In recent years, prosodic competence has become increasingly important in second language acquisition studies, as it is a crucial element in the identification of non-native pronunciation and message understanding. This volume is the first attempt to provide a survey of interlanguage prosody research in L2 Italian. It begins with an overview of the possible approaches to the study of rhythmic-prosodic skills acquisition in an L2. The second part of the book emphasizes the relationship between the mother tongue and a second language, and investigates the presence of transfer in prosody interlanguage development. The third part illustrates prosody's role in the interpretation of pragmatic meaning in native-non-native interaction, and its influence on message persuasiveness. And in the fourth part, technology meets prosody in the areas of second language teaching and speech synthesis.

This fourth edition of a classic text features important updates reflecting the enormous changes that have taken place since the Telecommunications Act of 1996 and the ever-increasing importance of the Internet and the World Wide Web. The implications of these changes, and others, are examined in this new edition, which seeks to equip

electronic media students for management in a new millennium - and the unprecedented challenges that will surely accompany it.

Hedgehog's Home Council of Europe
A touching story of cultural difference and tested loyalties. Set in Belgrade before WWII, *Fathers and Forefathers* tells the story of the marriage between a Steven, a Serb, and Elizabeth, an Englishwoman. After meeting at an English university they marry and leave England to build their life together. Steven's narrative and Elizabeth's letters home reveal two very different personal accounts of the difficulties this involves. Raised in Serbia their son, Mihajlo, is ashamed of his mixed parentage and rebels against his non-Serbian ancestry. On the eve of the war, Steven's loyalties are challenged when his counsel is sought by both the Serbian king and the opposition. He resolves to keep his distance from the conflict, but Mihajlo's more radical response forces him to become involved, and tragedy engulfs the family.

First published in 1988, this book is concerned with the definite and indefinite articles in English. It provides an integrated pragmatic-semantic theory of definite and indefinite reference, on the basis of which, many co-occurrence restrictions between articles and non-modifiers are explained. At the general theoretical level, this book looks at the role of semantics in the prediction of all and only the grammatical sentences of a language. A generalisation is proposed uniting semantic oppositions underlying ungrammaticality with syntactic oppositions between conditions of application on transformational generative rules. A procedure is

suggested for distinguishing semantic from syntactic causes of ungrammaticality. At a more particular level, the book explores the nature of reference. It examines an important selection of subjects such as the contrast between definiteness and indefiniteness, the relationship between definite and demonstrative reference, and the relationship between pragmatic and logical aspects of determining meaning. *Electronic Media Management* Routledge

This book is a result of the international conference English Language and Literature Studies: Image, Identity, Reality (ELLSIIR), held at the English Department of the Belgrade Faculty of Philology to mark its 80th Anniversary. The conference covered a wide range of topics from extremely diverse fields, namely: theoretical linguistics, applied language studies, literature and cultural studies. This book comprises papers covering all of these areas, divided into three sections according to the shared topic: Image, Identity and Reality. Owing to its interdisciplinarity, its argumentative and theoretically founded wealth of knowledge, and the outstandingly interesting topics, the book will be very useful for academic study, and a valuable resource in understanding the range of subjects covered in its three chapters, not only to experts interested in scholarly research, but also to the general public, as a reliable and trustworthy source of information.

As an Israeli secret service agent, Yoel Ravid's ability to sense the truth made him invaluable. Now widowed and retired, he lives with his mother, his mother-in-law, his daughter, and the haunting memory of his wife. A New York Times Notable Book of the Year.

Translated by Nicholas de Lange. A Helen and Kurt Wolff Book
priče iz ratnog djetinjstva Cambridge University Press

Meet Hedgemond the Hunter - a brave and stubborn little hedgehog. Down in the wild woods he proudly tends his beloved house, but there are some animals who just can't understand what the fuss is about. Find out just how Hedgemond proves to the grumpy bear and the greedy boar that there is no place like home. Hedgehog's Home is a story about caring for the place you call home. Set in the unspoilt environment of the 'wild woods', we find the wild creatures arguing about what home means: is it simply a place we should take for granted or is it something to be cherished and protected? Despite the persuasions of charming Miss Fox and the jeers of the angry wolf, Hedgemond steadfastly proves that his home is his castle, reminding us all to be true to ourselves and safeguard what we care for.

Longman Lexicon of Contemporary English. Course Technology Ptr

How lessons from kindergarten can help everyone develop the creative thinking skills needed to thrive in today's society. In kindergartens these days, children spend more time with math worksheets and phonics flashcards than building blocks and finger paint. Kindergarten is becoming more like the rest of school. In *Lifelong Kindergarten*, learning expert Mitchel Resnick argues for exactly the opposite: the rest of school (even the rest of life) should be more like kindergarten. To thrive in today's fast-changing world, people of all ages must learn to think and act creatively—and the best way to do that is by focusing more on imagining, creating, playing, sharing, and reflecting, just as children

do in traditional kindergartens. Drawing on experiences from more than thirty years at MIT's Media Lab, Resnick discusses new technologies and strategies for engaging young people in creative learning experiences. He tells stories of how children are programming their own games, stories, and inventions (for example, a diary security system, created by a twelve-year-old girl), and collaborating through remixing, crowdsourcing, and large-scale group projects (such as a Halloween-themed game called Night at Dreary Castle, produced by more than twenty kids scattered around the world). By providing young people with opportunities to work on projects, based on their passions, in collaboration with peers, in a playful spirit, we can help them prepare for a world where creative thinking is more important than ever before.

Walter Skeat (1835-1912) was one of the greatest investigators of the roots of the English language, and his remarkable scholarship was instrumental in the revival of the great works of early English Literature. His astonishing detective work into the origins and development of the world's most widely used language provides an unsurpassed guide to its flexibility and richness.

Michael Pupin's was a genuinely American story, the lifelong journey of a boy from rural Serbia, from a town so tiny it appeared on no maps, who became one of the greatest scientists of the early 20th century, changing the lives of people the world over with his technological innovations-he invented the therapeutic X-ray and made telephone communications practical and inexpensive-and helping to invent the modern world we know today. First published in 1922, Pupin's autobiography won the Pulitzer Prize in 1924, but Pupin's insightful and incisive words are their own greatest recommendation. American physicist and writer MICHAEL IDVORSKY PUPIN (1858-1935) was born in Serbia and emigrated to the United States as a teenager. As a professor and researcher at Columbia University, he invented sonar and made important discoveries in the fields of X-ray physics and telecommunications.

Engaging Audiences asks what cognitive science can teach scholars of theatre studies about spectator response in the theatre. Bruce McConachie introduces insights from neuroscience and evolutionary theory to examine the dynamics of conscious attention, empathy and memory in theatre goers. *Gramatika engleskog jezika* Council of Europe

From the beginning of 2000 the European accession process was placed at the centre of peace-building in Bosnia and Herzegovina. The prospect of EU membership provided a common vision that encouraged different segments of society and the political elites to bridge ethnic divergences and engage in

authentic post-war reconciliation. As pre-accession criterion the European Union required Bosnia and Herzegovina to unify its fragmented policing system at the level of the state. This requirement proved, however, to be a step too far, resulting in a protracted and ultimately unsuccessful process of political negotiations that lasted from 2004 to 2007. The European Union's insistence on placing law enforcement authority at the state level came to be viewed as an identity threat, which affected interethnic group dynamics in a negative way. From this premise, this study assesses the impact of the negotiating process on the political discourse in Bosnia and Herzegovina and on public notions of societal security and illustrates the background and rationale of the European Union's strategy.

The Return of Philip Latinowicz

Routledge

A perceptive observation about the human race cleverly constructed and told with Desai's opulent vocabulary.

Teaching for Quality Learning at University MIT Press

Essays by acclaimed Croatian writer Josip Novakovich.

Cambridge Scholars Publishing

Originally published in 1989, presenting a new perspective on cognitive therapy in neuropsychology, these papers examine a cognitively-oriented, single-case methodology in neuropsychological rehabilitation. The recommended strategy is in-depth analysis of the precise nature of the impaired as well as the preserved processing components in the individual patient. The objective is to design a therapeutic course based on individual patient needs that is justified by the theoretical interpretation of the location of the deficit in his or her cognitive architecture.

A Visual Introduction to Programming with Games, Art, Science, and Math

Springer

"This book is an exceptional introduction to some difficult ideas. It is full of downright good advice for every academic who wants to do something practical to improve his or hers students' learning." Paul Ramsden, Brisbane, Australia "Biggs and Tang present a unified view of university teaching that is both grounded in research and theory and replete with guidance for novice and expert instructors. The book will inspire, challenge, unsettle, and in places annoy and even infuriate its readers, but it will succeed in helping them think about how high quality teaching can contribute to high quality learning." John Kirby, Queens University, Ontario, Canada This best-selling book explains the concept of constructive alignment used in implementing outcomes-based education. Constructive alignment identifies the desired learning outcomes and helps teachers design the teaching and learning activities that will help students to achieve those outcomes, and to assess how well those outcomes have been achieved. Each chapter includes tasks that offer a 'how-to' manual to implement constructive alignment in your own teaching practices. This new edition draws on the authors' experience of consulting on the implementation of constructive alignment in Australia, Hong Kong, Ireland and Malaysia including a wider range of disciplines and teaching contexts. There is also a new section on the evaluation of constructive alignment, which is now used worldwide as a framework for good

teaching and assessment, as it has been shown to: Assist university teachers who wish to improve the quality of their own teaching, their students' learning and their assessment of learning outcomes Aid staff developers in providing support for departments in line with institutional policies Provide a framework for administrators interested in quality assurance and enhancement of teaching across the whole university. The authors

have also included useful web links to further material. Teaching for Quality Learning at University will be of particular interest to teachers, staff developers and administrators.

Definiteness and Indefiniteness

Taylor & Francis

The fully updated second edition of this critical work includes a new introduction, a wide range of new entries and added specialised further reading for lecturers and more advanced students.
