Children's Literature and Intergenerational Relationships Walter de Gruyter GmbH & Co KG
From Struwwelpeter to Peter Rabbit, from Alice to Bilbo—this collection of essays shows how the classics of children's literature have been transformed across languages, genres, and diverse media forms. This book argues that translation regularly involves transmediation—the telling of a story across media and vice versa—and that transmediation is a specific form of translation. Beyond the classic examples, the book also takes the reader on a worldwide tour, and examines, among other things, the role of Soviet science fiction in North Korea, the ethical uses of Lego Star Wars in a Brazilian context, and the history of Latin translation in children's literature. Bringing together scholars from more than a dozen countries and language backgrounds, these cross-disciplinary essays focus on regularly overlooked transmediation practices and terminology, such as book cover art, trans-sensory storytelling, écart, enfreakment, foreignizing domestication, and intra-cultural transformation.

Alice's Adventures in Wonderland - Second Edition Routledge
Christopher White points to ways that both spiritual practices and scientific speculation about multiverses and invisible dimensions are efforts to peer into the hidden elements and even existential meaning of the universe. Creatively appropriated, these ideas can restore a spiritual sense that the world is greater than anything our eyes can see.

Doctor Who and Science Broadview Press

Originally published in 1871, *Alice Through the Looking-Glass* describes Alice's further adventures. A masterpiece of carefree nonsense for children which embodies layers of satire, mathematical, linguistic, and philosophical jokes.

Spirituality and the Search for Invisible Dimensions McFarland

An examination of Carroll's books about Alice explores the contextual knowledge of the time period in which it was written, addressing such topics as time, games, mathematics, and taxonomies.

The Cultural Politics of Pro-anorexia Routledge

Children's Literature and Intergenerational Relationships: Encounters of the Playful Kind explores ways in which children's literature becomes the object and catalyst of play that brings younger and older generations closer to one another. Providing examples from diverse cultural and historical contexts, this collection argues that children's texts promote intergenerational play through the use of literary devices and graphic formats and that they may prompt joint play practices in the real world. The book offers a distinctive contribution to children's literature scholarship by shifting critical attention away from the difference and conflict between children and adults to the exploration of inter-age interdependencies as equally crucial aspects of human life, presenting a new perspective for all who research and work with children's culture in times of global aging.

The Western canon and the incorporation of the Hispanic (c. 1850-75) Chartwell Books

In the most renowned novel by English author Lewis Carroll, restless young Alice literally stumbles into adventure when she follows the hurried, time-obsessed White Rabbit down a hole and into a fantastical realm where animals are quite verbose, logic is in short supply, and royalty tends to be exceedingly unpleasant. Each playfully engaging chapter presents absurd scenarios involving an unforgettable cast of characters, including the grinning Cheshire Cat and the short-tempered Queen of Hearts, and every stop on Alice's peculiar journey is marked by sharp social satire and wondrously witty wordplay.

Written from within the best traditions of ecocritical thought, this book provides a wide-ranging account of the spatial imagination of landscape and seascape in literary and cultural contexts from many regions of the world. It brings together essays by authors writing from within diverse cultural traditions, across historical periods from ancient Egypt to the postcolonial and postmodern present, and touches on an array of divergent theoretical interventions. The volume investigates how our spatial imaginations become "wired," looking at questions about mediation and exploring how various traditions compete for prominence in our spatial imagination. In what ways is personal experience inflected by prevailing cultural traditions of representation and interpretation? Can an individual maintain a unique and distinctive spatial imagination in the face of dominant trends in perception and interpretation? What are the environmental implications of how we see landscape? The book reviews how landscape is at once conceptual and perceptual, illuminating several important themes including the temporality of space, the mediations of place that form the response of an observer of a landscape, and the development of response in any single life from early, partial thoughts to more considered ideas in maturity. Chapters provide suggestive and culturally nuanced

propositions from varying points of view on ancient and modern landscapes and seascapes and on how individuals or societies have arranged, conceptualized, or imagined circumambient space. Opening up issues of landscape, seascape, and spatiality, this volume commences a wide-ranging critical discussion that includes various approaches to literature, history and cultural studies. Bringing together research from diverse areas such as ecocriticism, landscape theory, colonial and postcolonial theory, hybridization theory, and East Asian Studies to provide a historicized and global account of our ecospatial imaginations, this book will be useful for scholars of landscape ecology, ecocriticism, physical and social geography, postcolonialism and postcolonial ecologies, comparative literary studies, and East Asian Studies.

This book interrogates the thin ideal in pro-anorexia online spaces and the way in which it operates on a continuum with everyday discourses around thinness. Since their inception in the late twentieth century, pro-anorexia online spaces have courted controversy: they have been vilified by the media and deleted by Internet moderators. This book explores the phenomenon during its tipping point where it migrated from websites and discussion forums to image-centric social media platforms – all the while seeking to circumvent censorship by, for instance, repudiating ‘pro-ana’ or adopting hashtags to obfuscate content. The author argues that instead of being driven further underground, ‘pro-ana’ is blurring the boundaries between normative and deviant conceptions of thinness. Situating the phenomenon in relation to accepted constructions of thinness, promulgated by establishments as far ranging as medicine and women’s magazines, this book asks if ‘pro-ana’ holds the potential to critique that which has long been considered normal: the culture of compulsory thinness. Engaging with debates including the current climate of postfeminism and neoliberalism, digital censorship, the pre-eminence of white, middle-class, heterofemininity, and the articulation of pain in realising the thin ideal, *Negotiating Thinness Online* examines what happens when the margins and the mainstream merge.

Girlhood and the Plastic Image Routledge

Coeditors Elizabeth Patton and Mimi Choi argue that an in-depth examination of media images of housework from the mid-

nineteenth century to the early twenty-first century is long overdue. Modern depictions often imply that certain concerns can be resolved through excessive domesticity, reflecting some of the complicated and unfinished issues of second-wave feminism. *Home Sweat Home: Perspectives on Housework and Modern Relationships* reveals how widespread the cultural image of “perfect” housewives and the invisibility of household labor were in the past and remain today. In this collection of essays, contributors explore the construction of women as homemakers and the erasure of household labor from the middle-class home in popular representations of housework. They concentrate on such matters as the impact of second-wave feminism on families and gender relations; of popular culture—especially in film, television, magazines, and advertising—on our views of what constitutes home life and gender relations; and of changing views of sexuality and masculinity within the domestic sphere. *Home Sweat Home* will interest students and scholars of gender, cultural, media, and communication studies; sociology; and American history and appeal to anyone curious about housework, gender relations and popular culture.

Author, Reader and Characters W. W. Norton & Company

She has received numerous accolades including an Academy Award and two Golden Globes, and in 2004 became the first ever American woman to be nominated for a Best Director Oscar. From *The Virgin Suicides* to *The Bling Ring*, her work carves out new spaces for the expression of female subjectivity that embraces rather than rejects femininity. Fiona Handyside here considers the careful counter-balance of vulnerability with the possibilities and pleasures of being female in Coppola's films - albeit for the white and the privileged - through their recurrent themes of girlhood, fame, power, sex and celebrity. Chapters reveal a post-feminist aesthetic that offers sustained, intimate engagements with female characters. These characters inhabit luminous worlds of

girlish adornments, light and sparkle and yet find homes in unexpected places from hotels to swimming pools, palaces to strip clubs: resisting stereotypes and the ordinary. In this original study, *Handyside* brings critical attention to a rare female auteur and in so doing contributes to important analyses of post-feminism, authorship in film, and the growing field of girlhood studies.

The Fourth Dimension in Fin-de-Siècle Literature and Culture McFarland

As striking, counter-intuitive and distasteful as the combination of children and anxiety may seem, some of the most popular children's classics abound in depictions of traumatic relationships, bloody wars and helpless heroes. This book draws on Freudian and Lacanian anxiety models to investigate the psychological and political significance of this curious juxtaposition, as it stands out in Golden Age novels from both sides of the Atlantic and their present-day adaptations. The stories discussed in detail, so the argument goes, identify specific anxieties and forms of anxiety management as integral elements of hegemonial middle-class identity. Apart from its audacious link between psychoanalysis and Marxist, feminist, as well as postcolonial ideology criticism, this study provides a nuanced analysis of the ways in which allegedly trivial texts negotiate questions of individual and (trans)national identities. In doing so, it offers a fresh look at beloved tales like *Alice's Adventures in Wonderland*, *The Wizard of Oz* and *Peter Pan*, contributes to the dynamic field of adaptation studies and highlights the necessity to approach children's entertainment more seriously and more sensitively than it is generally the case.

The Future of the Nineteenth-Century Dream-Child Springer Nature

This volume explores the many facets and ongoing transformations of our visual identities in the twentieth and twenty-first centuries. Its chapters engage with the constitution of personal, national and cultural identities at the intersection of the verbal and the visual across a range of media. They are attentive to how the medialities and (im)materialities of modern image culture inflect our conceptions of identity, examining the cultural and political force of literature, films, online video messages, rap songs, selfies, digital algorithms, social media, computer-generated images, photojournalism and branding, among others.

They also reflect on the image theories that emerged in the same time span—from early theorists such as Charles S. Peirce to twentieth-century models like those proposed by Roland Barthes and Jacques Derrida as well as more recent theories by Jacques Rancière, W. J. T. Mitchell and others. The contributors of *Imaging Identity* come from a wide range of disciplines including literary studies, media studies, art history, tourism studies and semiotics. The book will appeal to an interdisciplinary readership interested in contemporary visual culture and image theory.

Fantasy, Dystopia, Cyberculture Walter de Gruyter GmbH & Co KG
This book investigates the reappearance of the 19th-century dream-child from the Golden Age of Children's Literature, both in the Harry Potter series and in other works that have reached unprecedented levels of popular success today. Discussing Harry Potter as a reincarnation of Lewis Carroll's Alice and J.M. Barrie's Peter Pan, Billone goes on to examine the recent resurrection of Alice in Tim Burton's *Alice*, and of Peter Pan in Michael Jackson and in James Bond. Visiting trends that have emerged since the Harry Potter series ended, the book studies revisions of the dream-child in texts and films that have inspired mass fandom in the twenty-first century: Stephenie Meyer's *Twilight*, E.L. James's *50 Shades of Grey* and Suzanne Collins's *The Hunger Games*. The volume argues that the 21st-century desire to achieve dream-states in relationship to eternal youth results from the way that dreams provide a means of realizing the fantastic yet alarming possibility of escaping from time. This current identification with the dream-child stems from the threat of political unrest and economic and environmental collapse as well as from the simultaneous technophilia and technophobia of a culture immersed in the breathless revolution of the digital age. This book not only explores how the dream-child from the past has returned to reflect misgivings about imagined dystopian futures but also reveals how the rebirth of the dream-child opens up possibilities for new narratives where happy endings remain viable against all odds. It will appeal to scholars in a wide variety of fields including Childhood Studies, Children's/YA Literature, Cinema Studies, Cultural Studies, Cyberculture, Gender Studies, Queer Studies, Gothic Studies, New Media, and Popular Culture.
Lewis Carroll's "Alice" and Cognitive Narratology Harvard University Press
150 years after Alice's Adventures in Wonderland was first

published, Lewis Carroll's eponymous heroine has become one of the most familiar figures in the cultural landscape. The enduringly iconic figure of the Victorian child, Alice has inspired countless fashion designers, illustrators and stylists. The 'Alice Look' has been embraced across the world, by young and old alike, and by both the feted and the forgotten. *Fashioning Alice* is the first book to chart the emergence of Alice as a style icon. Kiera Vaclavik traces the evolution of Alice's visual identity in the nineteenth century and explores the myriad ways in which she was dressed – on the page, on the stage, and in the home. The book also draws on historical sources to examine amateur performance and play not just in the UK but in the USA, Japan and Australia. Illustrated throughout, *Fashioning Alice* is a ground-breaking exploration of Alice's visual career that offers a compelling case study of the intersections between fashion and fiction.

Political Anxiety in Golden Age Children's Classics and Their Contemporary Adaptations University of Chicago Press
Following the publication of Darwin's *On the Origin of Species*, Victorian anthropology made two apparently contradictory claims: it distinguished "civilized man" from animals and "primitive" humans and it linked them through descent. Paradoxically, it was by placing human history in a deep past shaped by minute, incremental changes (rather than at the apex of Providential order) that evolutionary anthropology could assert a new form of human exceptionalism and define civilized humanity against both human and nonhuman savagery. This book shows how fantastic Victorian and early Edwardian fictions—utopias, dystopias, nonsense literature, gothic horror, and children's fables—untether human and nonhuman animal agency from this increasingly orthodox account of the deep past. As they imagine worlds that lift the evolutionary constraints on development and as they collapse evolution into lived time, these stories reveal (and even occupy) dynamic landscapes of cognitive descent that contest prevailing anthropological ideas about race, culture, and species difference.

Text, Mediality and Contemporary Visual Culture Anthem Press
This book revisits the claim that a key dimension of cultural modernity – understood as a turn to the autonomy of the signs and the erasure of the 'face of man' – arose in the mid-nineteenth century. It presents an alternative to that obsession, focusing instead on the aesthetic appreciation of forms through which

connections are realised across place and time. The book is one of few to offer a comparative approach to numerous major writers and artists of this period over diverse countries. Specifically, the comparative approach overcomes the constitutively ambiguous relation between the modern and the Hispanic. The Hispanic is often imagined as at once foundational for and excluded from the modern world. Its reincorporation into the story of the mid-century unsettles the notion of modernity. The book offers instead an experiment in writing, tracing commonalities across place and time, and drawing on mid-century expressions of such likenesses.
The Career of Lewis Carroll's Icon, 1860-1901 Bloomsbury Publishing

This book provides a pioneering and provocative exploration of the rich synergies between adaptation studies and translation studies and is the first genuine attempt to discuss the rather loose usage of the concepts of translation and adaptation in terms of theatre and film. At the heart of this collection is the proposition that translation studies and adaptation studies have much to offer each other in practical and theoretical terms and can no longer exist independently from one another. As a result, it generates productive ideas within the contact zone between these two fields of study, both through new theoretical paradigms and detailed case studies. Such closely intertwined areas as translation and adaptation need to encounter each other's methodologies and perspectives in order to develop ever more rigorous approaches to the study of adaptation and translation phenomena, challenging current assumptions and prejudices in terms of both. The book includes contributions as diverse yet interrelated as Bakhtin's notion of translation and adaptation, Bollywood adaptations of Shakespeare's *Othello*, and an analysis of performance practice, itself arguably an adaptive practice, which uses a variety of languages from English and Greek to British and International Sign-Language. As translation and adaptation practices are an integral part of global cultural and political activities and agendas, it is ever more important to study such occurrences of rewriting and reshaping. By exploring and investigating interdisciplinary and cross-cultural perspectives and approaches, this volume investigates the impact such occurrences of rewriting have on the constructions and experiences of cultures while at the same time developing a rigorous methodological framework which will form the basis of

future scholarship on performance and film, translation and adaptation.
