System - The Biology CornerThe
digestive system is made up by the
alimentary canal, or the digestive tract,
and other abdominal organs that play a
part in digestion such as the liver and
the pancreas. The alimentary canal is
the long tube of organs that runs from*

the mouth (where the food enters) to the
anus (where indigestible waste
leaves).Human Physiology/The
gastrointestinal system - Wikibooks
...Digestive. The largest parts of the
digestive system include: Esophagus: A
hollow tubular organ in the neck and
chest area that connects the mouth to
the stomach. Muscles here propel food
to the stomach. Stomach: A large organ
that holds and digests food through a
cocktail of enzymes and acids. Food
remains here for two to eight
hours.Digestive System Anatomy, Area,
