IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their

implications and applying them appropriately requires something special; and that is why International GAAP® 2017 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how

complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2017 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting,

where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2017 deals with a key area of IFRS and has a common structure for ease of use: an introduction to the background issues; an explanation of relevant principles; a clear exposition of the requirements of IFRS; a discussion of the implications in practice and possible alternative solutions available; worked examples;

extracts from real company accounts; a full listing of the required disclosures. "... an important part to play in the process of promoting consistent, comparable and high quality financial reporting under IFRSs ... a book that not only provides an analysis of the requirements of the standards and the principles that they expound, but also presents a unique explanation of how the standards should be interpreted and applied in practice." - the Chairman of Trustees of the IASC Foundation "A standard reference work" - Financial Times "The definitive guide to financial reporting" - The Times Revenue from contracts with customers. accounting profession prepares to adopt the new revenue recognition literature. *Intermediate Financial Accounting* SAP Press

The New Revenue Recognition Standard is a joint bold move made by both the FASB and the IASB to give top-lines of companies, across industries, a common denominator. It is a move from the fair value measure of vendor-specific objective evidence ('VSOE') to measure revenue, to one which takes into account what consideration the entity really expects to be entitled to receive from a contract with a 'customer'. The new standard broadens the definition of revenue to include newer concepts like contract costs incurred for transferring a good/ service, material rights and gain and loss from the sale of non-financial

assets. There is specific guidance around contract combinations and contract modifications. 'Transfer of control to a customer' is the axis of the new revenue recognition standard. As control usually transfers before risks and rewards usually do, entities may witness an acceleration in revenue recognition. Collaborative arrangements have come under the scanner as the collaborator may be acting as a 'customer'. ASU 2018-18 issued in November 2018 removes the bias that amidst a risk and benefits sharing atmosphere of a collaborative arrangement, control of an output of an ordinary activity of one collaborator could be transferred to another collaborator for a consideration. Distinct goods/ services are now determined based on whether they are

both individually distinct and are distinct within the context of the contract. Individually distinct goods/ services are now determined based on the characteristics of the goods or services themselves, instead of the way in which the customer may use the goods or services. VSOE rules are past tense and a good/ service may be distinct even if VSOE could not be established earlier. This may lead an increase or decrease in performance obligations, leading to difference in timing of revenue recognition. Increased judgement is needed for demarcating between a sale/ lease/ financing, in estimating variable consideration after applying constraints and in the capitalization and amortization of contract costs-especially in case of a principal versus agent

situation. More disclosures are required. Provision for loss on contracts may apply to entities as ASC 606 amends ASC 605 for those paragraphs instead of superseding them. The position under IFRS is different as with the superseding of IAS 11 Construction contracts, the non-onerous provision for loss on construction contracts has been done away with. ASU 2017-01 and ASU 2017-05 narrowing the definition of 'business' and defining an 'In Substance Nonfinancial asset', respectively, impact the new revenue recognition standard from the point of view of a sale of non-financial assets to a customer- where the interest in an entity does not fall under the new definition of business but within the definition of essentially a non-financial asset. IFRS 3 has also been

amended for a new definition of business and that does bring US GAAP and IFRS closer. The new standard interacts with the new leases standard and there may be a pit stop at ASC 606 before an entity transitions to the new leases standard. This book brings you the impacts from an exotic mix of industries as varied as aerospace and defense, engineering, media and entertainment, airlines, pharmaceuticals, health care, early-stage life sciences, software, construction and real estate, retail and e-commerce, hospitality, telecommunications, shipping, automotive, outsourcing and investment companies and promises deep learning. The new revenue recognition standard affects more than just revenue and impacts the business processes and

results in dual SOX testing during the transition phase. With all the shuffling around the timing of payments being linked to the satisfaction of performance obligations, managements should properly assess their normal operating cycles and working capital. With sufficient discussions and training, all managements will be able to do the 'heavy lifting'.

Revenue Recognition 2016 GRIN Verlag Companies are required to implement a new accounting standard in January 2018 - the IFRS 15 standard for revenue from contracts with customers. In the process, they have the unique chance to do more than just fulfill a regulation: The implementation is an opportunity to

critically assess processes for revenue accounting and improve inefficient "business-as-usual" processes. When the standard is implemented together with process improvements and powerful software, your company can gain a competitive advantage and significantly lower the cost of becoming compliant. Those companies that drag their feet and have to comply on a manual basis each month after January 2018 will be at a disadvantage, due to the high cost of manually reconciling accounts and creating reports. In this book, you will learn the regulatory background of IFRS 15 and how to best meet the challenges associated with implementation, based on examples from the telecommunications and software industries. "IFRS 15: Revenue from

contracts with customers, with SAP Revenue Accounting and Reporting" prepares organizations for the impact of the standard on processes throughout the company that are related to revenue recognition. The authors explore: - How the most important IFRS 15 framework, the 5-step model, works - How different areas of your company will be affected by IFRS 15 - How IFRS 15 implementation works with the solution from one vendor, SAP's Revenue Accounting and Reporting (SAP RAR) module.

Principles of Accounting Volume 1 - Financial Accounting John Wiley & Sons

This publication addresses key accounting implementation issues related to Topic 606, Revenue from Contracts with Customers and related

updates through FASB ASU No. 2016-12. At its completion, the guide will include 16 industry-specific chapters that address accounting implementation issues, and provide industry-specific illustrative examples of how to apply the new standard. It will also provide in-depth coverage of audit considerations from risk assessment and planning to execution of the audit. In light of the material changes resulting from this standard, it will require significant analysis and preparation well in advance of the effective date for all financial reporting based on US GAAP. For that reason, the AICPA is offering two options to quickly deliver finalized implementation issues as quickly as possible. Those options include: an annual online subscription available via

our online professional library, or combination print/PDF, which includes completed chapters as of January 2017 in print as well as online PDF access to finalized implementation issues. Accounting and auditing content of this guide will be updated as implementation issues are finalized, and can be tracked via the link below.

A USA Today bestseller! Companies like Netflix, Spotify, and Salesforce are just the tip of the iceberg for the subscription model. The real transformation--and the real opportunity--is just beginning.

Subscription companies are growing nine times faster than the S&P 500. Why?

Because unlike product companies, subscription companies know their customers. A happy subscriber base is the ultimate economic moat. Today's consumers prefer the advantages of access over the hassles of maintenance, from transportation (Uber, Surf Air), to clothing (Stitch Fix, Eleven James), to razor blades and makeup (Dollar Shave Club, Birchbox). Companies are similarly demanding easier, long-term solutions,

trading their server rooms for cloud storage solutions like Box. Simply put, the world is shifting from products to services. But how do you turn customers into subscribers? As the CEO of the world's largest subscription management platform, Tien Tzuo has helped hundreds of companies transition from relying on individual sales to building customer-centric, recurring-revenue businesses. His core message in *Subscribed* is simple: Ready or not, excited or terrified, you need to adapt to the Subscription Economy -- or risk being left behind. Tzuo shows how to use subscriptions to build lucrative, ongoing one-on-one relationships with your customers. This may require reinventing substantial parts of your company, from your accounting practices to your entire IT

architecture, but the payoff can be enormous. Just look at the case studies:

* Adobe transitions from selling enterprise software licenses to offering cloud-based solutions for a flat monthly fee, and quadruples its valuation. * Fender evolves from selling guitars one at a time to creating lifelong musicians by teaching beginners to play, and keeping them inspired for life. * Caterpillar uses subscriptions to help solve problems -- it's not about how many tractors you can rent, but how much dirt you need to move. In *Subscribed*, you'll learn how these companies made the shift, and how you can transform your own product into a valuable service with a practical, step-by-step framework. Find out how you can prepare and prosper now, rather

than trying to catch up later.

This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully

designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Practice Standard for Work Breakdown Structures - Third Edition

Academic Paper from the year 2018 in the subject Business economics - Investment and Finance, grade: A-, University of Auckland (Graduate School of Management), course: BUSMGT 731: Financial Reporting and Accounting, language: English, abstract: This report

aims to investigate the impact of NZ IFRS 15 on the telecommunication industry. The main focus will be on Spark Limited, a New Zealand based company that will effectively implement NZ IFRS 15 from the financial year ending 30 June 2019 (Spark New Zealand, 2018). In the wake of this, we will provide some background on the introduction of the standard, the implementation as proposed by the five-step model, the impact on the financial results for Spark, as well as practical business consideration for the retrospective adoption. Spark expects the adoption of the standard to have an effect on its accounting operations, particularly regarding the allocation of transaction prices. To ensure a smooth transition, the company will need to assess its

impact and prepare departments and stakeholders for the anticipated changes. In July 2014, the New Zealand Accounting Standards Board published a new standard that introduced significant changes to how companies recognise, measure and disclose revenue in their financial statements. The adoption of NZ

IFRS 15 Revenue from Contracts with Customers is fraught with hurdles for telecommunications entities due to the variety of plans they offer and the frequency at which customer make changes to their plans (Ernst & Young, 2015).
