This book functions as a practical guide for the use of simulation in anesthesiology. Divided into five parts, it begins with the history of simulation in anesthesiology, its relevant pedagogical principles, and the modes of its employment. Readers are then provided with a comprehensive review of simulation technologies as employed in anesthesiology and are guided on the use of simulation for a variety of learners: undergraduate and graduate medical trainees, practicing anesthesiologists, and allied health providers. Subsequent chapters provide a "how-to" guide for the employment of simulation across wide range of anesthesiology subspecialties before concluding with a proposed roadmap for the future of translational simulation in healthcare. The Comprehensive Textbook of Healthcare Simulation: Anesthesiology is written and edited by leaders in the field and includes hundreds of high-quality color surgical illustrations and photographs.

Situations like those that contributed to the death of Joan Rivers are addressed with particular emphasis on their recognition, prevention and management. The importance of safety as the key element in providing anesthesia in remote or unfamiliar areas is highlighted and discussed. A lack of accurate documentation is a major drawback in out of OR anesthesia practice and the reader is drawn to the importance of documentation, both from a practical and medico legal standpoint. A separate chapter deals with research and future directions in out of OR anesthesia. *Out of Operating Room Anesthesia: A Comprehensive Review*, is primarily aimed at all anesthesia providers: anesthesiologists, nurse anesthetists and residents. Specific chapters such as dental anesthesia, anesthesia for ER procedures and sedation for cosmetic procedures will be useful as a reference guide to physicians exposed to brief training in anesthesia during their non-anesthesia residency program. *Oxford Handbook of Anaesthesia* Lippincott Williams & Wilkins Winner of the First Prize in Anaesthesia at the 2017 British Medical Association Book Awards!
