Language and Intercultural Communication in the New Era

MARQUEZ CASSIDY

Sociolinguistics Routledge

A “fascinating” (The Economist) dive into the world of linguistics that is “part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time” (The New York Times Book Review). In *Babel No More*, Michael Erard, “a monolingual with benefits,” sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots’ pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?

[Redefining the Boundaries of Language Study](#) Multilingual Matters

The Handbook of Applied Linguistics is a collection of newly commissioned articles that provide a comprehensive and up-to-date picture of the field of Applied Linguistics. Provides a comprehensive and current picture of

the field of Applied Linguistics. Contains 32 newly commissioned articles that examine both the applications of linguistics to language data and the use of real world language to ameliorate social problems. Valuable resource for students and researchers in applied linguistics, language teaching, and second language acquisition. Presents applied linguistics as an independent discipline that unifies practical experience and theoretical understanding of language development and language in use.

Language and Culture Oxford University Press

The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture. It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture, and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks. This Handbook features thirty-three newly commissioned chapters which cover key areas such as cognitive psychology, cognitive linguistics, cognitive anthropology, linguistic anthropology, cultural anthropology, and sociolinguistics offer insights into the historical development, contemporary theory, research, and practice of each topic, and explore the potential future directions of the field show readers how language and culture research can be of practical benefit to applied areas of research and practice, such as intercultural communication and second language teaching and learning. Written by a group of prominent scholars from around the globe, The Routledge Handbook of Language and Culture

provides a vital resource for scholars and students working in this area.

Language and Culture John Wiley & Sons

The papers in this volume fall into five categories. After "Introduction: Making the Invisible Visible" (Claire Kramersch), Part 1, "Theoretical Boundaries," includes "The Metamorphosis of the Foreign Language Director, or: Waking Up to Theory" (Mark Webber) and "Subjects-in-Process: Revisioning TA Development through Psychoanalytic, Feminist, and Postcolonial Theory" (Linda M. von Hoene). Part 2, "Educational Boundaries," includes "Redefining the Boundaries of Language Use: The Foreign Language Classroom as a Multilingual Speech Community" (Carl Blyth), "Poetics to Pedagogy: The Imagistic Power of Language" (Hung-nin Samuel Cheung); and "A Framework for Investigating the Effectiveness of Study Abroad Programs" (Thom Huebner). Part 4, "Cultural Boundaries," includes "Using Ethnography to Bridge the Gap between Study Abroad and the On-Campus Language and Culture Curriculum" (Richard Jurasek) and "Searching for Averroes: Reflections on Why It is Desirable and Impossible to Teach Culture in Foreign Language Courses" (Nicolas Shumway). Part 5, "Language Learning Environments and Their Boundaries," includes "The Electronic Language Learning Environment" (James S. Noblitt) and "The Foreign Language Problem: The Governance of Foreign Language Teaching and Learning" (Peter C. Petrakis). (Papers contain references.) (SM).

Foreign Language Research in Cross-cultural Perspective Routledge
Contributes a collective, retrospective exploration of where the field of Applied Linguistics, as a research community,

currently is, as well as a forward-looking analysis of which future avenues are to be explored in the research methods used in the domains such as Sociolinguistics, and Second Language Acquisition.

Language and culture Springer Nature
By drawing on multiple examples of real-world language learning situations, this book explores the subjective aspects of the language learning experience.

Language, Culture, and Society Oxford University Press

Identity and Language Learning draws on a longitudinal case study of immigrant women in Canada to develop new ideas about identity, investment, and imagined communities in the field of language learning and teaching. Bonny Norton demonstrates that a poststructuralist conception of identity as multiple, a site of struggle, and subject to change across time and place is highly productive for understanding language learning. Her sociological construct of investment is an important complement to psychological theories of motivation. The implications for language teaching and teacher education are profound. Now including a new, comprehensive Introduction as well as an Afterword by Claire Kramersch, this second edition addresses the following central questions: - Under what conditions do language learners speak, listen, read and write? - How are relations of power implicated in the negotiation of identity? - How can teachers address the investments and imagined identities of learners? The book integrates research, theory, and classroom practice, and is essential reading for students, teachers and researchers in the fields of language learning and teaching, TESOL, applied linguistics and literacy.

The Multilingual Subject Routledge
 Brave New Digital Classroom examines the most effective ways to utilize technology in language learning. The author deftly interweaves the latest results of pedagogical research with descriptions of the most successful computer-assisted language learning (CALL) projects to show how to implement technology in the foreign-language curriculum to assist the second language acquisition process. This fully updated second edition includes new chapters on the latest electronic resources, including gaming and social media, and discusses the realities and potential of distance learning for second language acquisition. The author examines the web, CALL applications, and computer-mediated communication (CMC), and suggests how the new technologically assisted curriculum will work for the foreign-language curriculum. Rather than advocating new technologies as a replacement for activities that can be done equally well with traditional processes, the author envisions a radical change as teachers rethink their strategies and develop their competence in the effective use of technology in language teaching and learning. Directed at all language teachers, from the elementary school to postsecondary levels, the book is ideal for graduate-level courses on second language pedagogy. It also serves as an invaluable reference for experienced researchers, CALL developers, department chairs, and administrators.

The Multilingual Instructor OUP Oxford
 Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Since 1993, many have turned to *Language, Culture, and Society* for answers to

questions like those above because of its comprehensive coverage of all critical aspects of linguistic anthropology. This seventh edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the 21st century, such as issues of language and power, language ideology, and linguistic diasporas. Chapters on gender, race, and class also examine how language helps create - and is created by - identity. New to this edition are enhanced and updated pedagogical features, such as learning objectives, updated resources for continued learning, and the inclusion of a glossary. There is also an expanded discussion of communication online and of social media outlets and how that universe is changing how we interact. The discussion on race and ethnicity has also been expanded to include Latin- and Asian-American English vernacular.

Babel No More University of Illinois Press
 This work investigates the close relationship between language and culture. It explains key concepts such as social context and cultural authenticity, using insights from fields which includes linguistics, sociology, and anthropology.

Brave New Digital Classroom, Second Edition John Benjamins Publishing
Decolonizing Foreign Language Education interrogates current foreign language and second language education approaches that prioritize white, western thought. Edited by acclaimed critical theorist and linguist Donald Macedo, this volume includes cutting-edge work by a select group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non-standard language varieties through the reification of colonial languages. Each

chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL/ESL/EFL educators as literature or linguistic theory.

Context and Culture in Language Teaching and Learning Oxford University Press

The Routledge Handbook of Language and Intercultural Communication provides a comprehensive historical survey of language and intercultural communication studies with a critical assessment of past and present theory, research, and practice, as well as an insight into future directions. Drawing on the expertise of leading scholars from different parts of the world, this second edition offers updated chapters by returning authors and many new contributions on a broad range of topics, including reflexivity and criticality, translanguaging, and social justice in relation to intercultural communication. With an emphasis on contemporary, critical perspectives, this handbook showcases the varied range of issues, perspectives, and approaches that characterise this increasingly important field in today's globalised world. Offering 34 chapters with examples from a variety of languages and international settings, this handbook is an indispensable resource for students and scholars working in the fields of intercultural communication, applied linguistics, TESOL/ TEFL, and communication studies.

Research Methods and Approaches in Applied Linguistics John Wiley & Sons

This state-of-the-art exploration of language, culture, and identity is orchestrated through prominent

scholars' and teachers' narratives, each weaving together three elements: a personal account based on one or more memorable or critical incidents that occurred in the course of learning or using a second or foreign language; an interpretation of the incidents highlighting their impact in terms of culture, identity, and language; the connections between the experiences and observations of the author and existing literature on language, culture and identity. What makes this book stand out is the way in which authors meld traditional 'academic' approaches to inquiry with their own personalized voices. This opens a window on different ways of viewing and doing research in Applied Linguistics and TESOL. What gives the book its power is the compelling nature of the narratives themselves. Telling stories is a fundamental way of representing and making sense of the human condition. These stories unpack, in an accessible but rigorous fashion, complex socio-cultural constructs of culture, identity, the self and other, and reflexivity, and offer a way into these constructs for teachers, teachers in preparation and neophyte researchers. Contributors from around the world give the book broad and international appeal.

Language as Symbolic Power

Cambridge University Press

"What emerges from Kachru's fine work is the potential demarcation of an entire field, rather than merely the fruitful exploration of a topic. . . . [Kachru] is to be congratulated for having taken us as far as he already has and for doing so in so stimulating and so productive a fashion." -- World Englishes "A potent addition to theoretical, sociolinguistic, attitudinal and methodological explorations vis-à-vis the spread and

functions of, and innovations in, English from the viewpoint of a non-Western scholar." -- The Language Teacher Winner of the Joint First Prize, Duke of Edinburgh English Language Book Competition of the English-Speaking Union of the Commonwealth, 1987

Fostering Culture Through Film

Multilingual Matters

This book provides a comprehensive critical account of tandem learning, charting its evolution from its origins in European educational settings to modern programs offering new perspectives on the approach's role within higher education. Taking stock of the ways in which increased globalization has produced new linguistic and sociocultural realities, the volume begins by looking back at the development of tandem learning over the last several decades, growing out of a need to create more opportunities for L2 learners to communicate in their target language. The book then examines the different learning objectives and learning outcomes of tandem learning arrangements, moving toward a discussion of tandem learning's potential role in shaping language policy and the unique challenges involved in implementing tandem programs at higher education institutions. The final section of the book brings the previous discussions together to consider new tools and technology and the ways in which they can better equip language educators to implement tandem learning in their own practice. Highlighting tandem learning's potential to promote multilingual and multicultural learning on a global scale, this volume will be of particular interest to students and researchers in intercultural communication, language education, multilingualism, and applied linguistics.

Context and Culture in Language Teaching

Routledge

Language is not simply a tool for communication - symbolic power struggles underlie any speech act, discourse move, or verbal interaction, be it in face-to-face conversations, online tweets or political debates. This book provides a clear and accessible introduction to the topic of language and power from an applied linguistics perspective. It is clearly split into three sections: the power of symbolic representation, the power of symbolic action and the power to create symbolic reality. It draws upon a wide range of existing work by philosophers, sociolinguists, sociologists and applied linguists, and includes current real-world examples, to provide a fresh insight into a topic that is of particular significance and interest in the current political climate and in our increasingly digital age. The book shows the workings of language as symbolic power in educational, social, cultural and political settings and discusses ways to respond to and even resist symbolic violence.

Cultural Studies in Foreign

Language Education Routledge

This book considers the issues globalization raises for second language learning and teaching. Block and Cameron's collection shows how, in an economy based on services and information, the linguistic skills of workers becomes increasingly important. New technologies make possible new kinds of language teaching, and language becomes an economic commodity with a value in the global marketplace. This has implications for how and why people learn languages, and for which languages they learn. Drawing together the various strands of the globalization debate, this rich and

varied collection of contributions explores issues such as: *The commodification of language(s) and language skills *The use of new media and new technologies in language learning and teaching *The effects of globalization on the language teaching industry *New forms of power and resistance.

Language and Culture Oxford University Press

This edited volume addresses perspectives and prospects of English as a lingua franca (ELF) in connection with other areas of linguistics. It is the first volume that brings together ELF scholars and experts from a wide range of areas in linguistics (such as corpus linguistics, sociolinguistics, historical linguistics, language pedagogy, language policy, intercultural communication) in order to explore how ELF relates to these fields.

Language, Ideology and Education

Heinle & Heinle Publishers

This volume focuses on priorities for research in language pedagogy. The aim

is to give an up-to-date overview of current thinking about important research issues such as the viability of large scale comparisons, the quantitative/qualitative research controversy, new trends in language testing and evaluation, and the role of different learning environments. In their discussions of these issues researchers from the US and from different countries in Europe show to what extent the priorities differ on both sides of the Atlantic Ocean.

The Routledge Handbook of Language and Culture Simon and Schuster

The book presents a new theory of the relationship between language and culture in a transnational and global perspective. The fundamental view is that languages spread across cultures, and cultures spread across languages, or in other words, that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities.
