Architecture and
Micropolitics deconstructs
two widespread
prejudices: that architects
nowadays are no longer
important for the overall
construction process, and
that design is a linear
process with a fully
formed architectonic

vision from the outset. Farshid Moussavi, a renowned architect and professor at the Harvard Graduate School of Design, shows how the specific character of contemporary architecture involves enriching the pragmatic aspect of creating architecture with random elements and subjective factors, which can change our circumstances and the architecture that surrounds us. Thus, the micropolitics of our everyday lives becomes the basis for our built

architecture. Moussavi illustrates this process with the help of four of her buildings from the last decade. They are presented through hundreds of photos, drawings, and sketches, and discussed in an essay, where Moussavi develops her thesis. New photos of the four buildings have been taken by the celebrated British photographer Stephen Gill, whose creative work combines documentary, experimental, and conceptual approaches. Also featuring a preface

by French philosopher Jacques Rancière, *Architecture and Micropolitics* is an astonishing book for all those who are interested in the interaction between architecture and society. Ornament Phaidon Press Do you want intricate and convoluted scrollwork for a poster or newspaper ad? Are you looking for an ornate floral design for your decoupage? Are you into collage or boxes filled with mementos from the recent, florid past? Or do you want to make Victorian greeting cards

or bookplates like those you found in your great-grandfather's books? You'll find designs for these and a multitude of other imaginative projects in this rich and impressive collection overflowing with remarkable Victorian ornament. Klimsch's exceptional quality of rendering these designs, his use of clean lines, shading, and three-dimensional effects in the most complex ornaments, is truly remarkable. He captures the Victorian love of the fantastic and exotic, of a riotous

imagination that is ultimately controlled and ordered. These examples of Victorian ornamentation are among the very best that can be found today. Florid Victorian Ornament contains more than 700 metal-engraved designs on 102 plates: borders, frames, corners, leaves, scrollwork, strapwork, rosettes, escutcheons, and cartouches in varied sizes and styles. There are floral motifs: leaves, flowers, vines, wreaths, and vases filled with incredibly ornate, ever-

spreading, ever-germinating greenery. There are intricate geometric patterns: Greek frets, interlocking circles, squares, triangles, rectangles, rococo extravagances, curlicues beyond description. And there are the perennial lions, swans, serpents, heads, hats, helmets, vegetables, innocent waifs, lovers, and healthy, overripe women. From this vivid collection commercial artists, craftspeople, and designers will find numerous designs they

can readily use in advertising and graphics work or for their own personal enjoyment. And if you are a lover of Victoriana, grab this book and revel in excess.

Textile Pages and Textile Metaphors in Early Medieval Manuscripts

The art of the object reached unparalleled heights in the medieval Islamic world, yet the intellectual dimensions of ceramics, metalwares, and other plastic arts in this milieu have not always been

acknowledged. *Arts of Allusion* reveals the object as a crucial site where pre-modern craftsmen of the eastern Mediterranean and Persianate realms engaged in fertile dialogue with poetry, literature, painting, and, perhaps most strikingly, architecture. Lanterns fashioned after miniature shrines, incense burners in the form of domed monuments, earthenware jars articulated with arches and windows, inkwells that allude to tents: through close

studies of objects from the ninth to the thirteenth centuries, this book reveals that allusions to architecture abound across media in the portable arts of the medieval Islamic world. *Arts of Allusion* draws upon a broad range of material evidence as well as medieval texts to locate its subjects in a cultural landscape where the material, visual, and verbal realms were intertwined. Moving far beyond the initial identification of architectural types with

their miniature counterparts in the plastic arts, Margaret Graves develops a series of new frameworks for exploring the intelligent art of the allusive object. These address materiality, representation, and perception, and examine contemporary literary and poetic paradigms of metaphor, description, and indirect reference as tools for approaching the plastic arts. Arguing for the role of the intellect in the applied arts and for the communicative potential of ornament,

Arts of Allusion asserts the reinstatement of craftsmanship into Islamic intellectual history. *Ornament, Fantasy, and Desire in Nineteenth-Century French Literature* Actar
Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the

course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülrü Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also

compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the

individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault.

The Function of Ornament Routledge Ornament is currently acquiring a renewed status in architecture. As contemporary technologies of design and fabrication introduce unprecedented opportunities to intertwine

the constructive logics and expressive articulations of buildings, ornament has re-emerged as a means to explore the interactions between function and decoration, volume and surface, structure and envelope. This book gives a systematic account of the technologies employed in the production of ornament and the strategies of its application today, examining a range of international built examples. Architects with particularly advanced

approaches to the question of ornament contribute reports and reflections on their experiences: Sam Jacob of Fashion Architecture Taste (FAT), London; Andreas Hild of Hild und K Architekten, Munich; and Alejandro Zaera-Polo of Foreign Office Architects (FOA), London.

A graphic guide to the tangible and intangible ways in which architecture conveys unique cultural themes surveys 20th-century ornaments, challenging the idea that architectural ornament is applied as a non-essential entity while explaining how it enables interiors and exteriors to complement each other.

Along with plan and elevation, section is one of the essential representational techniques of

architectural design; among architects and educators, debates about a project's section are common and often intense. Until now, however, there has been no framework to describe or evaluate it. *Manual of Section* fills this void. Paul Lewis, Marc Tsurumaki, and David J. Lewis have developed seven categories of section, revealed in structures ranging from simple one-story buildings to complex structures featuring stacked forms, fantastical shapes, internal holes,

inclines, sheared planes, nested forms, or combinations thereof. To illustrate these categories, the authors construct sixty-three intricately detailed cross-section perspective drawings of built projects—many of the most significant structures in international architecture from the last one hundred years—based on extensive archival research. *Manual of Section* also includes smart and accessible essays on the history and

uses of section. *Geometry and Ornament in Islamic Architecture* Actar/birkhauser
When a beloved ornament breaks, will it ruin the holidays or save them? New York Times bestselling author and Caldecott Honor-winning illustrator Tony DiTerlizzi offers a brand-new Christmas story that is sure to be a holiday classic. Jack wants this to be the best Christmas ever, and he knows just how to make it happen... More! More lights, more presents, more cookies,

more treats. More. More. More! So, when Jack breaks a dusty old ornament, he's not sure why his mom is so upset. They can always get more ornaments, so what's the big deal? Turns out the ornament was an heirloom, precious for more reasons than one. And Jack has a lot to learn about the true meaning of Christmas. A fairy emerges from the shattered ornament. She has the power to make the most magical Christmasy things happen. Suddenly trees

are sprouting, reindeer are flying, and snowmen are snowball fighting. All of it is so perfect, or it would be if she could fix Mom's ornament. But she can't. So it's up to Jack to make some Christmas magic of his own.

An unprecedented homage to modernist architecture from the 1920s up to the present day Ornament Is Crime is a celebration and a thought-provoking reappraisal of modernist architecture. The book

proposes that modernism need no longer be confined by traditional definitions, and can be seen in both the iconic works of the modernist canon by Le Corbusier, Mies van der Rohe, and Walter Gropius, as well as in the work of some of the best contemporary architects of the twenty-first century. This book is a visual manifesto and a celebration of the most important architectural movement in modern history.

The ornament is back in architecture, but now on the scale of the building as a whole. One letter out of the alphabet, a pile of pebbles or a national emblem - the diversity of forms the new architecture can take seems infinite. In this book, Michiel van Raaij, in ten interviews, investigates how this new architecture emerged in the late 1990s and how it developed at the start of the twenty-first century. A new generation of architects sees the design of the upscaled ornament

as an inextricable element of their practice. What are their motivations? How do they place their ideas in the tradition of their age-old profession? Michiel van Raaij argues that the design of the ornament, the iconography of the building, is bound by certain rules. A successful ornament represents a virtue and clarifies the function, status, construction, organization and context of the building.

Modernist Architecture

The Function of Ornament
Over the last forty years, graffiti and street-art have become a global phenomenon within the visual arts. Whilst they have increasingly been taken seriously by the art establishment (or perhaps the art market), their academic and popular examination still remains within old debates which argue over whether these acts are vandalism or art,

and which examine the role of graffiti in gang culture and in terms of visual pollution. Based on an in-depth ethnographic study working with some of the world's most influential Independent Public Artists, this book takes a completely new approach. Placing these illicit aesthetic practices within a broader historical, political, and aesthetic context, it argues that they are in fact both intrinsically ornamental (working within a classic architectonic framework),

as well as innately ordered (within a highly ritualized, performative structure). Rather than disharmonic, destructive forms, rather than ones solely working within the dynamics of the market, these insurgent images are seen to reface rather than deface the city, operating within a modality of contemporary civic ritual. The book is divided into two main sections, Ornament and Order. Ornament focuses upon the physical artifacts themselves, the various meanings these public

artists ascribe to their images as well as the tensions and communicative schemata emerging out of their material form. Using two very different understandings of political action, it places these illicit icons within the wider theoretical debate over the public sphere that they materially represent. Order is focused more closely on the ephemeral trace of these spatial acts, the explicitly performative, practice-based elements of their aesthetic production.

Exploring thematics such as carnival and play, risk and creativity, it tracks how the very residue of this cultural production structures and shapes the socio-ethico guidelines of these artists' lifeworlds.
