Changing Communities Commonwealth Secretariat

There are more young people in the world today than ever before. Yet surprisingly little is known about the current state of affairs in youth development. Measuring the well-being of young people continues to be a challenge, even though its importance is widely recognised. The Commonwealth's youth flagship report, the Global Youth Development Index and Report, provides an evidence-based overview of the state of development for

the nearly 1.8 billion young people between the ages of 15 and 30 in the world. The Youth Development Index (YDI) is a composite index of 18 indicators that collectively measure progress on youth development in 183 countries, including 49 of the 53 Commonwealth countries. The YDI has five domains, measuring levels of education, health and well-being, employment and opportunity, political participation and civic participation among young people.

Global Youth Development Index and Report 2016 Policy Press

Changing Communities brings together policy analysis, theoretical understandings of migration and displacement, and

illustrations of the diverse ways in which communities themselves perceive these processes of change. Marjorie Mayo draws from both previous studies and her own original research to examine a range of responses, taking account of the varying possibilities, challenges, and interests involved--both within and between communities, locally and transnationally. The book highlights examples of some of the creative, cultural ways in which communities--including diaspora communities--reflect upon their experiences of change and find modes of responding and expressing their unique voices, in such art forms as poetry, storytelling, and photography.
