Esta publicación tiene como objeto principal, ofrecer al público en general la información estadística que permita conocer y evaluar el comportamiento de las principales variables económicas del sistema bancario y financiero en México durante el período 1970-1984. Cabe señalar, sin embargo, que con la intención de permitir al usuario de este trabajo encontrar variables

estadísticas oportunas, se consideró la conveniencia de incorporar en la mayoría de los cuadros las cifras correspondientes al primer trimestre de 1985, de acuerdo con la disponibilidad misma de la información. Este compendio refleja los aspectos de mayor relevancia que atañen a la captación, financiamiento, activos, pasivos, capital y utilidades del sistema bancario. Asimismo, se presenta la importancia relativa del sector financiero nacional.

Just one generation ago, lawyers dominated Mexico's political elite, and Mexican economists were a relatively powerless group of mostly leftist nationalists. Today, in contrast, the country is famous, or perhaps infamous, for being run by American-trained neoclassical economists. In 1993, the Economist suggested that Mexico had the most economically literate government in the world--

a trend that has continued since Mexico's transition to multi-party democracy. To the accompanying fanfare of U.S. politicians and foreign investors, these technocrats embarked on the ambitious program of privatization, deregulation, budget-cutting, and opening to free trade--all in keeping with the prescriptions of mainstream American economics. This book chronicles the evolution of economic expertise in Mexico over the course of the twentieth century,

showing how internationally credentialed experts came to set the agenda for the Mexican economics profession and to dominate Mexican economic policymaking. It also reveals how the familiar language of Mexico's new experts overlays a professional structure that is still alien to most American economists. Sarah Babb mines diverse sources--including Mexican undergraduate theses, historical documents, and personal interviews--to

address issues relevant not only to Latin American studies, but also to the sociology of professions, political sociology, economic sociology, and neoinstitutionalist sociology. She demonstrates with skill how peculiarly national circumstances shape what economic experts think and do. At the same time, Babb shows how globalization can erode national systems of economic expertise in developing countries, creating a new class of "global experts."

Kessler provides a detailed case study of Mexican financial policy reform as well as a comparison of financial collapse in other emerging markets. He shows how political challenges can distort the economic liberalization process in developing countries and how those choices undermine the economic stability achieved by genuine

reform.

Reforming Mexico's Financial System IICA Biblioteca Venezuela Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Studies, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The

Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research underway in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Dolores Moyano Martin, of the Library of

Congress Hispanic Division, has been the editor since 1977, and P. Sue Mundell has been assistant editor since 1994. The subject categories for Volume 55 are as follows:
 Anthropology (including Archaeology and Ethnology) Economics Electronic Resources for the Social Sciences Geography Government and Politics International Relations Sociology
