HARRINGTON SELAH

Liberal Criminal Theory SAGE

Publications

Victims of crime are now the subjects of intense policy attention and reform across most developed nations, whilst also receiving sustained attention at the highest levels of the United Nations, the Council of Europe, and many other transnational organizations. Such moves have been fostered by the continued development of the international victims' movement and driven by a host of complex and interacting drivers which span jurisdictions. This volume sets out to contrast and compare the development of policies related to victims of crime and their place within the criminal justice systems in nine separate jurisdictions (the USA, the Netherlands, England and Wales, Scotland, the Republic of Ireland, Australia, New Zealand, Canada and South Africa). Based on first hand interviews with those responsible for formulating such policies, as well as detailed grounded and document analysis across these jurisdictions, this book exposes the national and transnational policy networks surrounding victims of crime and, in particular, examines how the provision of victim care is becoming globalized. In so doing, it represents a rare comparative evaluation of the underlying rationales and influences which have influenced the creation of such policies and places them in their true global context.

Victimology Routledge

In this work, Upasana Borah examines the political, social and religious factors

that have determined the position of women in society. The author, recognising these issues, argues for equality, empowerment and emancipation of women, both in the public and private spheres. The author has critically examined and discussed in the work the following issues, among others: 1. Women's rights under the Constitution—mainly equality, dignity and to be free from discrimination 2. Her right to maintenance under the personal laws of each religious group and the Criminal Procedure Code 3. Offences against women, including, sexual harassment of women at workplace 4. Emerging issues defining the position of women. The book will be of immense use to academics, students and legal practitioners in the fields of feminist jurisprudence, discrimination law, human rights law and constitutional law, labour law and family law. It will also be of interest to social activists, NGOs, etc.

SAGE

Crime Victims Theory, Policy and Practice Macmillan International Higher Education

Victims, Atrocity and International Criminal Justice Cambridge Scholars Publishing

This new textbook will provide students of criminology with a better understanding of criminal justice policy and, in doing so, offers a framework for analysing the social, economic and political processes that shape its creation. The book adopts a policy-oriented approach to criminal justice, connecting the study of criminology to the wider study of British government, public administration and politics. Throughout the book the focus is on key debates and competing perspectives on how policy decisions are made. Recognising that contemporary criminal

justice policymakers operate in a highly politicised, public arena under the gaze of an ever-increasing variety of groups, organisations and individuals who have a stake in a particular policy issue, the book explores how and why these people seek to influence policymaking. It also recognises that criminal policy differs from other areas of public policy, as policy decisions affect the liberty and freedoms of citizens. Throughout, key ideas and debates are linked to wider sociology, criminology and social policy theory. Key features include: a foreword by Tim Newburn, leading criminologist and author of *Criminology* (2nd Edition, 2013), a critical and informed analysis of the concepts, ideas and institutional practices that shape criminal justice policy making, an exploration of the relationship between criminal justice and wider social policy, a critical analysis of the debate about how and why behaviour becomes defined as requiring a criminal justice solution, a range of case studies, tasks, seminar questions and suggested further readings to keep the student engaged. This text is perfect for students taking modules in criminology; criminal justice; and social and public policy, as well as those taking courses on criminal and administrative law.

Victimology Springer Nature

This book offers a comprehensive examination of the many forms of victimization of immigrants, including trafficking in persons for sexual exploitation and forced labor; assaulting, robbing and raping; refusing to pay wages; renting illegal living space that violates health codes; and domestic abuse both in general, and in particular, of mail-order brides. McDonald examines a broad range of quantitative and qualitative data from historical and

international sources including the USA, Canada, Mexico, Britain, Australia, France, Germany, Italy, Sweden, the Netherlands, Switzerland, Austria, Poland, and Spain. He writes with a view to correcting myths about the relationship between immigrants and crime, noting that immigrants are more likely to become victims than offenders. The book outlines the multiple forms and contexts in which immigrants are victimized, exploited, and harmed. Reviewing micro- and macro-level victimological and sociological theories as they apply to patterns and forms of immigrants' victimization, this study ultimately seeks to understand reasons for which immigrants are victimized by their own kind, and by persons outside their community.

International Contexts, Local Experiences Routledge

In recent times, the idea of 'victims' rights' has come to feature prominently in political, criminological and legal discourse, as well as being subject to regular media comment. The concept nevertheless remains inherently elusive, and there is still considerable ambiguity as to the origin and substance of such rights. This monograph deconstructs the nature and scope of the rights of victims of crime against the backdrop of an emerging international consensus on how victims ought to be treated and the role they ought to play. The essence of such rights is ascertained not only by surveying the plethora of international standards which deal specifically with crime victims, but also by considering the potential cross-applicability of standards relating to victims of abuse of power, with whom they have much in common. In this book Jonathan Doak considers the parameters of a number of key rights which international standards

suggest victims ought to be entitled to. He then proceeds to ask whether victims are able to rely upon such rights within a domestic criminal justice system characterised by structures, processes and values which are inherently exclusionary, adversarial and punitive in nature.

Victimology Springer

This book is a comprehensive and critical introduction to the field of gender and crime, re-thinking the key themes and debates within a human rights framework. Integrating empirical, theoretical and policy-related material, this Second Edition has been significantly updated, and now includes; Full consideration of the 2010-2015 Coalition Government and its effect on gender and crime within England and Wales A new chapter relating criminological theory to gender and crime A new chapter discussing the history of gender and crime A new chapter analysing contemporary issues in gender and crime in a globalised world Fully updated learning features including; Chapter Overviews, Key Words, Study Questions, Chapter Summaries, Key Further Readings and a Glossary. *Gender and Crime: A Human Rights Approach* is essential reading for students studying criminology, sociology, social policy and gender studies.

Justice for Victims before the International Criminal Court

Routledge

We now live in a world which thinks through the legislative implications of criminal justice with one eye on human rights. *Human Rights and the Criminal Justice System* provides comprehensive coverage of human rights as it relates to the contemporary criminal justice system. As well as being a significant

aspect of international governance and global justice, Amatrudo and Blake argue here that human rights have also eclipsed the rhetoric of religion in contemporary moral discussion. This book explores topics such as terrorism, race, and the rights of prisoners, as well as existing legal structures, court practices, and the developing literature in Criminology, Law and Political Science, in order to critically review the relationship between the developing body of human rights theory and practice, and the criminal justice system. This book will be of considerable interest to those with academic concerns in this area; as well as providing an accessible, yet sophisticated, resource for upper level undergraduate and postgraduate human rights courses.

Justice for Victims Routledge

In a world of growing interdependence, crimes are no longer confined by national boundaries. In this context, the necessity to understand criminological developments across the globe becomes imperative. This book aims to offer cross-cultural perspectives of different criminological issues and criminal justice systems operating worldwide. This book emphasizes the collective understanding of criminological problems from an international perspective. This book is a quintessence of contemporary criminological developments, with a global outlook. The book is an edited volume of articles collected from criminologists all over the world. It is a peer reviewed collection. The chapters focuses on various criminological issues such as Bullying, Child abuse, Corrections (Institutional and Community), Cyber crimes, Corporate crime, Corruption, Costs of crime, Crime Analysis, Crime prevention, Crime Mapping and GIS, Criminal justice

systems, Environmental crime, Ethnic/communal/caste conflicts, Family violence, Fear of crime, High tech crimes, Homicide, Human trafficking, Juvenile Delinquency, Organized crime, Offenders including women offenders, Policing, Prisons, Public attitudes, Restorative justice, Sexual assault, Stalking, Theories of crime, Transnational crime, Victimology, Violence, White collar crime, and Workplace violence. The book aims to provide theoretical frameworks and pragmatic discussions on Criminology and Criminal Justice. It is intended for Academics, Criminal Justice professionals, and Graduate Students who want to improve their understanding of the issues and challenges that arise when issues related to criminology and criminal justice cross national boundaries. Also, practitioners and academics of allied fields like sociology, psychology, geography, political science, public administration and forensic sciences whose research interests include either crime/criminal justice system/Victim or crime analysis will find this book useful. "The comprehensive framework of this book means that it provides a rich variety of international perspectives on an array of crime and justice-related issues. The thirty chapters presented here are a treasure trove of insights in terms of both topical variety and approaches within topic. Dr. Jaishankar has assembled a valuable collection of readings that will find broad acceptance internationally." Prof. Keith Harries (From the Foreword)

The victim in the Irish criminal process
Routledge

From white-collar to environmental crime, and hate crime to sexual violence, the study of victims and of the processes

of victimisation is indispensable to understanding the full scale of the effects of crime in society. In this book, Basia Spalek offers a theoretically detailed and empirically rich account of how victimology has developed into a field that transcends academic disciplines and brings together researchers, practitioners, activists and community members. This second edition of *Crime Victims* continues to be a comprehensive and up-to-date overview of the historical, social, political and cultural issues and trends in approaches to victims and victimisation. It introduces victimological theory, explores the impacts of crime on victims, and the challenges involved in developing victim support services. In addition, acknowledging the increasing recognition of trauma as central to understanding victimisation, it includes a therapeutic toolkit for victims, offenders and practitioners working in and with the criminal justice system. With Cutting Edge Research and Case Study sections added at the end of each chapter to highlight victimology as a vibrant and continuously developing field, *Crime Victims* is an essential resource to a broad audience, ranging from students of victimology, criminology and sociology to practitioners and professionals.

New Empirical Data, Theories and Analyses
Routledge

Although the public interest in criminal predators is extensive, the criminology of criminal predators is fragmented. *Violent Offenders: Theory, Research, Policy and Practice, Second Edition* aims to demystify the many different types of violent offenders we hear about in the media. This newly revised and updated Second Edition is a compilation of original scholarship from an international collection of applied and academic

criminologists. Based not only on history and academic research but also on the experiences of author Peter Conis as a 25 year veteran of law enforcement, it provides students with a realistic view of why people commit violent crimes and how our criminal justice system, as a whole, responds to these offenders and these violent acts. It contains cutting-edge material on the broad category of criminal predators, including homicide offenders, sex offenders, financial predators, and conventional street criminals. Unlike other texts on the subject that narrowly focus on one type of criminal (e.g., serial killers), this updated Second Edition illustrates the systemic importance of predation in antisocial behavior. This book is divided into two parts; part one covers the theoretical and disciplinary foundations of the study of violent behavior, spanning the disciplines of sociology, psychology, biology, and neuroscience. Part two covers the policy and practice of responding to violent offenders from the insightful perspectives of people who work among them on a daily basis. New and Key Features of the Second Edition:

- Contains 10 NEW chapters (5 in theory and research and 5 in policy and practice). These additions provide greater overall coverage of sociological theory, evolutionary psychology theory, and female offenders. The section on policy and practice is organized to be consistent with the criminal justice system, from law enforcement through the courts, to corrections.
- Hands-on research and practitioner expertise illustrate today's study of criminal predation
- Provides clear explanations of how criminological theory relates to the formation of a criminal offender to help students understand the reasons behind a person's violent actions

Instructor Resources: - Test Bank - Lecture Outline (Word doc.) - PowerPoint Lecture Outlines

Victims and Restorative Justice

Routledge

This book covers the scope of crime victims' suffering in the U.S., offering a history of victims and the measurement of victimization, an explanation of the victim's role in the criminal justice process, and a recounting of the issues crime victims face as a result of crime and the criminal justice process. Doerner and Lab, both well-regarded scholars, write compellingly about how the current criminal's justice system can be transformed into a victim's justice system. Theory is woven together with the description of each topic, and specific examples illustrate each point. The book goes on to address the full impact of victimization, and a final section details specific types of victimization, ranging from violent crimes, including child and elder abuse, to property crime, to crime in the school and in the workplace. The authors explain how obstacles hinder the pursuit of justice, and provide significant policy and programming suggestions to render the system more victim-friendly. Appropriate for undergraduate as well as early graduate students in Victimology courses in Criminology, Criminal Justice, Sociology, and Justice Studies programs, this book offers rich pedagogical features and online student resources as well as test bank, PowerPoint lecture slides, and sample syllabus for instructors.

Policing and Psychology Routledge

In recent years far more attention has been paid to victims of crime both in terms of awareness of the effect of crime upon their lives, and in changes that have been made to the criminal justice

system to improve their rights and treatment. This process seems set to continue, with legislative plans announced to rebalance the criminal justice system in favour of the victim. This latest book in the Cambridge Criminal Justice Series brings together leading authorities in the field to review the role of the victim in the criminal justice system in the context of these developments.

Perspectives on rights, transition and reconciliation Routledge

The study of criminal victimisation has developed to the stage where by victimology is now regarded as a central component to the study of crime and criminology. This focus of concern has been matched by the growth and development of support services for the victim of crime alongside increasing political concern with similar issues. The central purpose of this book is to bring together leading scholars to produce an authoritative handbook on victims and victimology that gives due consideration to these developments. It will be concerned to reflect contemporary academic, policy, and political debates on the nature, extent and impact of criminal victimisation and policy responses to it. This book provides a overview of the importance of the role of the victim in the criminal justice system, with an analysis of the different theoretical perspectives within victimology. explores the relationship between victimisation and feminism with particular focus on domestic and sexual violence. analyses criminal justice policy and service delivery in relation to victims of crime, looking at developments within the UK and international perspectives. This handbook will be fundamental reading for students and academics studying victims and victimology and an

essential reference tool for those working within the victim support environment.

Human Rights and the Criminal Justice System Springer

Many prosecutors and commentators have praised the victim provisions at the International Criminal Court (ICC) as 'justice for victims', which for the first time include participation, protection and reparations. This book critically examines the role of victims in international criminal justice, drawing from human rights, victimology, and best practices in transitional justice. Drawing on field research in Northern Uganda, Luke Moffet explores the nature of international crimes and assesses the role of victims in the proceedings of the ICC, paying particular attention to their recognition, participation, reparations and protection. The book argues that because of the criminal nature and structural limitations of the ICC, justice for victims is symbolic, requiring State Parties to complement the work of the Court to address victims' needs. In advancing an innovative theory of justice for victims, and in offering solutions to current challenges, the book will be of great interest and use to academics, practitioners and students engaged in victimology, the ICC, transitional justice, or reparations.

Lessons from Cambodia ABC-CLIO

Justice for Victims brings together the world's leading scholars in the fields of study surrounding victimization in a pioneering international collection. This book focuses on the current study of victims of crime, combining both legal and social-scientific perspectives, articulating both in new directions and questioning whether victims really do have more rights in our modern world. This book offers an interdisciplinary

approach, covering large-scale (political) victimization, terrorist victimization, sexual victimization and routine victimization. Split into three sections, this book provides in-depth coverage of: victims' rights, transitional justice and victims' perspectives, and trauma, resilience and justice. Victims' rights are conceptualised in the human rights framework and discussed in relation to supranational, international and regional policies. The transitional justice section covers victims of war from those caught between peace and justice, as well as post-conflict justice. The final section focuses on post-traumatic stress, connecting psychological and anthropological perceptions in analysing collective violence, mass victimization and trauma. This book addresses challenging and new issues in the field of victimology and the study of transitional and restorative justice. As such, it will be of interest to researchers, practitioners and students interested in the fields of victimology, transitional justice, restorative justice and trauma work.

Handbook of Victims and Victimology

Wolters Kluwer

This book celebrates Andreas (Andrew) von Hirsch's pioneering contributions to liberal criminal theory. He is particularly noted for reinvigorating desert-based theories of punishment, for his development of principled normative constraints on the enactment of criminal laws, and for helping to bridge the gap between Anglo-American and German criminal law scholarship. Underpinning his work is a deep commitment to a liberal vision of the state. This collection brings together a distinguished group of international authors, who pay tribute to von Hirsch by engaging with topics on which he himself has focused. The essays range across sentencing theory,

questions of criminalisation, and the relation between criminal law and the authority of the state. Together, they articulate and defend the ideal of a liberal criminal justice system, and present a fitting accolade to Andreas von Hirsch's scholarly life.

The Criminal Victimization of Immigrants Manchester University Press

This book explores the ways in which criminological methods can be imaginatively deployed and developed in a world increasingly characterized by the blurred nature of social reality. Whilst recognizing the importance of positivist approaches and research techniques, it advocates a commitment to understanding the ways in which those techniques can be used imaginatively, at times in combination with less conventional methods, discussing the questions concerning risk, ethics and access that arise as a result. Giving voice to cutting edge research practices both in terms of concepts and methods that shift the criminological focus towards the kind of imaginative work that comprised the foundations of the discipline, it calls into question the utility and credentials of mainstream work that fails to serve the discipline itself or the policy questions allied to it. A call not to 'give up on numbers' but also not to be defined by statistics and the methods that produce them, *Liquid Criminology* sheds light on a way of doing research for criminology that is not only creative but also critical. As such, it will appeal to scholars of sociology, criminology and social policy with interests in research methods and design.

International Perspectives on Crime and Justice Routledge

'Focusing on key issues, themes and concepts within victimology, this edited

collection provides an accessible and comprehensive critical analysis of crucial areas within victimisation. The main theories are related to, and integrated with, empirical research in an engaging style.' - Dr Anette Ballinger, Keele University 'This book achieves the rare feat of helping its readers without patronising them. The aids to the reader - tables, boxes, glossaries, questions, and suggestions for further reading - will prove genuinely helpful to students and their teachers, but they appear within a text that is theoretically informed as well as comprehensive and up to date in its coverage. It deserves to be widely read and used in the teaching of criminology, victimology, and criminal justice' - Professor David Smith, University of Lancaster, UK. Organized around the intersecting social divisions of class, race, age and gender, the book provides an engaging and authoritative overview of the nature of victimisation in society. In addition to a review of the major theoretical developments in relation to understanding aspects of victimization in society, individual chapters explore the political and social context of victimisation and the historical, comparative and contemporary research and scholarly work on it. Each chapter includes the following: - Background and glossary - Theory, research and policy review - 'Thinking critically about...' sections - Reflections and future research directions - Summary and conclusions - Annotated bibliography

Victims, Crime and Society is the essential text on victims for students of

criminology, criminal justice, community safety, youth justice and related areas. Victims Macmillan International Higher Education

This book explores what victimology, as both an academic discipline and an activist movement, has achieved since its initial conception in the 1940s, from a variety of experts' perspectives. Focussing on nine, dynamic and contemporary case studies covering topics like violence against women and girls, bereaved family activism, and environmental victims and climate change activists, each chapter critically examines how different crime victims have been politicised and explores the impact of victim-centred reforms upon criminal justice professional cultures. This book comprehensively and critically examines the historical, social and political factors, including the work of activists, that have shaped the development of theories, policies and reforms in this field, including how victimhood has come to be understood and responded to. The chapters also consider the future developments of this area, including how digital technologies are creating new forms and experiences of victimisation. Speaking to undergraduates, postgraduates and professionals in criminal justice and third sector organisations, this book discusses the links between theory, policy and professional practice and how they contribute to and facilitate debates regarding what the role of crime victims is in a 21st century criminal justice system.
