 Out of sight, out of mind ... Into our trash cans go dead batteries, dirty diapers, bygone burritos, broken toys, tattered socks, eight-track cassettes, scratched CDs, banana peels.... But

where do these things go next? In a country that consumes and then casts off more and more, what actually happens to the things we throw away? In Garbage Land, acclaimed science writer Elizabeth Royte leads us on the wild adventure that begins once our trash hits the bottom of the can. Along the way, we meet an odor chemist who explains why trash smells so bad; garbage fairies and recycling gurus; neighbors of massive waste dumps; CEOs making fortunes by encouraging waste or

encouraging recycling-often both at the same time; scientists trying to revive our most polluted places; fertilizer fanatics and adventurers who kayak amid sewage; paper people, steel people, aluminum people, plastic people, and even a guy who swears by recycling human waste. With a wink and a nod and a tightly clasped nose, Royte takes us on a bizarre cultural tour through slime, stench, and heat-in other words, through the back end of our ever-more supersized

lifestyles. By showing us what happens to the things we've "disposed of," Royte reminds us that our decisions about consumption and waste have a very real impact- and that unless we undertake radical change, the garbage we create will always be with us: in the air we breathe, the water we drink, and the food we consume. Radiantly written and boldly reported, *Garbage Land* is a brilliant exploration into the soiled heart of the American trash can.

The MacArthur grant-winning environmental justice activist's riveting memoir of a life fighting for a cleaner future for America's most vulnerable A Smithsonian Magazine Top Ten Best

Science Book of 2020  
Catherine Coleman  
Flowers, a 2020  
MacArthur “genius,” grew  
up in Lowndes County,  
Alabama, a place that’s  
been called “Bloody  
Lowndes” because of its  
violent, racist history.  
Once the epicenter of the  
voting rights struggle,  
today it’s Ground Zero for  
a new movement that is  
also Flowers’s life’s  
work—a fight to ensure  
human dignity through a  
right most Americans take  
for granted: basic  
sanitation. Too many  
people, especially the

rural poor, lack an  
affordable means of  
disposing cleanly of the  
waste from their toilets  
and, as a consequence,  
live amid filth. Flowers  
calls this America’s dirty  
secret. In this “powerful  
and moving book”  
(Booklist), she tells the  
story of systemic class,  
racial, and geographic  
prejudice that foster Third  
World conditions not just  
in Alabama, but across  
America, in Appalachia,  
Central California, coastal  
Florida, Alaska, the urban  
Midwest, and on Native  
American reservations in

the West. In this inspiring  
story of the evolution of  
an activist, from country  
girl to student civil rights  
organizer to  
environmental justice  
champion at Bryan  
Stevenson’s Equal Justice  
Initiative, Flowers shows  
how sanitation is  
becoming too big a  
problem to ignore as  
climate change brings  
sewage to more  
backyards—not only those  
of poor minorities.

A "riveting and

illuminating" Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don't (Yuval Noah Harari), by the Pulitzer Prize-winning author of the landmark bestseller *Guns, Germs, and Steel*. In his international bestsellers *Guns, Germs and Steel* and *Collapse*, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover

from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet Union's attack on Finland, to a murderous coup or countercoup in Chile and Indonesia, to the transformations of Germany and Austria after World War Two. Because

Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility, painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they

currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, *Upheaval* reveals factors influencing how both whole nations and individual people can respond to big challenges. The result is a book epic in scope, but also his most personal yet.

 America's largest city  
 generates garbage in  
 torrents—11,000 tons  
 from households each day

on average. But New Yorkers don't give it much attention. They leave their trash on the curb or drop it in a litter basket, and promptly forget about it. And why not? On a schedule so regular you could almost set your watch by it, someone always comes to take it away. But who, exactly, is that someone? And why is he—or she—so unknown? In *Picking Up*, the anthropologist Robin Nagle introduces us to the men and women of New York City's Department of Sanitation and makes

clear why this small army of uniformed workers is the most important labor force on the streets. Seeking to understand every aspect of the Department's mission, Nagle accompanied crews on their routes, questioned supervisors and commissioners, and listened to story after story about blizzards, hazardous wastes, and the insults of everyday New Yorkers. But the more time she spent with the DSNY, the more Nagle realized that observing wasn't quite enough—so

she joined the force herself. Driving the hulking trucks, she obtained an insider's perspective on the complex kinships, arcane rules, and obscure lingo unique to the realm of sanitation workers. Nagle chronicles New York City's four-hundred-year struggle with trash, and traces the city's waste-management efforts from a time when filth overwhelmed the streets to the far more rigorous practices of today, when the Big Apple is as clean as it's ever been.

Throughout, Nagle reveals the many unexpected ways in which sanitation workers stand between our seemingly well-ordered lives and the sea of refuse that would otherwise overwhelm us. In the process, she changes the way we understand cities—and ourselves within them.

There are infinite stories

about New York City, here are 41 in haiku form. In this love letter to his favorite city, lifelong New Yorker Peter C. Goldmark, Jr. has crafted a collection of haiku that are simultaneously nostalgic and perceptive. Touching on everything from the city's beloved landmarks to the rising costs of living and the famous lie, "There is a train directly behind this one," the poems in this book capture the true essence of this special place. Given everything New York has endured recently, this book offers

a timely celebration of a unique and wonderful city and its people—written to honor the ties and realities that bind them together. Alongside the sweet, and often funny, haiku poems, wistful illustrations help bring New York to life. From the preface by the author: "And then as 2019 and 2020 unfolded, both our country and our city came under stress. The adventure in self-government in America began to wobble seriously. And then the COVID pandemic hit. All

this made me realize how much I valued my city—its beauty, its diversity and variety, its remarkable people, its grit and resilience...and how fragile and unique it was." A portion of the proceeds supports Citizens NYC, a non-profit that helps neighborhoods work together to meet challenges like COVID.

Two political titans forge a modern city and a vibrant

public sector in this history of strong leadership at a time of national crisis. City of Ambition is a brilliant history of the New Deal and its role in the making of modern New York City. The story of a remarkable collaboration between Franklin Roosevelt and Fiorello La Guardia, this is a case study in creative political leadership in the midst of a devastating depression. Roosevelt and La Guardia were an odd couple: patrician president and immigrant mayor, fireside chat and

tabloid cartoon, pragmatic Democrat and reform Republican. But together, as leaders of America's two largest governments in the depths of the Great Depression, they fashioned a route to recovery for the nation and the master plan for a great city. Roosevelt and his "Brain Trust"—shrewd, energetic advisors such as Harold Ickes and Harry Hopkins—sought to fight the Depression by channeling federal resources through America's cities and counties. La Guardia had

replaced Tammany Hall cronies with policy experts, such as the imperious Robert Moses, who were committed to a strong public sector. The two leaders worked closely together. La Guardia had a direct line of communication with FDR and his staff, often visiting Washington carrying piles of blueprints. Roosevelt relied on the mayor as his link to the nation's cities and their needs. The combination was potent. La Guardia's Gotham became a laboratory for

New Deal reform. Roosevelt's New Deal transformed city initiatives into major programs such as the Works Progress Administration, which changed the physical face of the United States. Together they built parks, bridges, and schools; put the unemployed to work; and strengthened the Progressive vision of government as serving the public purpose. Today everyone knows the FDR Drive as a main route to La Guardia Airport. The intersection of steel and

concrete speaks to a pair of dynamic leaders whose collaboration lifted a city and a nation. Here is their story.

"As a kid growing up in Manhattan, William Helmreich played a game with his father they called "Last Stop." They would pick a subway line and ride it to its final destination, and explore the neighborhood there. Decades later, Helmreich teaches university courses about New York,

and his love for exploring the city is as strong as ever. Putting his feet to the test, he decided that the only way to truly understand New York was to walk virtually every block of all five boroughs--an astonishing 6,000 miles. His epic journey lasted four years and took him to every corner of Manhattan, Brooklyn, Queens, the Bronx, and Staten Island. Helmreich spoke with hundreds of New Yorkers from every part of the globe and from every walk of life, including Mayor Michael

Bloomberg and former mayors Rudolph Giuliani, David Dinkins, and Edward Koch. Their stories and his are the subject of this captivating and highly original book. We meet the Guyanese immigrant who grows beautiful flowers outside his modest Queens residence in order to always remember the homeland he left behind, the Brooklyn-raised grandchild of Italian immigrants who illuminates a window of his brownstone with the family's old neon grocery-

store sign, and many, many others. Helmreich draws on firsthand insights to examine essential aspects of urban social life such as ethnicity, gentrification, and the use of space. He finds that to be a New Yorker is to struggle to understand the place and to make a life that is as highly local as it is dynamically cosmopolitan."--

Growing

up in a lace-curtain Irish suburb of Boston, secretly trying on his sister's dresses and spending his evenings after school in the city's chicest boutiques, Bill dreamed of a life dedicated to fashion. But his desires were a source of shame for his family, and after dropping out of Harvard, he had to fight them tooth-and-nail to pursue his love. When he arrived in New York, he reveled in people-watching. He spent his nights at opera openings and gate-crashing extravagant balls, where

he would take note of the styles, new and old, watching how the gowns moved, how the jewels hung, how the hair laid on each head. This was his education, and the birth of the democratic and exuberant taste that he came to be famous for as a photographer for The New York Times. After two style mavens took Bill under their wing, his creativity thrived and he made a name for himself as a designer. Taking on the alias William J.--because designing under his family's name would

have been a disgrace to his parents--Bill became one of the era's most outlandish and celebrated hat designers, catering to movie stars, heiresses, and artists alike. Bill's mission was to bring happiness to the world by making women an inspiration to themselves and everyone who saw them. These were halcyon days when fashion was all he ate and drank. When he was broke and hungry he'd stroll past the store windows on Fifth Avenue and feed himself on beautiful things. Fashion

Climbing is the story of a young man striving to be the person he was born to be: a true original. But although he was one of the city's most recognized and treasured figures, Bill was also one of its most guarded. Written with his infectious joy and one-of-a-kind voice, this memoir was polished, neatly typewritten, and safely stored away in his lifetime. He held off on sharing it--and himself--until his passing. Between these covers, is an education in style, an effervescent tale of a

bohemian world as it once was, and a final gift to the York's great characters.
