**SIMULATION OF CEST MRI DATA - GitHub**

When solving a new problem with the MATLAB language, it's often helpful to begin with existing code examples. Examples are highly readable MATLAB code files that show you how to solve problems or accomplish tasks such as curve fitting, plotting, and image processing.

Code for Matlab Projects provides you complete code support for your projects, assignments and also research work. Today many scholars and students are undertaking Matlab projects due to its advanced research scope and applications. The major problem they face is the implementation part of their project.
