A collaboration between a contemporary painter and an award-winning poet, this 21st-century bestiary is a spellbinding artistic meditation on the mysteries and diversity of the animal kingdom.

Originating in the Middle Ages, bestiaries were illustrated volumes that described various animals--some real, some

mystical. The natural history and illustration of each beast were usually accompanied by a moral lesson. In this beautifully illustrated book, respected painter Darren Waterston and distinguished poet Mark Doty come together to breathe new life into the medieval genre. Waterston's precise and haunting silhouettes depict species from insect to bird to mammal, captured in motion as they hunt their prey, build their nests, or protect their young. Accompanying these illustrations are Doty's poetic observations on the

wonders of the animal world--its panoply of sounds and shapes, its dignity and its cruelty. Lovers of art, animals, and poetry will delight in this elegant volume that captures nature's exquisite and terrible beauty.

 "[Clark's] fantastic blending of science and art, history and journalism, brings the appetite back for life and literature both." — Los Angeles Times Book Review
 On the northwest coast of France, just around the corner from the English Channel, is the little town of Locmariaquer (pronounced "loc-maria-care"). The inhabitants of this town have a special relationship to the world, for it is their efforts that maintain the supply of the famous Belon oysters, called les

plates ("the flat ones"). A vivid account of the cultivation of Belon oysters and an excursion into the myths, legends, and rich, vibrant history of Brittany and its extraordinary people, *The Oysters of Locmariaquer* is also an unforgettable journey to the heart of a fascinating culture and the enthralling, accumulating drama of a unique devotion.

Mark Doty's prose has been hailed as "tempered and tough, sorrowing and serene" (The New York Times Book Review) and "achingly beautiful" (The Boston Globe). In *Still Life with Oysters and Lemon* he offers a stunning exploration of our attachment to ordinary things-how we invest objects

with human store, and why.

A baby cries; a mother exits, leaving her family behind; a child finally begins to talk; a father stops breathing. Rozanna Lilley is a social anthropologist, autism researcher, and Oscar's mum. Oscar is on the autism spectrum, which means he has a particular way of being in the world and understanding the lives of those around him. As Rozanna and her husband Neil navigate Oscar's childhood, the author reflects upon her own childhood and adolescence, spent in a libertarian, self-consciously bohemian household first in Perth and then in Sydney presided over by her parents, the writers Dorothy Hewett and Merv Lilley. Through personal essays, Lilley works through the ongoing

repercussions of childhood trauma and captures Oscar's rich inner world, as revealed through his vivid fantasy life and curious observations. *Do Oysters Get Bored?* is a shimmering examination of an eccentric family, the complexities of care and the toll of grief in middle-age. A set of poems serve as a counterpoint to the essays in this directly charming and surprisingly funny account of daily life. [Subject: Memoir, Literature, Autism, Poetry]

Matisse, Picasso, Hockney--they may not have been from the same period, but they all painted still lifes of food. And they are not alone. Andy Warhol painted soup cans, Claes Oldenburg sculpted an ice cream cone on the top of a building in Cologne, Jack Kerouac's Sal ate apple

pie across the country, and Truman Capote served chicken hash at the Black and White Ball. Food has always played a role in art, but how well and what did the artists themselves eat? Exploring a panoply of artworks of food, cooking, and eating from Europe and the Americas, *The Modern Art Cookbook* opens a window into the lives of artists, writers, and poets in the kitchen and the studio throughout the twentieth century and beyond. From the early moderns to the impressionists; from symbolists to cubists and surrealists; from the Beats to the abstractionists of the New York School, Mary Ann Caws surveys how artists and writers have eaten, cooked, and depicted food. She examines the parallels between the art of cuisine and the visual arts and literature, using

artworks, diaries, novels, letters, and poems to illuminate the significance of particular ingredients and dishes in the lives of the world's greatest artists. In between, she supplies numerous recipes from these artists--including Ezra Pound's poetic eggs, Cézanne's baked tomatoes, and Monet's madeleines--alongside one hundred color illustrations and thought-provoking selections from both poetry and prose. A joyous and illuminating guide to the art of food, *The Modern Art Cookbook* is a feast for the mind as well as the palate.

Nonnative Oysters in the Chesapeake Bay discusses the proposed plan to offset the dramatic decline in the bay's native oysters by introducing disease-resistant reproductive Suminoe oysters from Asia. It suggests this move should be delayed until more is known about the environmental risks, even though carefully regulated cultivation of sterile Asian oysters in contained areas could help the local industry and researchers. It is also noted that even though these oysters eat the excess algae caused by pollution, it could take decades before there are enough of them to improve water quality.

Worldwide, the indelible image of the Netherlands is the tulip. But the tulip is not alone: flowers of all kinds have long been a key part of both the Dutch identity and the Dutch economy, and in *Holland Flowering*, Andrew Gebhardt offers a dazzling tour of Dutch flower culture, from the earliest days of horticulture to attempts to grow bulbs on the moon. Building his account around the world's largest flower auction, Aalsmeer's, which is located near Amsterdam, Gebhardt links past and present, petals and painting, colonial trading and the European Union. The resulting book is as unusual as it is ambitious, full of insights into horticulture, the workings of markets,

globalization, aesthetics, and Dutch popular culture.

Still-life Paintings from the Netherlands, 1550-1720 The Monacelli Press, LLC

Text by Joachim Pissaro.

The Art of Arts The Monacelli Press, LLC
Before New York City was the Big Apple, it could have been called the Big Oyster.

Now award-winning author Mark Kurlansky tells the remarkable story of New York by following the trajectory of one of its most fascinating inhabitants—the oyster, whose influence on the great metropolis remains unparalleled. For centuries New York was famous for its oysters, which until the early 1900s played such a dominant a role in the city's economy, gastronomy, and ecology that the abundant bivalves were Gotham's most celebrated export,

a staple food for the wealthy, the poor, and tourists alike, and the primary natural defense against pollution for the city's congested waterways. Filled with cultural, historical, and culinary insight—along with historic recipes, maps, drawings, and photos—this dynamic narrative sweeps readers from the island hunting ground of the Lenape Indians to the death of the oyster beds and the rise of America's environmentalist movement, from the oyster cellars of the rough-and-tumble Five Points slums to Manhattan's Gilded Age dining chambers. Kurlansky brings characters vividly to life while recounting dramatic incidents that changed the course of New York history. Here are the stories behind Peter Stuyvesant's peg leg and Robert Fulton's "Folly"; the oyster

merchant and pioneering African American leader Thomas Downing; the birth of the business lunch at Delmonico's; early feminist Fanny Fern, one of the highest-paid newspaper writers in the city; even "Diamond" Jim Brady, who we discover was not the gourmand of popular legend. With *The Big Oyster*, Mark Kurlansky serves up history at its most engrossing, entertaining, and delicious.

This examination of Braque's career features exquisite reproductions and incisive historical and aesthetic investigations of his work leading up to and during World War II. This book offers the first detailed examination of Braque's experiments with still lifes and interiors during a significant, though

overlooked, time in his career. One of the leading founders of Cubism, Braque employed the genre of the still life to conduct a lifelong investigation into the nature of perception through the tactile and transitory world of everyday objects. Examining a transitional time between Braque's early Cubist works and his late grand series, this catalog considers his paintings within the cultural and political context of Europe at this time. Reproduced in vivid color, Braque's paintings are accompanied by scholarly essays that explore the rise of Braque's popularity in the US, including his first major retrospective in America, and the reception of his work of the early 1930s and 1940s by German and French critics, as well as a behind-the-scenes look at the materials and process employed by

the artist as illuminated by an intensive conservation study of select important works.

It all began simply enough. In 1976 the Point Reyes Wilderness Act granted the highest protection in America to more than 33,000 acres of California forest, grassland and shoreline - including Drakes Estero, an estuary of stunning beauty. Inside was a small, family-run oyster farm first established in the 1930s. A local rancher bought the business in 2005, renaming it The Drakes Bay Oyster Company. When the National Park Service informed him that the 40-year lease would not be renewed past 2012, he vowed to keep the farm in business even if it meant taking his fight all the way to the Supreme Court.

Environmentalists, national politicians, scientists, and the Department of the Interior all joined a protracted battle for the estuary that had the power to influence the future of wilderness for decades to come. Were the oyster farmers environmental criminals, or victims of government fraud? Fought against a backdrop of fear of government corruption and the looming specter of climate change, the battle struck a national nerve, pitting nature against agriculture and science against politics, as it sought to determine who belonged and who didn't belong, and what it means to be wild.

Pioneering Modern Painting

Chronicle Books

This stunning book presents the very best still lifes produced in the

Netherlands at the height of the genre, from the early beginnings in the 16th century, with Pieter Aertsen and Joachim Beuckelaer, to the late highlights in the 18th century, with Rachel Ruysch and Jan van Huysum. Despite the popularity and abundance of flower paintings in modern collections, the book includes a wide range of subjects and styles, from the simple to the complex, the charmingly small to the opulent and extravagant, and from flowers to hunting still lifes or objects in the corner of a painter's studio, along with an occasional trompe l'oeil. The visual delights of still-life painting have a strong historical context. Collectors and connoisseurs purchased them because of their realism, visual appeal, and relevance to their own lives. Poets praised the

wonders of still-life paintings and evoked the power of painting to transcend the seasons and the passing of time. Contemporary observers lauded the expensive and elaborate objects often on display. The book therefore considers the visual achievement of the Netherlandish still life painters in the context of contemporary reactions to pictures, art theory, and issues of patronage. Numerous artists were tempted to try their hand at still life, drawn by a new and enchanting genre that allowed an artist to create independent worlds of inanimate objects on the flat surface of a picture -- imaginary realms that had an exceptional following among connoisseurs of the time. These images continue to work their magic on present-

day art lovers.

The Oyster War Harper Collins

How do the bodies we inhabit affect our relationship with art? How does art affect our relationship to our bodies? T Fleischmann uses Felix Gonzáles-Torres's artworks—piles of candy, stacks of paper, puzzles—as a path through questions of love and loss, violence and rejuvenation, gender and sexuality. From the back porches of Buffalo, to the galleries of New York and L.A., to farmhouses of rural Tennessee, the artworks act as still points, sites for reflection situated in lived experience. Fleischmann combines serious engagement with warmth and clarity of prose, reveling in the experiences and pleasures of art and the body, identity and community.

Named a Most Anticipated Book of 2020 by BuzzFeed, Library Journal, The Millions, and The Rumpus Effortlessly blending biography, criticism, and memoir, National Book Award-winning poet and best-selling memoirist Mark Doty explores his personal quest for Walt Whitman. Mark Doty has always felt haunted by Walt Whitman's bold, perennially new American voice, and by his equally radical claims about body and soul and what it means to be a self. In *What Is the Grass*, Doty—a poet, a New Yorker, and an American—keeps company with Whitman and his *Leaves of Grass*, tracing the resonances between his own experience and the

legendary poet's life and work. What is it then between us? Whitman asks. In search of an answer, Doty explores spaces—both external and internal—where he finds the poet's ghost. He meditates on desire, love, and the mysterious wellsprings of the poet's enduring work: a radical experience of transformation and enlightenment, queer sexuality, and an obsession with death, as well as unabashed love for a great city and for the fresh, rowdy character of American speech. In riveting close readings threaded with personal memoir and illuminated by awe, Doty reveals the power of Whitman's persistent presence in his life and in the American imagination at large. How does a voice survive death? *What Is the Grass* is a conversation across time and space,

a study of the astonishment one poet finds in the accomplishment of another, and an attempt to grasp Whitman's deeply hopeful vision of human possibility.

Bill Buford's *Heat* meets Phoebe Damrosch's *Service Included* in this unique blend of personal narrative, food miscellany, and history. In March of 2009, Erin Byers Murray ditched her pampered city girl lifestyle and convinced the rowdy and mostly male crew at Island Creek Oysters in Duxbury, Massachusetts, to let a completely unprepared, aquaculture-illiterate food and lifestyle writer work for them for a year to learn the business of oysters. The result is *Shucked*—part love letter,

part memoir and part documentary about the world's most beloved bivalves. Providing an in-depth look at the work that goes into getting oysters from farm to table, *Shucked* shows Erin's full-circle journey through the modern day oyster farming process and tells a dynamic story about the people who grow our food, and the cutting-edge community of weathered New England oyster farmers who are defying convention and looking ahead. The narrative also interweaves Erin's personal story—the tale of how a technology-obsessed workaholic learns to slow life down a little bit and starts to enjoy getting her hands dirty (and cold). This is a book for oyster lovers everywhere, but also a great read for locavores and foodies in general.

"Fishes in Art examines the diverse ways fishes have been presented by artists and what these images tell us about the catching, storage, preparation and cooking of fish over the centuries. The author analyses the economic, political and religious factors that engaged these artists, such as the rise and fall of ports across the world, the legacy of the Cod Wars and the various sacred decrees on the eating of fish. She considers the physical conditions and ethics of fishing, and the developments in the canning, ice and salt industries that continue today"--Jacket.

viewer's own troubled gaze. In Diane Seuss's new collection, the notion of the still life is shattered and Rembrandt's painting is presented across the book in pieces—details that hide more than they reveal until they're assembled into a whole. With invention and irreverence, these poems escape gilded frames and overturn traditional representations of gender, class, and luxury. Instead, Seuss invites in the alienated, the washed-up, the ugly, and the freakish—the overlooked many of us who might more often stand in a Walmart parking lot than before the canvases of Pollock, O'Keeffe, and Rothko. Rendered with precision and profound empathy, this extraordinary gallery of lives in shards shows us that "our memories are local, acute, and unrelenting."
