While an ever-present and familiar toxin, carbon monoxide (CO) remains the number one poison in our environment. This silent killer is responsible for over 2,000 deaths a year in the United States alone. The public and healthcare communities need quality information about the many risks presented by carbon monoxide exposure. Edited by a leading expert in the field, *Carbon Monoxide Poisoning* delineates the

successful means to prevent, identify, and manage the effects of CO poisoning. This volume explores new information on CO toxicity, including rehabilitation, the dissemination of information to the public, litigation involving CO poisoning, economic loss assessment, and firefighting. A series of chapters detail the risk of CO poisoning from kitchen ranges, recreational vehicles, and power boats. Expert contributors survey diagnostic procedures and devices, incorporating advances in brain SPECT imaging and non-invasive pulse-oximetry. The book includes chapters that specifically address the pros and cons of hyperbaric oxygen therapy and thoroughly review the physiological effects of acute and long term exposure to CO, as well as the neurocognitive and

neurobehavioral sequelae. Whether you are a healthcare professional who treats CO poisoning, a lawyer involved in litigation for loss of life or property due to CO poisoning, or an engineer developing a well-insulated structure with sufficient ventilation; you will face the challenges raised by CO toxicology. Offering the only comprehensive reference on the subject, this multi-faceted guide takes an innovative look at how we can identify, treat, and prevent harmful exposure to carbon monoxide. Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide

has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to

start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Today's dynamic and uncertain environment has contributed to the changing nature of markets. In order for companies to keep up, they will need to embark on new wave marketing to ride

the wave of opportunities provided by the changes in the environment, such as the digital revolution. This is critical all over the world, but none more so than in Asia. Asia is not only the world's biggest market, but also the fastest growing. It is therefore essential for marketers to understand the dynamics of Asian companies and what they have to offer to the wider world. This book analyzes competitive companies from 18 Asian countries that have successfully practiced new wave marketing and in so doing, provide invaluable lessons that others may find useful. Comprehensive case studies are used not only to describe how some of Asia's best companies compete, but also to analyze the concepts of new wave marketing their actions are based on. This book is

unique in its depth and breadth of cases, from companies in the ASEAN region to North-east Asia, including Mongolia and SAARC. The authors of this book, Professor Philip Kotler, arguably the Father of Modern Marketing, Hermawan Kartajaya from Indonesia, and Hooi Den Huan from Singapore, are all experts in their field and have previously produced other bestsellers. This book, with its focus on real life examples of competitive Asian companies in the age of digitalization, complements the principles and theoretical frameworks of new wave marketing that are detailed in its sister book, *Marketing for Competitiveness*. Together, these books provide a comprehensive picture of the changing Asian marketing landscape. F & S Index United States Annual

Electric and Hybrid Vehicles: Power Sources, Models, Sustainability, Infrastructure and the Market reviews the performance, cost, safety, and sustainability of battery systems for hybrid electric vehicles (HEVs) and

electric vehicles (EVs), including nickel-metal hydride batteries and Li-ion batteries. Throughout this book, especially in the first chapters, alternative vehicles with different power trains are compared in terms of lifetime cost, fuel consumption, and environmental impact. The emissions of greenhouse gases are particularly dealt with. The improvement of the battery, or fuel cell, performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market. An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells, as it may contribute to overcome the so-called range anxiety." Thus, proposed

battery charging techniques are summarized and hydrogen refueling stations are described. The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers. Among the most adversely affected economies around the globe, none has sustained more loss than the made in

the U.S.A label. The American worker has been neglected by our highest governing institutions far too long as our top legislators paved the way for corporate America in their quest for wealth and power under the guise of creating a new global economy. Put America first is decades overdue for our political leaders to protect the interest of the citizens they represent, equally to the powerful and privileged. After much research governing laws instituted, trade policies formulated and institutions created for the express benefit of multi-national corporations; The author has come to the final conclusion that while America slept, a silent form of political & economic terrorism over time crept in impacting the lively hood of middle-class America. Borrowing from the words of

Paul Harvey, the world renown news commentator, Imperfect Partners tells “the rest of the story”, in a way never told before!

This book looks at Japanese companies in manufacturing and services sectors and how they are trying to emerge from the prolonged uncertainty of the pandemic. The chapters are written by those dealing with Japanese business under the shadow of the pandemic and being influenced by the continuous and rapid adoption of digital technologies in business and our daily lives. This book brings together the experiences of big and small corporations while looking at how digital transformation and the pandemic combined have led to a

transformation in the product, production processes and services. It highlights the role played by robots, 3-D printing and renewable energy in manufacturing while the impact can be seen in the changes coming to future offices, how we work and interact and how we relax through tourism and travel on the service side. The services sector is as much impacted by digital transformation and the pandemic as any other field in business. Aimed at academics, researchers and practitioners, Japanese Business Operations in an Uncertain World will provide valuable insights into how Japanese organizations are adapting to the dual impact of the pandemic and advancements in digital technologies. **Brandweek** Christian Faith Publishing,

Drivers buy more wheels and tires for their cars and trucks than any other aftermarket accessory. This book is a comprehensive source for wheel and tire information. Whether you want to know how your wheels and tires actually work and how they affect vehicle performance, or whether you just need advice as to what best suits your vehicle, this book provides the information you are looking for. This book covers daily use and competition cars and trucks, including off-road, circle track, drag, autocross, rally, and show vehicles. Beginning with a chapter on vehicle dynamics, with explanations of center of gravity, slip angle, yaw, roll, and pitch. Author Richard Newton then moves on to general information about tires and

wheels--from materials and construction to use and maintenance. He also explores how this general information applies to specific types of vehicles, using pertinent examples throughout. Used Car Buying Guide 2007 John Wiley & Sons
