 Outsider musicians can be the product of damaged DNA, alien abduction, drug fry, demonic possession, or simply sheer obliviousness. This book profiles dozens of outsider musicians, both prominent and obscure—figures such as The Shaggs, Syd Barrett, Tiny Tim, Jandek, Captain Beefheart, Daniel Johnston, Harry Partch, and The Legendary Stardust Cowboy—and presents their strange life stories along with photographs, interviews, cartoons, and discographies. About the only things these self-taught artists have in common are an utter lack of conventional tunefulness and an overabundance of earnestness and passion. But, believe it or not, they're worth listening to, often outmatching all contenders for inventiveness and originality. A CD featuring songs by artists profiled in the book is also available.

In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. Being Modern builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, Being Modern paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students, and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part, and to supersede such tired formulations as 'Science and culture'.

 "Who Is God?" is a Bible Lesson Series that attempts to help the reader understand the character of God. Many people go through life knowing about God, but not fully knowing and understanding His true character. In these lessons, you will learn some of the names of God as they describe who God is and what He means in our lives.

Franco-German cultural exchange reached its height at the 1937 Paris World's Fair, where the Third Reich worked to promote an illusion of friendship between the two countries. Through the prism of this decisive event, Grand Illusion examines the overlooked relationships among Nazi elites and French intellectuals. Their interaction, Karen Fiss argues, profoundly influenced cultural production and normalized aspects of fascist ideology in 1930s France, laying the groundwork for the country's eventual collaboration with its German occupiers. Tracing related developments across fine arts, film, architecture, and mass pageantry, Fiss illuminates the role of National Socialist propaganda in the French decision to ignore Hitler's war preparations and pursue an untenable policy of appeasement. France's receptiveness toward Nazi culture, Fiss contends, was rooted in its troubled identity and deep-seated insecurities. With their government in crisis, French intellectuals from both the left and the right demanded a new national culture that could rival those of the totalitarian states. By examining how this cultural exchange shifted toward political collaboration, Grand Illusion casts new light on the power of art to influence history.

This is a new edition of a major document from World War II with additional, previously unavailable texts assembled from the stenographic record of Hitler's informal conversations ordered by Martin Bormann. These texts remain the classic collection of Hitler's nighttime monologues with his entourage, covering mostly nonmilitary subjects and long-range plans. Hitler lets his thoughts

wander, never failing to provide an opinion on every subject. Additional documents from various archives make this the most complete English-language edition in print.

The problems of capitalism have been studied from Karl Marx to Thomas Piketty. The latter has recently confirmed that the system of capital is deeply bound up in ever-growing inequality without challenging the continuance of that system. *Against Capital in the Twenty-First Century* presents a diversity of analyses and visions opposed to the idea that capital should have yet another century to govern human and non-human resources in the interest of profit and accumulation. The editors and contributors to this timely volume present alternatives to the whole liberal litany of administered economies, tax policy recommendations, and half-measures. They undermine and reject the logic of capital, and the foregone conclusion that the twenty-first century should be given over to capital just as the previous two centuries were. Providing a deep critique of capitalism, based on assessment from a wide range of cultural, social, political, and ecological thinking, *Against Capital in the Twenty-First Century* insists that transformative, revolutionary, and abolitionist responses to capital are even more necessary in the twenty-first century than they ever were.

Bernhard Rieger reveals how a car commissioned by Hitler and designed by Ferdinand Porsche became a global commodity on a par with Coca-Cola. The Beetle's success hinged on its uncanny ability to capture the imaginations of executives, engineers, advertisers, car collectors, suburbanites, hippies, and everyday drivers across nations and cultures.

Readers around the world have thrilled to *Killing Lincoln*, *Killing Kennedy*, and *Killing Jesus*--riveting works of nonfiction that journey into the heart of the most famous murders in history. Now from Bill O'Reilly, iconic anchor of *The O'Reilly Factor*, comes the most epic book of all in this multimillion-selling series: *Killing Patton*. General George S. Patton, Jr. died under mysterious circumstances in the months following the end of World War II. For almost seventy years, there has been suspicion that his death was not an accident--and may very well have been an act of assassination. *Killing Patton* takes readers inside the final year of the war and recounts the events surrounding Patton's tragic demise, naming names of the many powerful individuals who wanted him silenced.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Multivariable Mathematics combines linear algebra and multivariable mathematics in a rigorous approach. The material is integrated to emphasize the recurring theme of implicit versus explicit that persists in linear algebra and analysis. In the text, the author includes all of the standard computational material found in the usual linear algebra and multivariable calculus courses, and more, interweaving the material as effectively as possible, and also includes complete proofs. * Contains plenty of examples, clear proofs, and significant motivation for the crucial concepts. * Numerous exercises of varying levels of difficulty, both computational and more proof-oriented. * Exercises are arranged in order of increasing difficulty.
