Researchers who

participate in IEA  
studies have a unique  
opportunity to work  
collaboratively with  
their counterparts from  
many different  
countries and  
disciplinary  
backgrounds over a  
period of several years  
on questions of shared

academic interest. Once the data for a given study have been collected and the first round of international reports published, however, opportunities for that kind of collaboration tend to be much less frequent. A major strength of IEA studies compared to other large-scale, international studies is that they are classroom based, thereby making it possible for researchers and policy makers to investigate linkages between students' achievement and a wide range of variables. Those variables could be related to instructional practices, to students' and teachers' background and attitudes, to school organizational patterns, or to

opportunity to learn, to name a few. The research questions that TIMSS was designed to address make it clear that these kinds of relational, multi-variate analyses were among the major goals of the project. The international reports of the TIMSS-95 results that were published by the International Study Center at Boston College between 1996 and 1999 were intended to provide comprehensive coverage of the basic findings of the study. They were not intended to provide in-depth analyses of research and policy issues; instead, their main purpose was to make the basic findings of the study widely available in a timely manner. This they certainly did.

“Accessing Post-School Studies: A student’s GPS to successful learning makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success, student learning, student support and student engagement. In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton and S„lj”. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers, as well as parents of prospective university students. It will especially assist

students to adapt to the university environment.” Prof Victor N. Teise (Sol Plaatje University, Kimberley, South Africa)

Introduction to  
Business Fernwood  
Publishing

This book is about how to trigger the capacity to aspire among black youth. Examining the transition out of adulthood and imagined futures of black youth, Maja helps us understand how black youth aspirations might be raised, and how a better future for young people can be achieved.

Focus on Business  
Studies IGI Global  
Oxford successful business studies takes learners through the exciting world of business. It has a strong entrepreneurial

focus that teaches business skills that go beyond the classroom. There are many interesting case studies with real-life examples that are set in a South African context.

**Focus on Educational Success** Springer Nature  
Divided looks at the last fifteen years in Saskatchewan, during which time the Saskatchewan Party government sought to reforge the province's image into the New Saskatchewan: brash, materialistic, highly competitive and

aggressively partisan. In the process, a climate of polarization and hyper-partisanship swept the province into a near-perpetual state of anger and social division. These actions are not without consequences. In Divided, diverse voices describe the impact on their lives and communities when simmering wedge issues burst open on social media and in public spaces. The collection dives deep into the long set-up to this moment, from the colonial past to the four decades of neoliberal economics that have widened social and economic gaps across all sectors. Divided positions Saskatchewan as a fascinating case study of the global trends of division and provides

testament to the resiliency of a vision of social solidarity against all odds.

*Focus Gale / Cengage Learning*

Education has gone through numerous radical changes as the digital era has transformed the way we as humans communicate, inform ourselves, purchase goods, and perform other mundane chores at home and at work. New and emerging pedagogies have enabled rapid advancements, perhaps too rapidly. It's a challenge for instructors and researchers alike to remain up to date with educational developments and unlock the full potential that technology could have on this significant profession. The

Handbook of Research on Digital Learning is an essential reference source that explores the different challenges and opportunities that the new and transformative pedagogies have enabled. The challenges will be portrayed through a number of case studies where learners have struggled, managed, and adapted digital technologies in their effort to progress educational goals. Opportunities are revealed and displayed in the form of new methodologies, institutions scenarios, and ongoing research that seeks to optimize the use of such a medium to assist the digital learner in the future of networked education. Featuring

research on topics such as mobile learning, self-directed learning, and cultural considerations, this book is ideally designed for teachers, principals, higher education faculty, deans, curriculum developers, instructional designers, educational software developers, IT specialists, students, researchers, and academicians.

Introduction to Business covers the

scope and sequence of most introductory

business courses. The book provides detailed

explanations in the context of core themes

such as customer satisfaction, ethics,

entrepreneurship, global business, and

managing change.

Introduction to Business includes

hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Focus Business Studies

Springer Science & Business Media

This book provides a platform for international scholars to share evidence for effective practices in integrated STEM education and contributes to the theoretical and practical knowledge gained from the diversity of approaches. Many

publications on STEM education focus on one or two of the separate STEM disciplines without considering the potential for delivering STEM curriculum as an integrated approach. This publication analyzes the efficacy of an integrated STEM curriculum and instruction, providing evidence to examine and support various integrations. The volume focuses on the problems seen by academics working in the fields of science, technology, engineering and mathematics (STEM) and provides valuable, high quality research outcomes and a set of valued practices which have demonstrated their use and viability to improve the quality of integrated STEM

education.

**Budget Literacy**

RainbowSA

Budget literacy is

defined as 'the ability

to read, decipher, and

understand public

budgets to enable and

enhance meaningful

citizen participation in

the budget process'. It

is comprised of two

main parts - (i) a

technical

understanding of public

budgets, including

familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying

presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth, helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the

confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives.

*The Mathematics Education for the Future Project - Proceedings of the 14th International Conference* WTM-Verlag Münster

This comprehensive handbook offers a state-of-the-art guide to new frontiers of African entrepreneurship. Written from a Pan-

African perspective by a cast of international authors, the book addresses the rapid modernisation and evolution of African entrepreneurship and business practices. It maps new developments in entrepreneurial ecosystems, technology and digital entrepreneurship, entrepreneurship in conflict zones, and gender and diversity issues. It proposes new models for entrepreneurial financing and explores the contrast between entrepreneurship in high-technology urban centers with peripheral rural districts and conflict zones. Bringing together empirical insights and case studies from countries across Africa, the Handbook illuminates

regional and contextual differences and shares theoretical and practical insights which inform policy and practice. It is an ideal guide for researchers and students working on international business, entrepreneurship and emerging economies. It will also inform policymakers in developing context-

informed entrepreneurial policies and initiatives in Africa.
