SANTOS ANNA

Media Review Digest SAGE Publications

Voices of Color: First Person Accounts of Ethnic Minority Therapists/strong is the first book to address the training, academic, and professional experiences of ethnic minority therapists. Using real cases, narratives, and biographical material, each chapter motivates the reader to ponder and challenge how issues related to mental health intersect with race/ethnicity within a broader diversity framework. The contributors represent various mental health disciplines, and they all write from a systemic perspective on therapy cases, theory, new models, and research. The authors present powerful narratives of how their personal and professional experiences inform each other.

Integrity, Risk and Accountability in Capital Markets Cengage Learning

Written for school leaders, this completely revised edition outlines detailed, research-based

strategies for developing high-performing schools and fostering educational equity for all students.

Nursing Supervision Macmillan Reference USA

Supervisory Management Cengage Learning

A Guide for Clinical Practice SAGE Publications

This book is aimed at proposal writers, graduate research students and project co-ordinators involved in large scale data collection and offers practical information on managing research projects.

Asian Americans Bloomsbury Publishing

Questions about the causes or sources of work stress have been the subject of considerable research, as well as public fascination, for several decades. Earlier interest in this issue focused on the question of whether some jobs are simply more inherently stressful than others. Other questions that soon emerged asked whether some individuals were more prone to stress than others. The Handbook of Work Stress focuses primarily on identifying the different sources of work stress across different contexts and individuals.

Consumers Index to Product Evaluations and Information Sources SAGE

How do technology and organization interact to shape organizational structures and processes? What organizational, political and social processes constrain technological development? What forces shape the articulation of organizational and technological systems? Answering these and other pivotal questions, this volume centres on the role of theory for advancing our knowledge of communication technology in organizations at several levels - micro, group and macro. The distinguished contributors examine richly diverse topics, including telecommunications, communication networks and new media, the use of group decision support systems and discretionary databases.

The City Record SAGE

Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking

basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.

In this volume, Schwartzman evaluates the range of ethnographic research that has been conducted on organizations. She also examines such important topics as: the roles and methods utilized by organizational ethnographers; the problems and prospects for conducting fieldwork in organizations; and the role that everyday but often overlooked routines - like meetings and story telling - play in the production and reproduction of organizations, institutions and society.

Semiannual cumulation Corwin Press

Lists citations to the National Health Planning Information Center's collection of health planning literature, government reports, and studies from May 1975 to January 1980.

Research in Education Corwin Press

`[Research for Development] is well-written and, at every stage, is well-documented with practical examples. The simplicity with which it is written adds to its value in that non-professional persons get well-acquainted with the research process. Every chapter in the book ends with highlighting of the main points made in that chapter... A further strength of the book is the inclusion of an appendix with a list of websites that deal with issues in the area of development research... the simplicity of its organization and message should appeal to people/researchers across disciplines' - Pakistan Development Review `Research for Development achieves the near impossible: it provides vast quantities of useful guidance for almost anyone involved in research for development regardless of the size of your research project or your role within that project' - Arvac Bulletin `Written by professional researchers, this immensely practical book provides development workers with a more research-oriented point of view, so that they can avoid mistakes in the design of programmes. It will also help them to understand people's needs and respond accordingly' - The Asian Age `It is a beautiful and comprehensive compilation giving scores of instances that prove the essentiality of carrying out a survey of a particular locality for bringing about a change there' - Rafique Jalal, DAWN This book provides a comprehensive introduction and handbook for undertaking and managing research in development. It is designed to provide both a quick reference manual and an indispensable learning tool for all students, researchers and practitioners engaged in development work. The text is divided into two parts: Managing research for development, and Doing research for development. Together the two parts review the complete research process from outlining the essential role and purpose of research, highlighting specific issues to development research, to demonstrating how to evaluate and secure the best results from subsequent research projects. The book includes: an overview of different types of research in development work; practical steps to writing a brief and managing research; practical steps to evaluating and promoting research findings; step by step guides to getting started and choosing a research method; detailed guidelines to seven key research techniques; examples, exercises, summaries and checklists; and glossary and guides to additional resources and packages Drawing on considerable hands-on experience, Research for Development will be an essential companion and invaluable tool for anyone engaged in contemporary development research, development work and development studies.

This paper evaluates observance of the Basel Core Principles for Effective Banking Supervision in the Russian Federation. The legal framework currently in place provides the Central Bank of Russia (CBR) with necessary powers and responsibilities. The CBR may authorize banks, conduct ongoing supervision, oversee compliance with laws, and undertake corrective action to address safety and soundness. Major new reforms increase many aspects of the CBR's duties and powers, although implementation has not yet been tested in all cases. The Russian licensing regime for banks appears exhaustive. However, the legal regime for major acquisitions was found to be weak.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Cognitive Interviewing Practice Supervisory Management

The global economy is yet to recover from the aftershocks of the Global Financial Crisis (GFC). In

particular many national economies are struggling to adjust to austerity programs that are a direct result of the toxic effects of the crisis. Governments, regulatory agencies, international organisations, media commentators, finance industry organisations and professionals, academics and affected citizens have offered partial explanations for what has occurred. Some of these actors have sought to introduce legislative and other regulatory initiatives to improve operational standards in capital markets. However, the exposure post-GFC of the scandal surrounding the manipulation over many years of the London Interbank Offered Rate (LIBOR) highlighted that the most important obstacles to counter the destructive potential of our global finance system are normative not technical. Regulating the culture of the finance sector is one of the greatest challenges facing contemporary society. This edited volume brings together leading professionals, regulators and academics with knowledge of how cultural forces shape integrity, risk and accountability in capital markets. The book will be of benefit not only to industry, regulatory and academic communities whose focus is upon financial markets and professionals. It is of value to any person or organisation interested in how the cultural underpinnings of the finance sector shape how capital markets actually operate and are regulated. It is a stark lesson of history that financial crises will occur. As national economies become ever more inter-connected and inter-dependent under conditions of global financial capitalism, it becomes ever more important to know how cultural and other normative forces might be adjusted to militate against the effects of future disasters.

The use of the cognitive interviewing method for survey question testing has proliferated and evolved over the past 30 years. In more recent years the method has been applied to the evaluation of information letters and leaflets and to research consent forms. This book provides a practical handbook for implementing cognitive interviewing methods in the context of applied social policy research, based on the approach used by the authors at the NatCen Social Research (NatCen) where cognitive interviewing methods have been used for well over a decade. The book provides a justification for the importance of question testing and evaluation and discusses the position of cognitive interviewing in relation to other questionnaire development and evaluation techniques. Throughout the book, the focus is on providing practical and hands-on guidance around elements such as sampling and recruitment, designing probes, interviewing skills, data management and analysis and how to interpret the findings and use them to improve survey questions and other documents. The book also covers cognitive interviewing in different survey modes, in cross national, cross cultural and multilingual settings and discusses some other potential uses of the method.
