QUINN PATRICK

The Poverty of Television Univ of California Press

This volume provides the first book-length study of the controversial topic of Verb Second and related properties in a range of Medieval Romance varieties. It presents an examination and analysis of both qualitative and quantitative data from Old French, Occitan, Sicilian, Venetian, Spanish, and Sardinian, in order to assess whether these were indeed Verb Second languages. Sam Wolfe argues that V-to-C movement is a point of continuity across all the medieval varieties - unlike in the modern Romance languages - but that there are rich patterns of synchronic and diachronic variation in the medieval period that have not previously been observed and investigated. These include differences in the syntax-pragmatics mapping, the locus of verb movement, the behaviour of clitic pronouns, the syntax of subject positions, matrix/embedded asymmetries, and the null argument properties of the languages in question. The book outlines a detailed formal cartographic analysis of both the attested synchronic patterns and the diachronic evolution of Romance clausal structure. The findings have widespread implications for the understanding of both the key typological property of Verb Second and the development of Latin into the modern Romance languages.

Jasmonates and Brassinosteroids in Plants Frontiers Media SA

This book provides a comprehensive update on recent developments of Jasmonates (JAs) and Brassinosteroids (BRs) in plant signalling and

biotechnological applications. Over the last few decades, an enormous amount of research data has been generated on these two signalling molecules. This valuable compilation will enhance the basic understanding of JAs and BRs mechanism of actions ensuing tolerance mechanism of crops under climate changes for sustainable agriculture and human welfare. This book covers topics regarding the occurrence of JAs and BRs in plants, biosynthesis, role in plant growth and development, role of these PGRs during various abiotic stress tolerance in plants, crosstalk of Reactive Oxygen Species (ROS) and plant stress mitigation, regulation of JAs and BRs signaling pathways by microRNA, along with physiological and anatomical roles of JAs and BRs as wound healing, regeneration and cell fate decisions. The cross talk of JAs and BRs with neurotransmitters in plant growth and development. Bio-fortification of crop plants with BRs in managing in human health issues chapter enlightened new role of BRs in human wellbeing. This book will be beneficial to scientists, researchers, agriculturists, horticulturists, industries related to the crop and food production KEY FEATURES Reviews the global scientific literature and experimental data of the authors on the occurrence of JAs and BRs in various plants Update information on recent developments of JAs and BRs signalling and biotechnological applications in plants Highlights the physiological, metabolic and molecular mechanism of JAs and BRs under variable climates Addresses the abiotic and biotic tolerance management by JAs and BRs Describes the role of JAs and BRs in sustainable agriculture and human welfare in eco-friendly manner

The Complementarity of Women and Men Oxford University Press

Infinitely multiplied by the blare of radios, TVs and record players in San Juan, Macho Camacho's guaracha weaves its way across the city and through the lives of one family on a single day: Senator Vicente Reinoso, a crooked politician stuck in a gargantuan traffic jam; his neurotic, aristocratic wife;

their son Benny, a fascist who is quite literally in love with his Ferrari, and the Senator's mistress, who inhabits a poorer world with her idiot child, her cousins (Hughie, Louie, and Dewey) and her friend Dona Chon. Macho Camacho's Beat blends the music of puns, fantastic wordplay, advertising slogans, and pop-culture references with the rhythm of the guaracha to satirize the invasive "Americanization" of the island and the way in which a momentary fad impacts the culture at large.

Internet Memes and Society Springer

The aim of the book is to present original and though-provoking essays in human paleontology and prehistory, which are at the forefront of human evolutionary research, in honor of Professor Yoel Rak (a leading scholar in paleoanthropology). The volume presents a collection of original papers contributed by many of Yoel's friends and colleagues from all over the globe. Contributions from experts around the globe fall roughly into three broad categories: Reflections on some of the broad theoretical questions of evolution, and especially about human evolution; the early hominins, with special emphasis on Australopithecus afarensis and Paranthropus; and the Neanderthals, that contentious group of our closest extinct relatives. Within and across these categories, nearly every paper addresses combinations of methodological, analytical and theoretical questions that are pertinent to the whole human evolutionary time span. This book will appeal most to scholars and advanced students in paleoanthropology, human paleontology and prehistoric archaeology.

Plant Microbe Interactions Basic Books

In 1999, General Museveni, Uganda's autocratic leader, ordered police to arrest homosexuals for engaging in behavior that he characterized as "un-African" and against Biblical teaching. A state-sanctioned campaign of harassment of LGBT people followed. With the approval of sections of Uganda's clergy (and with the support of U.S. evangelicals) harsh morality laws were passed against pornography and homosexual acts. The former law disproportionately affected urban women, curtailing their freedoms. The latter—known as the "kill the gays bill"—called for life imprisonment or capital punishment for homosexuals. The author weaves together a series of vignettes that trace the development of Uganda's morality laws amidst Machiavellian politics, religious fundamentalism and the human rights struggle of LGBT Ugandans.

Reenacting the Enemy Lippincott Williams & Wilkins

This book provides a solid, encompassing definition of Internet memes, exploring both the common features of memes around the globe and their particular regional traits. It identifies and explains the roles that these viral texts play in Internet communication: cultural, social and political implications; significance for self-representation and identity formation; promotion of alternative opinion or trending interpretation; and subversive and resistant power in relation to professional media, propaganda, and traditional and digital political campaigning. It also offers unique comparative case studies of Internet memes in Russia and the United States.

Women's Issues for a New Generation Routledge

"Contributors explore the "complementarity" of women and men--that women and men are equal and different--as underpinned by Catholic theology and expressed in philosophy, theology, psychology, and art"--

Noah as Antihero CRC Press

Master high-yield point-of-care ultrasound applications that are targeted specifically to answer questions that arise commonly in the outpatient clinic! Written for primary care providers in Family Medicine, Pediatrics and Internal Medicine, *Ultrasound for Primary Care* is a practical, easy-to-read guide. Learn to incorporate ultrasound to augment your physical exam for evaluation of thyroid nodules, enlarged lymph nodes, pericardial effusion, chronic kidney disease, and a host of musculoskeletal issues, and much more. Additionally, included are chapters on ultrasound for guidance of procedures including joint injections, lumbar puncture and needle biopsy, to name a few. Well-illustrated and highly templated, this unique title helps you expand the scope of your practice and provide more effective patient care.

Macho Men in South African Gyms Mysterious Press

The Forest in Medieval German Literature analyzes the topic of the "forest" through some of the best and lesser known examples of medieval German literature, approaching them through modern ecocritical issues that are paired with premodern perspectives.

Cuba's Gay Revolution Dalkey Archive Press

Stomata, the tiny pores on leaf surface, are the gateways for CO₂ uptake during photosynthesis as well as water loss in transpiration. Further, plants use stomatal closure as a defensive response, often triggered by elicitors, to prevent the entry of pathogens. The guard cells are popular model systems to study the signalling mechanism in plant cells. The messengers that mediate closure upon perception of elicitors or microbe associated molecular patterns (MAMPs) are quite similar to those during ABA effects. These components include reactive oxygen species (ROS), nitric oxide (NO), cytosolic pH and intracellular Ca²⁺. The main components are ROS, NO and cytosolic free Ca²⁺. The list extends to others, such as G-proteins, protein phosphatases, protein kinases, phospholipids and ion channels. The sequence of these signalling components and their interaction during stomatal signalling are complex and quite interesting. The present e-Book provides a set of authoritative articles from 'Special Research Topic' on selected areas of stomatal guard cells. In the first set of two articles, an overview of ABA and MAMPs as signals is presented. The next set of 4 articles, emphasize the role of ROS, NO, Ca²⁺ as well as pH, as secondary messengers. The next group of 3 articles highlight the recent advances on post-translational modification of guard cell proteins, with emphasis on 14-3-3 proteins and MAPK cascades. The last article described the method to isolate epidermis of grass species and monitor stomatal responses to different signals. Our e-Book is a valuable and excellent source of information for all those interested in guard cell function as well as signal transduction in plant cells.

Queer Dance Frontiers Media SA

Environmental crime is one of the most profitable and fastest growing areas of international criminal activity. These types of crime, however, do not always produce an immediate consequence, and the harm may be diffused. As such, the complexity of victimization - in terms of time, space, impact, and who or what is victimized - is one of the reasons why governments and the enforcement community have trouble in finding suitable and effective responses. This book provides a diverse and provocative array of arguments, critiques and recommendations from leading researchers and scholars in the field of green criminology. The chapters are divided into three main sections: the first part deals with specific characteristics of some of the

major types of environmental crime and its perpetrators; the second focuses explicitly on the problem of victimization in cases of environmental crime; and the third addresses the question of how to tackle this problem. Discussing these topics from the point of view of green criminological theory, sociology, law enforcement, community wellbeing, environmental activism and victimology, this book will be of great interest to all those concerned about crime and the environment.

From the author of the Agatha Raisin television series...DEATH OF A MACHO MAN: A Hamish Macbeth MysteryWhen Hamish Macbeth, local constable of the Scottish village of Lochdubh, tries to break up one of the many fights involving Randy Duggan, the ruffian challenges him to a fistfight. But on the chosen day, Duggan is found shot to death and Macbeth is rumored to be the likely suspect. Macbeth must find the murderer, clear his name, and restore his Highland paradise to its usual tranquility.

Stand by Me Routledge

"I started working on this book in spring 2019 while recovering from minor surgery that at the time felt like the biggest health scare to me. The writing of the first few theoretical chapters helped to distract me from my health issue. I planned to continue my work on the book in the summer of 2020, which at that time I anticipated would be another quiet summer at home after my return from a planned trip to Europe. I did not know yet about the biggest world health scare that would coincide with the continuation of my work on the book: the COVID-19 pandemic. It slowly entered every corner of the world, made people socially distance from one another per national and state orders, forced us to stay home, cancel all travel plans, wear masks, and get used to what "the new normal" might be while hoping for the miraculous return of the "old normal." For the second time in two years I turned to the writing of my book as an escape: this time - for a much-needed respite from the global madness and a rising death toll. It also made me think about all those petty ideological and political differences that separated countries in pre-pandemic times, like Russia and the U.S. having grown so far apart in the last few years that they almost have reached the point of no return. I started wondering if a global health scare, such as the ongoing pandemic, could bring states and nations together in tackling the disease. I also wondered if the overused and therefore clichéd phrase "We are all in this together" could go beyond national borders and erase some of the differences that have prevented this"--

Environmental Crime and its Victims Taylor & Francis

Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well-informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality, but instead support its sustainable use.

Verb Second in Medieval Romance Routledge

This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact.

Human Paleontology and Prehistory Rowman & Littlefield

'Queer Dance' challenges social norms and enacts queer coalition across the LGBTQ community. The text joins forces with feminist, anti-racist, and anti-colonial work to consider how bodies are forces of social change.

The Cultural Mindset McFarland

Film Studies From Hollywood to Bollywood, explore the fantastic world of film Whether you're preparing to study film at university or you simply have a passion for cinema, you're bound to enjoy this book. Here's where you'll learn how people communicate ideas in films, how the industry works and who's on the team, the impact of film on popular culture, the different genres and styles, film theory, the joys of animation and so much more.

Explore far-reaching effects - examine the narrative, artistic, cultural, economic and political implications of cinema Compare and contrast film and reality - explore conceptual frameworks for a film's relationship to reality Find out just how they do it - discover how stories are developed in movies and how a storyline is related to broader issues in society Work out what it's all about - get to grips with avant-garde cinema and find out what such films really offer Take the incredible world tour - sample the unique styles of cinema in Europe, Japan, India and other countries Go larger than life - learn about greats in the industry, venture into film analysis and look at the transitions into 21st century cinema Open the book and find: How people tell stories in film Ways film is used to explore current issues and attitudes Responsibilities of cinema tographers and producers The mysteries of mise-en-scene All about digital-age animation Auteurs from the 1930s to today What poststructuralism and postmodernism really mean Ten must-watch movies

Race and Gender in Electronic Media SAGE Publications

Based on an extensive ethnographic study of television and audiences in class-divided Philippines, this is the first book to take a bottom-up approach in considering how people respond to images and narratives of suffering and poverty on television. Arguing for an anthropological ethics of media, this book challenges existing work in media studies and sociology that focuses solely on textual analysis and philosophical approaches to the question of representing vulnerable others. Current questions in media ethics, such as whether to portray sufferers as humane and empowered individuals or show them 'at their worst' have so far used textual and visual analyses to convey the researcher's own moral position on the matter. In contrast, this book, inspired by the anthropology of moralities, accounts for the different interpretations and moral positions of audiences, who are positioned in various degrees of social and moral proximity to those they see and hear on television. Winner of the 2016 Philippine Social Science Council Excellence in Research Award.

Boys, Masculinities and Reading Springer Nature

The phenomenon of global organizations reminds us that cross-cultural management is more prevalent than ever. While it may not be possible to develop in-depth knowledge of all cultures, a person can develop a way of thinking where they integrate culture in all of their deliberations, decisions, and behaviors. Such an approach is transformative and involves adopting a cultural mindset, understanding culture's power as a frame of reference, and developing a new way of thinking. The book *The Cultural Mindset* is based on Dr. Nahavandi's years of teaching, researching, and consulting with many businesses on cross-cultural issues. Built around a think-know-do model, the text enables readers to adopt a cultural mindset that will effectively guide their thinking and behavior as future managers. Through case studies and self-assessments, the book allows students to develop a broader view of culture that is beyond learning skills and competencies. Additionally, by focusing on culture in general, the book allows readers to address both national cultural issues, such as how to work in another country or manage a multi-national team, and diversity issues, such as the glass ceiling or discrimination in the workplace. The key underlying theme for both topics is how culture, national or group-related, impacts our perspective - what we value, how we think, how we behave, and how we manage people effectively. Each chapter will include a focus on both informational and

transformational learning through: Cases and examples that will question assumptions and emphasize applicability Self-assessments to make the concepts personal and relevant, and encourage self-reflection Examples to help students understand those concepts Specific exercises and/or reflections to help students apply information to their own personal and professional life
