Professor Woodford carefully picks his way through accumulating evidence from a wide range of scientific disciplines that the rogue

protein in A1 milk is contributing significantly to a group of serious disorders, notably Type 1 diabetes, heart disease, autism, schizophrenia, and various auto-immune diseases.

The beta-casein in A1 milk has a structure that allows a short

molecule called beta-casomorphin-7, or BCM-7, to split off during digestion. This small protein is the "devil in the milk", and it can cause various problems, ranging from juvenile diabetes, autism, schizophrenia, allergies, to auto-immune diseases such as MS and Parkinson's.
