Welcome to the Boss Dogg's Kitchen The first cookbook and recipe book from The Dogg: You've seen Snoop work his culinary magic on VH1's Emmy-nominated Martha and Snoop's Potluck Dinner Party, and now, The Dogg's up in your kitchen...with his first cookbook. Recipe book that delivers 50 recipes straight from Snoop's own collection: Snoop's cookbook features OG staples like Baked Mac & Cheese and Fried Bologna Sandwiches with Chips, and new takes on classic weeknight faves like Soft Flour Tacos and Easy Orange Chicken. And it don't stop...Snoop's giving a taste of the high life with remixes on upper echelon fare such as Lobster Thermidor and Filet Mignon. But we gotta keep it G with those favorite munchies too, ya know? From chewy Starbursts to those glorious Frito BBQ Twists, you should have an arsenal of snacks that'll satisfy. And of course, no party is complete without that Gin and Juice and other platinum ways to entertain. If you're a fan of celebrity cookbooks such as Bob's Burgers, Magnolia Table Cookbook, Margaritaville cookbook, or the Gilmore Girls Eat Like a Gilmore; the Doggfather's got you covered – complete with epic stories and behind-the-scenes photos that bring his masterpieces to life.

Presents thirty-three tips on personal and business success gleaned from the experiences and wisdom of John Patterson, founder of the National Cash Register Company.

Business Review Weekly Chronicle Books

Platinum Bomb, the first installment in the Klak Jatan Adventure Series, is the story of a swashbuckling, intergalactic smuggler, Klak Jatan and the savvy crew of the Starship Marauder. Klak is a carefree guy, spending his time in pursuit of the interplanetary currency of choice, platinum. When his mother is killed during a terroristic plot, Klak becomes consumed with the desire for revenge. In the end, for Klak to destroy the one most responsible, he must decide to destroy something even more dear to him than platinum itself.

The Basic Business Library Springer

Science & Business Media Study & Master Social Sciences has been specially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). The comprehensive Learner's Book: * provides activities that develop learners' skills and understanding of each of the modules specified by the CAPS curriculum * includes good-quality illustrations, photographs and diagrams in full colour * offers current and relevant content clearly set out according to the curriculum document. The innovative Teacher's Guide includes: * step-by-step guidance on the teaching of each lesson and activity as well as each form of assessment * Remedial and Extension activities for each module * bright ideas to extend the curriculum into the world outside the classroom * a complete section on Formal Assessment, with sample examinations and their memoranda as well as photocopiable record sheets and templates.

Part II Springer Science & Business Media

In this entertaining and thought-provoking book, Tony Alessandra and Michael O'Connor argue that the "Golden Rule" is not always the best way to approach people. Rather, they propose the Platinum Rule: "Do unto others as they'd like done unto them". In other words, find out what makes people tick and go from there.

Platinum Coordination Complexes in Cancer Chemotherapy Hodder Education Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences.

Colorectal Cancer Macmillan "A comprehensive introduction to economics in general; set against a contemporary South African background. Covers all the material usually prescribed for introductory courses and lays a solid foundation for intermediate and advanced studies. Includes new In the real world inserts by 24 experts in various fields of economics as well as a bonus chapter online. Aimed at economics students."--Publisher's website

Springer Science & Business Media The rapid growth in the number of options available for the management of colorectal cancer presents the clinician with new opportunities and new complexities. An explosion of understanding in the basic science that underlies both the disease and its potential therapies has translated into remarkable technological advances that can now be applied. So many specialties and subspecialties have now been brought to bear that it is appropriate to attempt to bring the expertise from these areas together in one volume, so that practitioners in one aspect of colorectal cancer management can maintain knowledge and expertise regarding the capabilities of other colleagues working in this disease. *Colorectal Cancer: Multimodality Management* provides a concise, focused, and current review of the methodological and technological advances that have recently occurred in the management of colorectal cancer. The book has been divided into six basic parts. The first part, dealing with epidemiology and prevention, focuses on the molecular genetic events that occur in the development of colorectal cancer, as well as on our understanding of dietary and environmental factors, and

possible strategies for prevention. Part II focuses on both diagnostic and therapeutic radiology in the management of colorectal cancer, dealing with innumerable advances in imaging, and with the progress in the science and art of radiation therapy. The third section deals with the surgical aspects of management of colorectal cancer, starting with surgical pathology.

The Platinum Dragon Ft Press

The idea for convening a Fourth International Symposium on Platinum Coordination Complexes in Cancer Chemotherapy was born in an assembly of researchers from the Vermont Regional Cancer Center and the Norris Cotton Cancer Center who shared a common interest in metal complexes. It was agreed by those assembled that sufficient time had passed since the Third International Symposium on Platinum Coordination Complexes in Cancer Chemotherapy held in 1976 at the Wadley Institutes of Molecular Medicine in Dallas, Texas, during which several advances in the chemistry, biochemistry, pharmacology and clinical use of platinum complexes had occurred, to warrant a fourth symposium. Furthermore, intensive investigations in progress were bringing sophisticated methodologies to bear on the problems in the field, clinical trials were yielding interesting results, and unique approaches to cancer therapy were being designed. Therefore, an organizing committee was formed and planning culminated in the symposium which was held in Burlington, Vermont, June 22-24, 1983.

It was a great pleasure and honour to have been invited to attend this Seminar and to present a final impression. The

association in this field between the Chester Beatty Research Institute and Dr. Rosenberg's School at East Lansing is something which I specially value and many would doubtless like to know how it came about. In the course of its work in carcinogenesis and on chemotherapy over many years, the Chester Beatty Research Institute was frequently drawn to the importance of many metals - as for example lead, iron, metalloid arsenic and the metalloid qualities of the carcinogenic hydrocarbons. Interest started in platinum many years ago, following the possibility, claimed by others, that various complexes between the metal and mercaptopurine might possess significant chemotherapeutic properties. Various attempts to confirm such findings ended, however, in complete failure. Interest in platinum was revived by the fresh observations of Dr. Rosenberg and his colleagues, and here the outcome was entirely different. Very soon it was possible to confirm the intense growth-inhibitory properties of cis-platinum (II) diamminedichloride and related substances. After communicating these results to Dr. Rosenberg, it was a pleasure to welcome him in London where he gave a Seminar which greatly engaged the interest of many of the staff. Later, several of these were to enjoy Dr. Rosenberg's hospitality at an international conference on the subject to be held in East Lansing, where many rapidly developing aspects were open for discussion.

Students Springer Science & Business Media

"Among the Golden at Emory high, Lilah Covington is Platinum - the hottest of the hot. She's popular, beautiful, and much smarter than she looks. But most importantly to Lilah, she's in complete

control of her own destiny - if only someone would tell that to the mysterious ghost boy roaming the halls. Ever since Lissy and Lexie James arrived in town, Lilah's perfect world has been coming unhinged. No-one else can see the ghost who's trailing her around campus, and - forget the rumour mill - her memories have her more sidetracked than any gossip could. It looks as if the James family legacy of supernatural sight might be contagious. And to make matters worse, mutiny is brewing among the Goldens, and if Lilah isn't careful, she may just lose her top-tier boyfriend to her second-in-command. Lilah knows the rules better than anyone, but between her newfound visions, an absolutely fatal attraction to a boy who isn't real, and the threat of a supernatural enemy with a sting deadlier than any Queen Bee, it's going to take everything Lilah has to stay on top at Emory. And to prove once and for all that those who make the rules are the only ones who can break them."

An "elegantly argued and exuberantly narrated" (The New York Times Book Review) look at the building of social movements—from the 1600s to the present—and how current technology is undermining them "A bravura work of scholarship and reporting, featuring amazing individuals and dramatic events from seventeenth-century France to Rome, Moscow, Cairo, and contemporary Minneapolis."—Louis Menand, author of *The Free World* We tend to think of revolutions as loud: frustrations and demands shouted in the streets. But the ideas fueling them have traditionally been conceived in much quieter spaces, in the small, secluded corners where a vanguard can whisper among themselves, imagine alternate realities,

and deliberate about how to achieve their goals. This extraordinary book is a search for those spaces, over centuries and across continents, and a warning that—in a world dominated by social media—they might soon go extinct. Gal Beckerman, an editor at The New York Times Book Review, takes us back to the seventeenth century, to the correspondence that jump-started the scientific revolution, and then forward through time to examine engines of social change: the petitions that secured the right to vote in 1830s Britain, the zines that gave voice to women's rage in the early 1990s, and even the messaging apps used by epidemiologists fighting the pandemic in the shadow of an inept administration. In each case, Beckerman shows that our most defining social movements—from decolonization to feminism—were formed in quiet, closed networks that allowed a small group to incubate their ideas before broadcasting them widely. But Facebook and Twitter are replacing these productive, private spaces, to the detriment of activists around the world. Why did the Arab Spring fall apart? Why did Occupy Wall Street never gain traction? Has Black Lives Matter lived up to its full potential? Beckerman reveals what this new social media ecosystem lacks—everything from patience to focus—and offers a recipe for growing radical ideas again. Lyrical and profound, *The Quiet Before* looks to the past to help us imagine a different future.

English in Context Random House Australia

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics,

entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Over the past two decades a number of attempts have been made, with varying degrees of success, to collect in a single treatise available information on the basic and applied pharmacology and biochemical mechanism of action of antineoplastic and immunosuppressive agents. The logarithmic growth of knowledge in this field has made it progressively more difficult to do justice to all aspects of this topic, and it is possible that the present handbook, more than four years in preparation, may be the last attempt to survey in a single volume the entire field of drugs employed in cancer chemotherapy and immunosuppression. Even in the present instance, it has proved necessary for practical reasons to publish the material in two parts, although the plan of the work constitutes, at least in the editors' view, a single integrated treatment of this research area. A number of factors

have contributed to the continuous expansion of research in the areas of cancer chemotherapy and immunosuppression. Active compounds have been emerging at ever-increasing rates from experimental tumor screening systems maintained by a variety of private and governmental laboratories through out the world. At the molecular level, knowledge of the modes of action of established agents has continued to expand, and has permitted rational drug design to play a significantly greater role in a process which, in its early years, depended almost completely upon empirical and fortuitous observations.

A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...
