Exploration for and Evaluation of Mineral Resources A Mineral Reserve is the economically mineable part of a Measured or Indicated Mineral Resource demonstrated by at least a Preliminary Feasibility Study. This Study must include adequate information on mining, processing, metallurgical, economic and other relevant factors that demonstrate, at the time of reporting, that economic extraction can be justified. Mineral resource estimation - Wikipedia Mineral Reserves are those parts of Mineral Resources which, after the application of all mining factors, are the basis of an economically viable project after taking account of all relevant

processing, metallurgical, economic, marketing, legal, environment, socio-economic and government factors. Mineral Estimates - Reserves vs Resources — New Pacific Metals Mineral resource classification is the classification of mineral resources based on an increasing level of geological knowledge and confidence. In an effort to achieve a standard set the classifications, representative bodies from Australia, Canada, South Africa, the USA and the UK reached a provisional agreement in 1997 on the definitions of each of the various mineral classifications. Mineral resource classification - Wikipedia The exploration and evaluation asset will be

reclassified to the other relevant standards, when the commercial viability and technical feasibility for the extraction of mineral resources has been demonstrated, such as capitalized exploration and evaluation expenditure to IAS 38 for subsequent accounting, while the property, plant, equipments and vehicles to IAS 16. IFRS 6 - Exploration for and Evaluation of Mineral ...The goal of the exploration program is to proof up resources and reserves and to estimate the value of what is being found. In short to answer the question; Can we make money from this pile of rocks or not? Some background to this question of resources and reserves. In 1969

the Vietnam War was in full swing and the demand for nickel was soaring. On October of that year, Australian junior ...Mineral Reserves, Mineral Resources and Estimation². Total value of the mineral reserve (the resource and the associated invested capital) equals the gross rent per unit times the quantity of reserves. 3. Value of the resource equals the total value of reserves less the current replacement value of the net stock of invested capital. 4. Resource rent per unit equals the value of theValuation Methods of Mineral Resources (Estrella Domingo)The search for mineral resources, including minerals, oil, natural gas and similar non-evaluation of mineral:

regenerative resources after the entity has obtained legal rights to explore in a specific area, resources: as well as the determination of the technical feasibility and commercial viability of extracting : the mineral resource.
