(PDF) IDENTITY AND GLOBALIZATION - ResearchGate Abstract. Globalization—the increasing interconnectedness of societies, economies, and cultures—is a defining feature of contemporary social life. Paradoxically, it underlies both the dynamics of global crises (e.g., rising inequality, climate change) and the possibilities for ameliorating them. In this review, we introduce globalization as a multifaceted process and elaborate its psychological effects with respect to identity, culture, and collective action. Social Identities in a Globalized World: Challenges and ... Abstract. This article outlines the cultural and psychological effects of globalization. It looks at the impact of globalization on identity; ideas of privacy and intimacy; the way we understand and perceive psychological distress; and the development of the profession of psychology around the world. The article takes a critical perspective on globalization, seeing it as aligned with the spread of neoliberal capitalism, a tendency towards cultural homogenization, the imposition of dominant ... Globalization, culture and psychology: International ... psychological consequences of globalization are described, with a focus on identity issues. Specifically, it is argued that most people worldwide now develop a bicultural identity that combines their local identity with an identity linked to the global culture; that identity confusion may be increas-ing among young

people in non-Western cultures as aThe Psychology of Globalization - Jeffrey ArnettA simple way to understand how globalization has influenced human behaviour is to look at how some cultures values have changed over time. It is important to note that globalization is often referred to as Westernization, as the result is most frequently cultures adapting more Western values. In the first post in this globalization series, we are going to look at how the rise in Western (i.e. individualistic) values in Japan as a result of globalization might be having an effect on their ...How does globalization influence behaviour? | IB PsychologyABSTRACT Psychological theories and research often assume nations are culturally homogeneous and stable.
