Investment Analysis 3/E Tata McGraw-Hill Education
 The book offers a basic and clear understanding of finance and accounting to non-finance professionals. It would also assist them understand the financial and accounting reports used in the business, appreciate the financial implications of their decisions, and communicate meaningfully with their colleagues in the language of accounting and finance. Salient Features: - Two new chapters: Corporate Valuation and Financial Risk Management - Four new Appendices: Frugal Innovations in Emerging Markets, Microsoft Excel as a Financial Calculator, Beta Values for Sensex Stocks and Supply Chain Management - Enhanced and updated content as per the latest financial changes
Project Management: The Managerial Process (Special Indian Edition) Tata McGraw-Hill Education
 In the current scenario, investing in the stock markets poses a significant challenge even for seasoned professionals. Not surprisingly, many students find the subject Security Analysis and Portfolio Management difficult. This book offers conceptual clarity and in-depth coverage with a student-friendly approach. Targeted at the postgraduate students of management and commerce, it is an attempt to demystify the difficult subject. The book is divided into three parts. Part I explains the Indian stock market; Part II exclusively deals with the different aspects of security analysis; Part III is devoted to portfolio analysis.
Projects McGraw-Hill Education
 The era of nineties has created a new breed of entrepreneurs whose quest for finance is unending. The lending institutions, on the other hand, have become choosy due to, among other reasons, mounting Non-performing Assets (NPAs). All this has led to increased pressure on the availability of finance to the entrepreneurs. In this setting, careful consideration of Project Appraisal and Financing holds the key to survival. Designed in this context, the book begins with explaining the project's fundamentals—features, identification, and project life cycle. It goes on to explain and analyze project formulation, appraisal of promoters and management, market appraisal, technical appraisal, financial appraisal, project report, institutional risk assessment and financing decision. The book also focuses on the concepts of project management, overruns, post-completion performance evaluation and contemporary issues like infrastructural financing, and environmental impact assessment. All through the book, the emphasis is on critical analysis and decision-making. Primarily intended for the students of MBA/PGDM/PGDBM and other allied courses such as MFC and MBE, the book will also be of immense value to the students of CA, CWA, CS, CFA, CPA and CAIIB. Besides, it will be equally

beneficial for the executive development and in-company training programmes on project appraisal and financing. Project finance executives in consulting firms and lending institutions and banks will also be benefited from the book due to its practical orientation. KEY FEATURES • Highlights the text from practitioner's perspective. • Written in a lecture mode and conversational style; classroom simulative. • Large number of illustrations, exercises and case studies. • Systematic and organized coverage of a full-fledged manufacturing project, including 10 years' financial projections integrated with the text throughout the book. Contemporary issues like infrastructure financing and environmental impact assessment. Unique pedagogical features, as explained in the 'Visual Tour of the Book' section. Chapter-wise PPTs and Solutions Manual available, on demand, for instructors adopting the book.

Financial Management McGraw-Hill Education
 This book seeks to capture the essence of modern developments in investments and provides a guided tour of the intricate and complex world of investments. Written by a highly acknowledged author and expert, this book: *Describes the characteristics of various investment alternatives available to investors *Discusses how the securities market functions *Explains the techniques used by professionals for analyzing and valuing investment alternatives *Discusses the implications of modern research in the field of investments *Explains how financial derivatives like futures and options are valued *Presents a framework for portfolio management *Provides insights into the strategies followed by the investment wizards of the world *Sensitises the reader to the pitfalls in the investment game *Offers a set of guidelines for investors with varying inclinations
Projects 7/E Projects 7/E
 Environmental change is affecting the world's agricultural productivity. This is coupled with an increase in population: according to the United Nations Department for Economic and

Social Affairs, the global population is estimated to reach 9.7 billion by 2050. Therefore, the current situation requires that we develop climate-smart technologies to improve crop productivity to sustain the ever-rising global population. Current-day farmers are introducing a considerable amount of agrochemicals to enhance crop productivity. Indiscriminate agrochemical application has altered not only the soil's physico-chemical and biological properties but also affected human health through food chain contamination. Cyanobacteria, under these changing environmental conditions, may help to resolve the problem significantly without changing the natural soil properties. In spite of their well-known stress tolerance potential, most of the cyanobacterial stress management and signaling pathways are yet to be fully characterized. Therefore, there is an urgent need to explore cyanobacterial metabolism under stress as well as their regulatory pathways to exploit them for sustainable agriculture. In recent decades, the application of cyanobacteria has attracted scientists because of uniqueness, better adaptability, and synthetic products. Diverse cyanobacterial communities with the ability to fix atmospheric nitrogen, together with their photosynthetic properties, have demonstrated their application under field conditions. Several cyanobacterial species have thus been exploited to enhance soil fertility, mitigate biotic and abiotic stress, and contamination management. Cyanobacterial Lifestyle and its Applications in Biotechnology has been designed to discuss different aspects of cyanobacterial physiology with the aim of helping to provide a better understanding of advanced cyanobacterial molecular biology and their metabolism to uncover the potential of cyanobacteria in the tailoring of stress smart crops for sustainable agriculture. Chapters include valuable information about the role of cyanobacteria in the evolution of life, cyanobacterial photosynthesis, stress-tolerant cyanobacterium, biological nitrogen fixation, circadian rhythms, genetics and molecular biology of abiotic stress responses. Summarizes various aspects of cyanobacterial research. Includes comprehensive coverage of molecular approaches for the identification of cyanobacteria and their evolution. Identifies an expanding horizon of cyanobacterial lifestyle: stress management in cyanobacteria. Examines cyanobacteria synthetic biology, genetic engineering, photosynthesis and metabolic engineering.
Project Management Tata McGraw-Hill Education
 Drawing on the experience of project managers from international pharmaceutical companies, this work reviews up-to-date strategic, operational and organizational procedures for drug development in today's competitive industry. It includes details of how target product profiles are established and used to direct drug development; and project definition and risk management, including analytical techniques and asset valuation at the project and portfolio levels.
Planning, Analysis, Selection, Financing, Implementation and

Review John Wiley & Sons

Business analysts must respond to the challenges of today's highly competitive global economy by developing practical, creative and financially sound solutions and this excellent guide gives them the necessary tools. It is also ideal for students wanting to gain university and industry qualifications. This new edition includes expanded discussions regarding gap analysis and benefits management, the impact of Agile software development and an introduction to business architecture.

Financial Management CRC Press

The thoroughly revised 2nd edition of Behavioural Finance is designed as a textbook for students of MBA and CFA Programme. It will also serve a reference book for investment practitioners and corporate finance executives. The book discusses financial decision-making and financial markets from the perspective of behavioural sciences and allied disciplines. It expounds theories of behavioural finance and explores ways and means of injecting greater rationality in financial and investment decisions making. Salient Features: • An overview of Behavioural Finance • New and updated content in chapters 2-14 • A new mini case on Behavioural Biases and Asset Allocation • 16 new Appendices such as Expectations Investing Process, Left Brain, Right Stuff, and The Paradox of Choice

Directory of Graduate Research BCS, The Chartered Institute for IT

Resource Allocation is the utilization of available resources in the system. This book focuses on development of models for 6 new, complex classes of RA problems in Supply Chain networks, focusing on bi-objectives, dynamic input data, and multiple performance measure based allocation and integrated allocation, and routing with complex constraints.

PROJECT APPRAISAL AND FINANCING Tata McGraw-Hill Education

Financial Management: Theory and Practice celebrates the 23rd Anniversary of its publication. Over these two decades, Indian business and finance have considerably changed owing to deregulation, liberalisation, privatisation, globalisation, and the ascendance of the services sector. The book has kept pace with these changes and captures the central themes and concerns of corporate financial management-making it both contemporary and comprehensive. The book seeks to: *Build understanding of the central ideas and theories of modern finance *Develop familiarity with the analytical techniques helpful in financial decision making *Furnish institutional material relevant for understanding the environment in which financial decisions are taken *Discuss the practice of financial management. McGraw-Hill Education

Projects presents the entire gamut of capital budgeting. The book discusses the key principles and techniques for evaluating capital expenditure proposals, as well as strategic, qualitative and organizational considerations impacting capital budgeting decisions. Further, it suggests ways of improving project appraisal

and capital budgeting practices, and also describes and evaluates business practices in various areas. Highlights of the seventh edition: * Substantial revision of nine chapters * Fifteen new sections * Four new mini cases * Online solutions manual and power point slides for instructors and spreadsheets for students.

Investment Banking: Concepts, Analysis & Cases Routledge
This book offers a transdisciplinary perspective on the concept of "smart villages" Written by an authoritative group of scholars, it discusses various aspects that are essential to fostering the development of successful smart villages. Presenting cutting-edge technologies, such as big data and the Internet-of-Things, and showing how they have been successfully applied to promote rural development, it also addresses important policy and sustainability issues. As such, this book offers a timely snapshot of the state-of-the-art in smart village research and practice.

Planning, Analysis, Selection, Implementation, and Review Tata McGraw-Hill Education

Projects 7/E Tata McGraw-Hill Education
Sustainable Solutions for Elemental Deficiency and Excess in Crop Plants PHI Learning Pvt. Ltd.

This handbook in two parts covers key topics of the theory of financial decision making. Some of the papers discuss real applications or case studies as well. There are a number of new papers that have never been published before especially in Part II. Part I is concerned with Decision Making Under Uncertainty. This includes subsections on Arbitrage, Utility Theory, Risk Aversion and Static Portfolio Theory, and Stochastic Dominance. Part II is concerned with Dynamic Modeling that is the transition for static decision making to multiperiod decision making. The analysis starts with Risk Measures and then discusses Dynamic Portfolio Theory, Tactical Asset Allocation and Asset-Liability Management Using Utility and Goal Based Consumption-Investment Decision Models. A comprehensive set of problems both computational and review and mind expanding with many unsolved problems are in an accompanying problems book. The handbook plus the book of problems form a very strong set of materials for PhD and Masters courses both as the main or as supplementary text in finance theory, financial decision making and portfolio theory. For researchers, it is a valuable resource being an up to date treatment of topics in the classic books on these topics by Johnathan Ingersoll in 1988, and William Ziemba and Raymond Vickson in 1975 (updated 2nd edition published in 2006).

Project Planning and Control with PERT & CPM McGraw-Hill Education

An update of a classic book in the field, Modern Portfolio Theory examines the characteristics and analysis of individual securities as well as the theory and practice of optimally combining securities into portfolios. It stresses the economic intuition behind the subject matter while presenting advanced concepts of investment analysis and portfolio management. Readers will also discover the strengths and weaknesses of modern portfolio theory as well as the latest breakthroughs.

Cases in Financial Management McGraw-Hill Education

With the deepening of financial markets and fast-paced transformation of the corporate landscape, Investment Banking as a branch of financial services has assumed high importance. Investment Banking: Concepts, Analyses and Cases has been written to provide conceptual understanding and analyses of the investment banking processes. Divided into two parts, the book covers: Part 1: Capital markets, securities and issuances, law and regulatory mechanisms, types of capital market securities and issues. Part 2: Global and Indian investment banking, major functions of a full service investment bank-underwriting, issue management, private equity, buybacks and de-listing, corporate restructuring, mergers and acquisitions.

Business Research Projects Penguin

This book covers all aspects of deficiency of essential elements and excess of toxic ones in crop plants. The metal deficiency and toxicity are the two sides of same problem that are threatening to sustainable agricultural growth. The book presents prospective strategies for the management of elemental nutrition of crop plants. Chapters are arranged in a manner so as to develop a lucid picture of the topic beginning from basics to advanced research. The content is supplemented with flow charts and figures to make it convenient for readers to holistically grasp the concepts. It will be a value addition for students, research scholars and professionals in understanding the basics as well latest developments in the area of metal deficiency and excess in crop plants.

Finance for Non-finance Executives Tata McGraw-Hill Education

Financial Management by Khan and Jain is one book in the Indian market which deals with topics following step-by-step learning approach backed by large number of solved problems. Keeping in line with the previous editions, this 8th edition brings out the explanation of theories, concepts and techniques explicitly, with more excel integration in the text. This book will be useful to both finance managers and management students. Salient Features: - Updated text aligned with new SEBI guidelines and change in CSR policies - Rich pedagogy - Excel integration-based template made available online. - Web supplements - For instructors: Lecture slides - For Students: Additional cases, solved problems, chapter end solution to numerical review questions

Text, Problems and Cases, 8e Vikas Publishing House

This book discusses the techniques of valuation and the considerations that you have to bear in mind in valuing different types of companies. It provides a bridge between the world of 'academic finance' and the 'what do we do today' world of appraisers, managers, investors, regulators, and lawyers who are involved in valuing real companies. This book is aimed at two distinct audiences: * Finance practitioners, senior managers, and investors who are involved in valuation * MBA students and professional accountants who are pursuing specialised courses in corporate valuation, such as the ones offered by the Institute of Chartered Accountants of India and the Institute of Cost and Works Accountants of India
