The publishing industry has responded to the emergence of digital technologies with many useful and innovative products, but the business of publishing has not yet reinvented itself for this new era—old, outdated models prevail, limiting both vision and opportunity. Every Book Is a Startup provides a roadmap for publishing professionals interested in bringing a fresh, entrepreneurial approach to the business of book publishing, based on techniques proven effective in the world of tech startups. This book shows you how to apply tech industry concepts such as customer development, validated learning, and pivots to create publishing business practices that are agile, flexible, and highly profitable. Here at O'Reilly Media, we've incorporated many of these techniques into our own publishing business, including "release early, release often." With that in mind, the initial release of this project discusses two core ideas for how this new way of thinking can be applied to book publishing, and solicits your ideas about what we might include in future releases of this book. What do you want to know more about? Would a variety of case studies be helpful? Let us know! The current ebook release of Every Book Is a Startup is priced at \$7.99; subsequent releases will be priced higher. Buy the current release now and you'll receive all updates at no additional cost. A print edition will be available for purchase when the book is complete.

"Dispenses true-to-life advice on . . . pitching investors, facing down competition, and modifying your business to embrace disruption." —Stanford B. Silverman, founder and CEO Minerva Capital Management Start-Up Saboteurs shows entrepreneurs how to create real wealth by abandoning their limited thinking, eliminating boundaries, and stop defining the outcome. Money is first and foremost about freedom and not about acquiring things

nor flaunting them in front of family and friends. Money is about the freedom to do whatever one wants, whenever they want. Ziad K. Abdelnour calls upon striving entrepreneurs within Start-Up Saboteurs to empower them to create their own wealth. He guides them through the challenging maze of egos, incompetence, and ignorance so they can separate fact from fiction. By the end of Start-Up Saboteurs, entrepreneurs are inspired to create their own wealth, not for the sake of wealth, but for the sake of becoming free and independent. "Start-ups are not for a weak stomach nor is this book. I have seen many start-ups launch without a true and honest self-assessment that would have saved them and others years of heartache, pain, and chaos. Ziad guides you through that assessment and jolts you with the start-up world's brutal realities to help protect you from the saboteurs—including yourself." —Katherine Malmay Bazemore, CEO and president of Cocoon Resources, Inc. "As a veteran financier in private equity and the commodity markets, Ziad knows it's not easy for start-up to succeed so he pushes you—hard—to reach your full entrepreneurial potential." —Mark Skousen, investment expert and editor-in-chief for Forecasts & Strategies Newsletter

Showing how entrepreneurs and investors can start up in Asia and go global, the book provides a first-hand, on-the-ground tour of the new technology centers that are gaining momentum all over Asia. Interviews with the most successful venture capitalists and entrepreneurs reveal their winning strategies and show how a new generation of entrepreneurs in China and India are no longer looking to the West for their cues - but are instead crafting their own local business models and success strategies.

Steve Hoffman, CEO of Founders Space, prepares entrepreneurs to avoid mistakes, overcome obstacles, and master the skills necessary to make the right choices along their path to success. The fact is, over 90 percent of all new startups fail. Every entrepreneur must face this harsh reality and learn to master it if they hope to survive and wind up on top. In Surviving a Startup, Hoffman brings readers on a wild ride, sharing with them the

tumultuous journey of launching a venture-funded startup and revealing what it takes to make it. In this one-of-a-kind guide, you will learn: A deep analysis and insights into the major challenges every entrepreneur faces when launching a business. How to make the best possible decisions and deal with crisis situations. Strategies for raising capital and growing a business, even when it seems impossible. Secrets on how to manage difficult employees, demonstrate leadership, and overcome disasters. Essential traits that enable startup founders to survive and succeed. The best way to develop innovative products, conduct guerilla marketing campaigns, obtain PR, and outmaneuver competitors. How to recruit the best talent, manage highly efficient teams, and motivate employees, even with little to no money. The steps necessary to transform an idea into a robust, rapidly growing business. As the captain of one of the world's leading startup incubators and accelerators, Steve knows what it's like to be on the front lines, how tough it can get when the battle turns against the entrepreneur, and what it takes to taste victory and overcome seemingly impossible odds. Surviving a Startup is a must read for entrepreneurs considering taking the best first steps for a new venture.

If Owen Chase can't find a way to turn his company around in the next nine days, he'll be forced to shut it down and lay off all of his employees. He has incurred substantial debt and his marriage is on shaky ground. Through pure happenstance, Owen finds himself pondering this problem while advancing steadily as a contestant at the World Series of Poker. His Las Vegas path quickly introduces him to Samantha, a beautiful and mysterious mentor with a revolutionary approach to entrepreneurship. Sam is a fountain of knowledge that may save his company, but her sexual advances might prove too much for Owen's struggling marriage. All In Startup is more than just a novel about eschewing temptation and fighting to save a company. It is a lifeline for entrepreneurs who are thinking about launching a new idea or for those who have already started but can't seem to generate the traction they were expecting. Entrepreneurs who achieve success in the new economy do so using a new "scientific method" of

innovation. All In Startup demonstrates why four counterintuitive principles separate successful entrepreneurs from the wannapreneurs who bounce from idea to idea, unable to generate real revenue. You will likely get only one opportunity in your life to go "all in" in on an idea: to quit your job, talk your spouse into letting you drain the savings account, and follow your dream. All In Startup will prepare you for that "all in" moment and make sure that you push your chips into the middle only when the odds are in your favor. This book holds the keys to significantly de-risking your idea so that your success appears almost lucky. Join Owen and Sam for this one-of-a-kind journey that will set you on the right path for when it's your turn to put everything on the line.

Super Founders uses a data-driven approach to understand what really differentiates billion-dollar startups from the rest—revealing that nearly everything we thought was true about them is false! Ali Tamaseb has spent thousands of hours manually amassing what may be the largest dataset ever collected on startups, comparing billion-dollar startups with those that failed to become one—30,000 data points on nearly every factor: number of competitors, market size, the founder's age, his or her university's ranking, quality of investors, fundraising time, and many, many more. And what he found looked far different than expected. Just to mention a few: Most unicorn founders had no industry experience; There's no disadvantage to being a solo founder or to being a non-technical CEO; Less than 15% went through any kind of accelerator program; Over half had strong competitors when starting--being first to market with an idea does not actually matter. You will also hear the stories of the early days of billion-dollar startups first-hand. The book includes exclusive interviews with the founders/investors of Zoom, Instacart, PayPal, Nest, Github, Flatiron Health, Kite Pharma, Facebook, Stripe, Airbnb, YouTube, LinkedIn, Lyft, DoorDash, Coinbase, and Square,

venture capital investors like Elad Gil, Peter Thiel, Alfred Lin from Sequoia Capital and Keith Rabois of Founders Fund, as well as previously untold stories about the early days of ByteDance (TikTok), WhatsApp, Dropbox, Discord, DiDi, Flipkart, Instagram, Careem, Peloton, and SpaceX. Packed with counterintuitive insights and inside stories from people who have built massively successful companies, Super Founders is a paradigm-shifting and actionable guide for entrepreneurs, investors, and anyone interested in what makes a startup successful.

Lead a life of adventure, meaning and purpose—and earn a good living. "Thoughtful, funny, and compulsively readable, this guide shows how ordinary people can build solid livings, with independence and purpose, on their own terms."—Gretchen Rubin, author of the #1 New York Times bestseller *The Happiness Project*. Still in his early thirties, Chris Guillebeau completed a tour of every country on earth and yet he's never held a "real job" or earned a regular paycheck. Rather, he has a special genius for turning ideas into income, and he uses what he earns both to support his life of adventure and to give back. Chris identified 1,500 individuals who have built businesses earning \$50,000 or more from a modest investment (in many cases, \$100 or less), and focused on the 50 most intriguing case studies. In nearly all cases, people with no special skills discovered aspects of their personal passions that could be monetized, and were able to restructure their lives in ways that gave them greater freedom and fulfillment. Here, finally, distilled into one easy-to-use guide, are the most valuable lessons from those who've learned how to turn what they do into a gateway to self-fulfillment. It's all about finding the intersection between your "expertise"—even if you

don't consider it such—and what other people will pay for. You don't need an MBA, a business plan or even employees. All you need is a product or service that springs from what you love to do anyway, people willing to pay, and a way to get paid. Not content to talk in generalities, Chris tells you exactly how many dollars his group of unexpected entrepreneurs required to get their projects up and running; what these individuals did in the first weeks and months to generate significant cash; some of the key mistakes they made along the way, and the crucial insights that made the business stick. Among Chris's key principles: If you're good at one thing, you're probably good at something else; never teach a man to fish—sell him the fish instead; and in the battle between planning and action, action wins. In ancient times, people who were dissatisfied with their lives dreamed of finding magic lamps, buried treasure, or streets paved with gold. Today, we know that it's up to us to change our lives. And the best part is, if we change our own life, we can help others change theirs. This remarkable book will start you on your way.

Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing

successful startups in an age when companies need to innovate more than ever.

If you want your startup to succeed, you need to understand why startups fail. "Whether you're a first-time founder or looking to bring innovation into a corporate environment, *Why Startups Fail* is essential reading."—Eric Ries, founder and CEO, LTSE, and New York Times bestselling author of *The Lean Startup* and *The Startup Way*. Why do startups fail? That question caught Harvard Business School professor Tom Eisenmann by surprise when he realized he couldn't answer it. So he launched a multiyear research project to find out. In *Why Startups Fail*, Eisenmann reveals his findings: six distinct patterns that account for the vast majority of startup failures. • **Bad Bedfellows.** Startup success is thought to rest largely on the founder's talents and instincts. But the wrong team, investors, or partners can sink a venture just as quickly. • **False Starts.** In following the oft-cited advice to "fail fast" and to "launch before you're ready," founders risk wasting time and capital on the wrong solutions. • **False Promises.** Success with early adopters can be misleading and give founders unwarranted confidence to expand. • **Speed Traps.** Despite the pressure to "get big fast," hypergrowth can spell disaster for even the most promising ventures. • **Help Wanted.** Rapidly scaling startups need lots of capital and talent, but they can make mistakes that leave them suddenly in short supply of both. • **Cascading Miracles.** Silicon Valley exhorts entrepreneurs to dream big. But the bigger the vision, the more things that can go wrong. Drawing on fascinating stories of ventures that failed to fulfill their early promise—from a home-furnishings retailer to a concierge dog-walking service, from a dating app to the inventor of a sophisticated social robot, from a fashion brand to a startup deploying a vast network of charging stations for electric vehicles—Eisenmann offers frameworks for detecting when a venture is vulnerable to these patterns, along with a wealth of strategies and tactics for avoiding them. A must-read for founders at any stage of their entrepreneurial journey, *Why Startups Fail* is not merely a guide to preventing failure but also a roadmap charting the path to startup success.

*Managing Startups: Best Blog Posts* Prentice Hall

If you want salient advice about your startup, you've hit the jackpot with this book. Harvard Business School Professor Tom

Eisenmann annually compiles the best posts from many blogs on technology startup management, primarily for the benefit of his students. This book makes his latest collection available to the broader entrepreneur community. You'll find 72 posts from successful entrepreneurs and venture capitalists, such as Fred Wilson, Steve Blank, Ash Maurya, Joel Spolsky, and Ben Yoskovitz. They cover a wide range of topics essential to your startup's success, including: Management tasks: Engineering, product management, marketing, sales, and business development Organizational issues: Cofounder tensions, recruiting, and career planning Funding: The latest developments in capital markets that affect startups Divided into 13 areas of focus, the book's contributors explore the metrics you need to run your startup, discuss lean prototyping techniques for hardware, identify costly outsourcing mistakes, provide practical tips on user acquisition, offer branding guidelines, and explain how a choir of angel investors often will sing different parts. And that's just for starters.

Achieve annual returns of 25% or more with a well-designed angel portfolio Written by David S. Rose, the founder of Gust—the global platform that powers the world of organized professional angel investing—Angel Investing is a comprehensive, entertaining guide that walks readers through every step of the way to becoming a successful angel investor. It is illustrated with stories from among the 90+ companies in which David has invested during a 25 year career as one of the world's most active business angels and includes instructions on how to get started, how to find and evaluate opportunities, and how to pursue and structure investments to maximize your returns. From building your reputation as a smart investor, to negotiating fair deals, adding value to your portfolio companies and helping them implement smart exit strategies, David provides both the fundamental strategies and the specific tools you need to take full advantage of this rapidly growing asset class. He details the advantages of joining an angel group, explains how seed and venture funds can help leverage an investor's resources, and reveals how recent regulatory changes and new online platforms are making startup investing accessible to millions of Americans. Making money is no longer about sitting back and reading stock listings, David says. It is now about being part owner of an exciting startup that can be

fun and financially rewarding. Angel Investing teaches investors how to carefully select and manage investments, establish a long term view, and approach angel investing as a serious part of an alternative asset portfolio while also enjoying being an integral part of an exciting new venture.

You're smart. So don't be dumb about money. Pinpoint your biggest money blind spots and take control of your finances with these tools from CBS News Business Analyst and host of the nationally syndicated radio show Jill on Money, Jill Schlesinger. "A must-read . . . This straightforward and pleasingly opinionated book may persuade more of us to think about financial planning."—Financial Times Hey you . . . you saw the title. You get the deal. You're smart. You've made a few dollars. You've done what the financial books and websites tell you to do. So why isn't it working? Maybe emotions and expectations are getting in the way of good sense—or you're paying attention to the wrong people. If you've started counting your lattes, for god's sake, just stop. Read this book instead. After decades of working as a Wall Street trader, investment adviser, and money expert for CBS News, Jill Schlesinger reveals thirteen costly mistakes you may be making right now with your money. Drawing on personal stories and a hefty dose of humor, Schlesinger argues that even the brightest people can behave like financial dumb-asses because of emotional blind spots. So if you've saved for college for your kids before saving for retirement, or you've avoided drafting a will, this is the book for you. By following Schlesinger's rules about retirement, college financing, insurance, real estate, and more, you can save money and avoid countless sleepless nights. It could be the smartest investment you make all year. Praise for *The Dumb Things Smart People Do with Their Money* "Common sense is not always common, especially when it comes to managing your money. Consider Jill Schlesinger's book your guide to all the things you should know about money but were never taught. After reading it, you'll be smarter, wiser, and maybe even wealthier."—Chris Guillebeau, author of *Side Hustle* and *The \$100 Startup* "A must-read, whether you're digging yourself out of a financial hole or stacking up savings for the future, *The Dumb Things Smart People Do with Their Money* is a personal finance

gold mine loaded with smart financial nuggets delivered in Schlesinger's straight-talking, judgment-free style."—Beth Kobliner, author of *Make Your Kid a Money Genius (Even If You're Not)* and *Get a Financial Life*

An instant New York Times bestseller, Dan Lyons' "hysterical" (Recode) memoir, hailed by the Los Angeles Times as "the best book about Silicon Valley," takes readers inside the maddening world of fad-chasing venture capitalists, sales bros, social climbers, and sociopaths at today's tech startups. For twenty-five years Dan Lyons was a magazine writer at the top of his profession—until one Friday morning when he received a phone call: Poof. His job no longer existed. "I think they just want to hire younger people," his boss at Newsweek told him. Fifty years old and with a wife and two young kids, Dan was, in a word, screwed. Then an idea hit. Dan had long reported on Silicon Valley and the tech explosion. Why not join it? HubSpot, a Boston start-up, was flush with \$100 million in venture capital. They offered Dan a pile of stock options for the vague role of "marketing fellow." What could go wrong? HubSpotters were true believers: They were making the world a better place ... by selling email spam. The office vibe was frat house meets cult compound: The party began at four thirty on Friday and lasted well into the night; "shower pods" became hook-up dens; a push-up club met at noon in the lobby, while nearby, in the "content factory," Nerf gun fights raged. Groups went on "walking meetings," and Dan's absentee boss sent cryptic emails about employees who had "graduated" (read: been fired). In the middle of all this was Dan, exactly twice the age of the average HubSpot employee, and literally old enough to be the father of most of his co-workers, sitting at his desk on his bouncy-ball "chair."

One of Silicon Valley's most successful angel investors shares his rules for investing in startups. There are two ways to make money in startups: create something valuable—or invest in the people that are creating valuable things. Over the past twenty-five years, Jason Calacanis has made a fortune investing in creators, spotting and helping build and fund a number of successful technology startups—investments that have earned him tens of millions of dollars. Now, in this enlightening guide that is sure to become the bible for twenty-first century investors, Calacanis takes potential

angels step-by-step through his proven method of creating massive wealth: startups. As Calacanis makes clear, you can get rich—even if you came from humble beginnings (his dad was a bartender, his mom a nurse), didn't go to the right schools, and weren't a top student. The trick is learning how angel investors think. Calacanis takes you inside the minds of these successful moneymen, helping you understand how they prioritize and make

the decisions that have resulted in phenomenal profits. He guides you step by step through the process, revealing how leading investors evaluate new ventures, calculating the risks and rewards, and explains how the best startups leverage relationships with angel investors for the best results. Whether you're an aspiring investor or a budding entrepreneur, Angel will

inspire and educate you on all the ins of outs. Buckle up for a wild ride into the world of angel investing!
