Different Types of Information System and the Pyramid Model

Business Driven
Information Systems
2e Why are there different
types of Information
System? In the early days

of computing, each time
an information system
was needed it was 'tailor
made' - built as a one-off
solution for a particular
problem. However, it soon
became apparent that
many of the problems
information systems set
out to solve shared
certain
characteristics. Different
Types of Information
System and the Pyramid

Model Information system
- Information system -
Acquiring information
systems and services:
Information systems are a
major corporate asset,
with respect both to the
benefits they provide and
to their high costs.
Therefore, organizations
have to plan for the long
term when acquiring
information systems and
services that will support

business initiatives. Acquiring information systems and services -
 Britannica Business Driver: A business driver is a resource, process or condition that is vital for the continued success and growth of a business. A company must identify its business drivers and attempt to maximize any that are under their control.
