"The chapters in this book attempt to state the main facts about tests, test methods, and test accomplishments, in the field of business. The aim throughout is to present a simple and impartial picture which will enable the reader to arrive at sound conclusions regarding the actual usefulness of tests in the business world, and the possibilities of future development. It is hoped that the material included will prove useful to anyone interested in the problem of more adequately adjusting men to jobs. The book is written for students of personnel practice and of applied psychology, and for all business executives who have been hearing the clamor about tests and who want to form a critical opinion on the basis of facts. At present it is important to emphasize the limitations and shortcomings of tests as to speak in glowing terms of their possibilities. Tests are scientific

instruments. Test work should be supervised by someone with thorough training in applied psychology"--Preface. (PsycINFO Database Record (c) 2010 APA, all rights reserved).

Look around your office. Turn on the TV. Incompetent leadership is everywhere, and there's no denying that most of these leaders are men. In this timely and provocative book, Tomas Chamorro-Premuzic asks two powerful questions: Why is it so easy for incompetent men to become leaders? And why is it so hard for competent people—especially competent women—to advance? Marshaling decades of rigorous research, Chamorro-Premuzic points out that although men make up a majority of leaders, they underperform when compared with female leaders. In fact, most organizations equate leadership potential with a handful of destructive personality traits, like overconfidence and narcissism. In other words, these traits may help someone get selected for a leadership role, but they backfire once the person has the job. When competent women—and men who don't fit the stereotype—are unfairly overlooked, we all suffer the consequences. The result is a deeply flawed system that rewards arrogance rather than humility, and loudness rather than wisdom. There is a better way. With clarity and verve, Chamorro-Premuzic shows us what it really takes to lead and how new systems and processes can help us put the right people in charge.
