springer Deterrence, Choice, and Crime explores the various dimensions of modern deterrence theory, relevant research, and practical applications. Beginning with the classical roots of deterrence theory in Cesare Beccaria's

profoundly important contributions to modern criminological thought, the book draws out the many threads in contemporary criminology that are explicitly mentioned or at least hinted by Beccaria. These include sanction risk perceptions and their behavioral consequences, the deterrent efficacy of the certainty versus the severity of punishment, the role of celerity of punishment in the deterrence process, informal versus formal deterrence, and individual differences in deterrence. The richness of the volume is seen in the inclusion of chapters that focus on the theoretical development of deterrence across

disciplines such as criminology and economics. In an innovative section, the role of agents of deterrence is considered. Lessons are learned from the practical applications of deterrence undertaken in the areas of policing, corrections, and the community. The closing section includes Michael Tonry's "An Honest Politician's Guide to Deterrence: Certainty, Severity, Celerity, and Parsimony," a reminder of Beccaria's dictum that "it is better to prevent crimes than punish them." In the current environment, deterrence arguments are routinely used to justify policies that do just the opposite. Ray Paternoster, who contributed two

chapters, passed away as this volume was being finalized. Fittingly, this book is dedicated to him and ends with Alex Piquero's poignant remembrance of Ray, a path-breaking deterrence scholar, beloved mentor, and ardent supporter of social justice. Suitable for researchers and graduate students as well as for advanced courses in criminology, this book breaks new ground in theorizing the effects of punishment and other sanctions on crime control.

*Extractive Industries*  
NYU Press

An updated edition of the groundbreaking anthology that explores the proliferation of gendered violence  
From Harvey Weinstein

to Brett Kavanaugh, accusations of gender violence saturate today's headlines. In this fully revised edition of *Gender Violence*, Laura L. O'Toole, Jessica R. Schiffman, and Rosemary Sullivan bring together a new, interdisciplinary group of scholars, with up-to-date material on emerging issues like workplace harassment, transgender violence, intersectionality, and the #MeToo movement. Contributors provide a fresh, informed perspective on gender violence, in all of its various forms. With twenty-nine new contributors, and twelve original essays, the third edition now includes emerging contemporary issues such as LGBTQ

violence, sex work, and toxic masculinity. A trailblazing text, *Gender Violence, Third Edition* is an essential read for students, activists, and others. *Law and Society Reconsidered* Cengage Learning *Making Market Women* tells of the initial success and failure of a liberationist Catholic women's cooperative in central Ecuador. Jill DeTemple argues that when gender and religious identities are capitalized, they are made vulnerable. Using archival and ethnographic methods, she shares the story of the women involved in the cooperative, producing cheese and knitted goods for local markets, and places their stories in the larger context of both the cooperative and

the community. DeTemple explores the impact of gender roles, the perception of women, the growing middle class, and the changing mode of Catholicism in their community. Although the initial success of the cooperative may have been due to the group's cohesion and Catholic identity, the ultimate failure of the enterprise left many women less secure in these ties. They keep their Catholic identity but blame the institutional church in some ways for the failure and are less confident in their ability as women to compete successfully in market economies. Because DeTemple examines not only the effects of gender and religion on development but also

the effects of development, successful or unsuccessful, on the identities of those involved, this book will interest scholars of international development, religious studies, Latin American studies, anthropology, and women's studies. Religion in Gender-Based Violence, Immigration, and Human Rights Springer This book presents a compendium of selected game- and decision-theoretic models to achieve and assess the security of critical infrastructures. Given contemporary reports on security incidents of various kinds, we can see a paradigm shift to attacks of an increasingly heterogeneous nature, combining different

techniques into what we know as an advanced persistent threat. Security precautions must match these diverse threat patterns in an equally diverse manner; in response, this book provides a wealth of techniques for protection and mitigation. Much traditional security research has a narrow focus on specific attack scenarios or applications, and strives to make an attack “practically impossible.” A more recent approach to security views it as a scenario in which the cost of an attack exceeds the potential reward. This does not rule out the possibility of an attack but minimizes its likelihood to the least possible risk. The book follows

this economic definition of security, offering a management scientific view that seeks a balance between security investments and their resulting benefits. It focuses on optimization of resources in light of threats such as terrorism and advanced persistent threats. Drawing on the authors’ experience and inspired by real case studies, the book provides a systematic approach to critical infrastructure security and resilience. Presenting a mixture of theoretical work and practical success stories, the book is chiefly intended for students and practitioners seeking an introduction to game- and decision-

theoretic techniques for security. The required mathematical concepts are self-contained, rigorously introduced, and illustrated by case studies. The book also provides software tools that help guide readers in the practical use of the scientific models and computational frameworks.

[After Rape](#) Springer

Nature

Unlike any other volume focusing on women's health issues, this collection brings together a wealth of cross-disciplinary perspectives to bear on the intersection of breasts and medicine. Among other works on similar subject matters,

the academic versatility of this volume is unparalleled. This collection can serve as a textbook in a wide range of courses including those in philosophy, women's studies, biology, psychology, literature, history, and medicine. Palgrave Macmillan This book brings together some of the most interesting and innovative work being done to tackle gender-based violence in various sectors, world regions, and socio-political contexts. It will be useful to development and humanitarian practitioners, policy makers, and academics, including gender specialists.
