Pre-Employment Personality Test Questions Example If we put those answers in order, we have 3, -6, 12, 4, 20: the original sequence! Using the pattern we found in that equation, we can predict that the next number in

the sequence would be related to 20 by subtracting $(x-2)$, where x still equals 9, since in order to get 4 after 12 we had to subtract $(x-1)$ from 12. By clicking start practicing, you will find not only a personality test but also a guide which explains you the range of optimal answers for each trait.
