Most people, at some point in their lives, experience the stress of being interviewed for a job they want. Many also face the challenge of interviewing other people. But what does the science tell us about this unique social situation? What biases are involved, and how can we become aware of them? And how can job interviews be structured so that they are fair and effective? The Psychology of Job Interviews is the first book to provide an accessible and concise overview of what we know. Based on empirical research rather than second hand advice, it discusses the strategies and tactics that both applicants and interviewers can use to make their interviews more successful; from how to make a good first impression to how to decide which candidate is the best fit for the role. Illustrated with examples throughout, the book guides job applicants on how best to prepare for and perform in an interview, and provides managers with best-practice advice in selecting the right candidate. Debunking several popular myths along the way, this is essential reading for anyone interested in understanding what is really happening in a job interview, whichever side of the desk you are sitting. Interviewing can be challenging, time-consuming, stressful, frustrating, and full of disappointments. My goal is to help make things easier for you so you can get the engineering leadership job you want. The *Software Engineering Manager Interview Guide* is a comprehensive, no-nonsense book about landing an engineering leadership role at a top-tier tech company. You will learn how to master the different kinds of engineering management interview questions. If you only pick up one or two tips from this book, it could make the difference in getting the dream job you want. This guide contains a collection of 150+ real-life management and behavioral questions I was asked on phone screens and by panels during onsite interviews for engineering management positions at a variety of big-name and top-tier tech companies in the San Francisco Bay Area such as Google, Facebook, Amazon, Twitter, LinkedIn, Uber, Lyft, Airbnb, Pinterest, Salesforce, Intuit, Autodesk, et al. In this book, I discuss my experiences and reflections mainly from the candidate's perspective. Your experience will vary. The random variables include who will be on your panel, what exactly they will ask, the level of training and mood of the interviewers, their preferences, and biases. While you cannot control any of those variables, you can control how prepared you are, and hopefully, this book will help you in that process. I will share with you everything I've learned while keeping this book short enough to read on a plane ride. I will share tips I picked up along the way. If you are interviewing this guide will serve you as a playbook to prepare, or if you are hiring give you ideas as to what you might ask an engineering management candidate yourself.
