designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Excerpt: This is a list of characters in the Maximum Ride children's book series by James Patterson. Maximum "Max" Ride is a title character and the main protagonist of the series. She is a 14-

year-old (15 in Fang) avian-human hybrid and the leader of the Flock. Max is described as a tomboy, with a witty and sarcastic attitude but with a soft side. She has dirty blond and brown eyes. In other books, she is described as having brown hair with blond/sun-streaks; some fans think it might be because Angel and Gazzy already have blonde hair, yet only Nudge has brown hair. On Fang's blog, it described her hair as darker than blonde but lighter than brunette. Max has an ability to fly "faster than the speed of light." Max is five feet and eight inches tall and weighs 97 pounds as described in *The Final Warning*, Max has a 14 foot wingspan, though

it was originally 13 feet. In *MAX* Max has an affair with Fang in the desert after talking to him about Nudge wanting to cut her wings off, she holds her fear and stays. Later the Flock meets Dylan who, according to Dr. Gunther-Hagen, is Max's "perfect other half." Max begins to feel an attraction for Dylan. In *Angel*, she and Dylan grow closer, confusing her feelings about Fang, who begins to grow closer with Maya, who is Max's clone. Max is one of the two members of the Flock who found her parents; Iggy is the other. Yet she is the only one to love her parents, Iggy leaving his after only a week or so. She was stunned when she learned that Jeb Batchelder (a... Linger Little, Brown

Topics covered include the value of wildlife viewing, the conservation of rainforests, mangroves and coral reefs, supplying rural water, and controlling urban air pollution. The analysis reveals

important methodological and contextual factors, highlighting key lessons and ways of strengthening future valuations. Written to be accessible to non-economists, the book provides source material for students and academics, and for policy-makers and professionals, using valuation methods to frame policy.
