Who's afraid of for-profit education? Those who work in non-profit or government owned and operated schools. Many parents and other stakeholders have been made fearful by this education establishment. What's more important to humans: nutrition or education? Nutrition is more important because it is the prerequisite for other

human activities, including education. What organizations provide food and who pays for the food? Food is provided by for-profit farmers, for-profit processors, for-profit wholesalers, and for-profit retailers. Most food is purchased with the consumers' own money, but a significant amount is purchased by low-income individuals using food stamps. Why can't education be provided similarly using education stamps? We trust for-profit enterprises to provide our food. Why can't we trust for-profit enterprises to provide K-12 education?

Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education. Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for-profit K-12 education sector would please and amaze its customers.

A revolution in history education is propelling historical thinking and knowing to the forefront of history and social studies education in North America and beyond. Teachers, teacher education programs, schools, and ministries of education across Canada are all among those embracing the idea that knowing history means knowing how to think

historically. *Becoming a History Teacher* is a collection of thoughtful essays by history teachers, historians, and teacher educators on how to prepare student teachers to think historically and to teach historical thinking. *Covering the teacher's experience before, during, and after formal certification, Becoming a History Teacher* contains a wide range of resources for teachers and educators, including information on the latest research in history education and examples of successful history teaching activities.

"This book challenges conventional wisdoms

about economic performance and possible policies for economic development in African countries. Its starting point is the striking variation in African economic performance.

Unevenness and inequalities form a central fact of African economic experiences. The authors highlight not only differences between countries, but also variations within countries, differences often organized around distinctions of gender, class, and ethnic identity. For example, neo-natal mortality and school dropout have been reduced, particularly for some classes of women in some areas of Africa. Horticultural and agribusiness exports have grown far more rapidly in some

countries than in others. These variations (and many others) point to opportunities for changing performance, reducing inequalities, learning from other policy experiences, and escaping the ties of structure, and the legacies of a colonial past. The book rejects teleological illusions and Eurocentric prejudice, but it does pay close attention to the results of policy in more industrialized parts of the world. Seeing the contradictions of capitalism for what they are - fundamental and enduring - may help policy officials protect themselves against the misleading idea that development can be expected to be a smooth, linear process, or that it

would be were certain impediments suddenly removed. The authors criticize a wide range of orthodox and heterodox economists, especially for their cavalier attitude to evidence. Drawing on their own decades of research and policy experience, they combine careful use of available evidence from a range of African countries with political economy insights (mainly derived from Kalecki, Kaldor and Hirschman) to make the policy case for specific types of public sector investment"--

In The Working Class: Poverty, education and alternative voices, Ian Gilbert unites educators from across the UK and further afield to call on all those working in schools to adopt a more enlightened and empathetic approach to supporting children in challenging circumstances. One of the most intractable problems in modern education is how to close the widening gap in attainment between the haves and the have-nots. Unfortunately, successive governments both in the UK and abroad have gone about solving it the wrong way. Independent Thinking founder Ian

Gilbert's increasing frustration with educational policies that favour 'no excuses' and 'compliance', and that ignore the broader issues of poverty and inequality, is shared by many others across the sphere of education - and this widespread disaffection has led to the assembly of a diverse cast of teachers, school leaders, academics and poets who unite in this book to challenge the status quo. Their thought-provoking commentary, ideas and impassioned anecdotal insights are presented in the form of essays, think pieces and poems that draw together a wealth of research on the issue and probe and discredit the current view on what is best

for children from poorer socio-economic backgrounds. Exploring themes such as inclusion, aspiration, pedagogy and opportunity, the contributions collectively lift the veil of feigned 'equality of opportunity for all' to reveal the bigger picture of poverty and to articulate the hidden truth that there is always another way. This book is not about giving you all the answers, however. The contributors are not telling teachers or schools leaders how to run their schools, their classroom or their relationships - the field is too massive, too complex, too open to debate and to discussion to propose 'off-the-shelf' solutions. Furthermore, the research referred to in

this book is not presented in order to tell educators what to think, but rather to inform their own thinking and to challenge some of the dominant narratives about educating the 'feckless poor'. This book is about helping educators to ask the right questions, and its starting question is quite simple: how can we approach the education of young people from disadvantaged backgrounds in a way that actually makes a difference for all concerned? Written for policy makers and activists as well as school leaders and educators, *The Working Class* is both a timely survey of the impact of current policies and an invaluable source of

practical advice on what can be done to better support disadvantaged children in the school system. Edited by Ian Gilbert with contributions from Nina Jackson, Tim Taylor, Dr Steven Watson, Rhythmical Mike, Dr Ceri Brown, Dr Brian Male, Julia Hancock, Paul Dix, Chris Kilkenny, Daryn Egan-Simon, Paul Bateson, Sarah Pavey, Dr Matthew McFall, Jamie Thrasivoulou, Hywel Roberts, Dr Kevin Ming, Leah Stewart, (Real) David Cameron, Sir Al Aynsley-Green, Shona Crichton, Floyd Woodrow, Jonathan Lear, Dr Debra Kidd, Will Ryan, Andrew Morrish, Phil Beadle, Jaz Ampaw-Farr, Darren Chetty, Sameena Choudry, Tait Coles, Professor Terry

Fewer than 12 percent of U.S. workers belong to unions, and union membership rates are falling in much of the world. With tremendous growth in inequality within and between countries, steady or indeed rising unemployment and underemployment, and the marked increase in precarious work and migration, can unions still play a role in raising wages and improving work conditions? This book provides a critical evaluation of labor

unions both in the U.S. and globally, examining the factors that have led to the decline of union power and arguing that, despite their challenges, unions still have a vital part to play in the global economy. Stephanie Luce explores the potential sources of power that unions might have, and emerging new strategies and directions for the growth of global labor movements, such as unions, worker centers, informal sector organizations, and worker co-operatives, helping workers resist the impacts of neoliberalism. She shows that unions may in fact be more relevant now than ever. This important assessment of labor

movements in the global economy will be required reading for advanced undergraduates and graduate students of labor studies, political and economic sociology, the sociology of work, and social movements.

On the train, on the beach, on the sofa ... many people in all parts of the world enjoy doing wordsearches. If you are studying English and want to learn and practise vocabulary related to various topics, then this book is for you! The topics reflect the kinds of everyday conversations that you might have both with native and non-native speakers of English. The topics are also

those that are typically tested in English examinations e.g. TOEFL, Cambridge (First Certificate, Advanced), IELTS, and Trinity. Each chapter begins with a list of questions to enable you to have a conversation about a particular topic in various situations: on a social occasion (e.g. a work dinner, a conference lunch, a party); in the classroom during an English lesson; when chatting, either face to face or online; and during an English oral exam. After the list of questions, you will find a Word List associated with the topic and exercises to test your knowledge of less common words. The final aim is then to find the words from the Word List in the related

Wordsearch. Easy English! is a series of books to help you learn and revise your English with minimal effort. You can improve your English by: reading texts in English that you might normally read in your own language e.g. jokes, personality tests, lateral thinking games, and wordsearches; doing short exercises to improve specific areas grammar and vocabulary, i.e. the areas that tend to lead to the most mistakes - the aim is just to focus on what you really need rather than overwhelming yourself with a mass of rules, many of which may have no practical daily value. Other books in the Easy English!series include: Wordsearches: Widen Your Vocabulary in English Test Your

With almost 6,300 commercial banks, significantly more than in any other country, the world of US banking is unique, fascinating, and always in flux. Two principal pieces of legislation have shaped the banking structure in this country: The McFadden Act of 1927, which prohibited banks from branching into other states, and The Glass-Steagall Act of 1933, which separated commercial and investment banking activities. The repeal of the Glass-Steagall Act in 1999 was one of the main contributing factors behind the global financial crisis of 2008. This measure resulted in the passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, which

once again prohibited commercial banks from making certain types of speculative investments. The Changing Face of American Banking analyzes the impact of both these acts - as well as that of their subsequent repeal - in depth, examining the real effects of government regulations on the US commercial banking sector. Ray Chaudhuri pinpoints the evolving nature of US commercial banks and banking regulations and explores their impact on the economy. Instead of just focusing on banks and regulations, this work considers the correlations and causality between banking performance and economic growth and productivity. It also

brings the banking literature up to date with the 2008-2009 financial crisis and its aftermath, including the passage of the Dodd-Frank Act of 2010 and its effect on American banking. *African Economic Development* Crown House Publishing Ltd National teacher preparation standards in gifted and talented education provide the foundation for research-based practices in gifted education and identify what teachers should know and be able to do to ensure that students with gifts and talents realize their full potential. Because the responsibility for teaching gifted learners and those with potential to achieve at high levels is often

shared between gifted education program leaders and teachers in general and special education classrooms, this book shows Pre-K-12 education leaders how to develop partnerships, identify professional development outcomes, design learning activities, plan and implement comprehensive training programs, and evaluate the effectiveness of professional development activities. Special attention is paid to effecting change within a state and school system. Tools provided include sample needs assessments, student and teacher observation instruments, and a sample professional development plan.
