Chapter 5 The Skeletal System Chapter 5 The Skeletal System AXIAL SKELETON Skull 9. Using the key choices, identify the bones indicated by the following descriptions. Enter the appropriate term or letter in the answer blanks. 1. Forehead bone 2. Cheekbone 3. Lower jaw 4. Bridge of nose 5. Posterior part of hard palate 6. Much of the lateral and superior cranium H p i 7. Chapter 5 Skeletal System Study Guide Answers "Skeletal System" - Chapter 5:

The Skeletal System. One of the four parts of the skeletal system. Responsible for supporting the body, protecting soft organs, providing a place for skeletal muscles to attach, storing minerals and fats, and providing a place for blood cell formation. (206 bones present) "Skeletal System" - Chapter 5: The Skeletal System ... Chapter 5: The Skeletal System. "clubfoot", abnormal muscle development distorts growing bones and joints. Tibia, ankle, and foot are affected, longitudinal arch is exaggerated, and feet are turned medially and inverted. Twice as common in boys. Chapter 5: The Skeletal System Flashcards | Quizlet A&P

Chapter 5 The Skeletal System. a chronic autoimmune disease with inflammation of the joints and marked deformities. Something (possibly a virus) triggers an attack on the synovium by the immune system, which releases cytokines that stimulate an inflammatory reaction that can lead to these deformities.A&P Chapter 5 The Skeletal System Flashcards | Quizletshoulder girdle attached at ONLY one point; loose attachment of scapula allows it to slide back and forth; shallow glenoid cavity with loose ligaments.Chapter 5 - The Skeletal System Flashcards | QuizletStart studying Chapter 5- The Skeletal System.
