SINGLETON EVERETT

"The Psychological Difference" in the Work of Wolfgang Giegerich iUniverse

Why is the memoir genre so important? What is it that drives us to tell our own stories? The ancient Greek myth of Goddess Memory, and her daughters, the Muses, offers new ways to re-enter the stories of our lives and shape them in surprising ways. Mnemosyne's birthing of the Muses underscores her commitment to express all of the facets of her personal story: grief, joy, love, body, breath, history, spirituality, reverie, and humor. The memoirist follows Mnemosyne's imaginal lineage in crafting all memoirs. Memories live in matter, in the very cells of our bodies. Writing our life stories allows us to consider the content of our experiences, the plurality of perspectives from which we can choose to shape them, and the use that we want to make of them. We may choose to write for many reasons, psychological, physical, and cultural healing being just a few. This book suggests the exploration of an imaginable field is possible when we look at how figures from Greek mythology continue to inspire contemporary life writing.

Anthropological and Psychological Interpretations Wellspring/Ballantine

Some call the imaginal the realm of the archetypes, the home of the gods and goddesses, the land of the daimon, or the source of creativity. Others simply call it the soul. The daimon of the imaginal world facilitate the incarnation of soul into the physical body, and transforming these dark energies

allows us to progress as spiritual beings, to live life from a more conscious view. Sandra Dennis suggests that attitudes devaluing the erotic, feminine, instinctual energies particularly those of sexuality, and destructiveness and the marginalization of bodily sensation itself, block these daimonic soul images from incarnating. She discusses our tendency to block these transforming forces and offers suggestions on how to embrace and reclaim them to allow for a more integrated existence. She explains sensations associated with daimonic imagery fragmentation, rage, anxiety, pain, also the other side ecstasy, bliss, orgasmic release understanding that all of these sensations form the basis for profound change in the sense of self. Bibliography. Index.

Jung, Spirituality and Social Change Northwestern University Press

Internationally known artist Howard McConeghey argues that perception is the very essence of life and making art is our most elegant and accessible expression of it. Freeing us from the paralysis of traditional art "training," he breaks the chains of modernism and its constrictive "eye," allowing anyone -be they an artist, an art therapist, or simply a soul-searcher -to find beauty and create it. McConeghey builds a psychological case for art as a universal healer. Working against the onslaught of modern-day skepticism, technology, and rationalism, art may be one of our last avenues to finding soul. And reaching for the images and archetypes that each of us can see in our mind's is the first step. Lushly illustrating his book with reproductions of paintings and drawings from art history's classics to those in art therapy, McConeghey does what only a great master can do: he delivers complex material on a silver platter, making it a pleasure to read and a joy to experience.

Three Essays in Archetypal Psychology Burns & Oates

Argues for a renewed vision of the cosmos based on the centrality of the human encounter with the sacred.

Essays on Literature and Language SteinerBooks

Psychology as the Discipline of Interiority is the first collection of essays dedicated to the study and application of Psychology as the Discipline of Interiority—a new ‘wave’ within Analytical Psychology which pushes off from the work of C. G. Jung and James Hillman. The book reflects upon the notion of psychology developed by German psychoanalyst Wolfgang Giegerich, whose Hegelian turn sheds light on the notion of soul, or psyche, and its inner logic and ‘thought’, forming a radical new basis from which to ground a modern psychology with soul. The book’s theme - ‘the psychological difference’ - is applied to topics including analytical theory, clinical practice, and contemporary issues, ranging from C. G. Jung’s Mysterium, to case studies, to the nuclear bomb and the Shoah. Psychology as the Discipline of Interiority expounds upon the complexity, depth, and innovativeness of Giegerich’s thought, reflecting the various ways in which international scholars have creatively explored a speculative psychology founded upon the notion of soul. The contributors here include clinical psychologists, Jungian analysts, and international scholars. With a new chapter by Wolfgang Giegerich and a foreword by David Miller, Psychology as the Discipline of Interiority will be essential reading for depth and clinical psychologists, Jungian psychoanalysts in practice and in training, and academics and students of post-Jungian studies. It is also relevant reading for all those interested in the history of philosophical thought and what it means to think in the highly sophisticated and technological world of the twenty-first century.

Wisdom’s Daughters Fisher King Press

In a study of the dark side of the human soul, two psychotherapists draw on Jungian psychology to explain how to work with this darkness to revitalize one’s life

Embrace of the Daimon Routledge

In this work, acclaimed Jungian James Hillman examines the concepts of myth, insights, eros, body, and the mytheme of female inferiority, as well as the need for the freedom to imagine and to feel psychic reality. By examining these ideas, and the role they have played both in and outside of the therapeutic setting, Hillman mounts a compelling argument that, rather than locking them away in some inner asylum or subjecting them to daily self-treatment, man’s “peculiarities” can become an integral part of a rich and fulfilling daily life. Originally published by Northwestern University Press in 1972, this work had a profound impact on a nation emerging self-aware from the 1960s, as well as on the era’s burgeoning feminist movement. It remains a profound critique of therapy and the psychological viewpoint, and it is one of Hillman’s most important and enduring works.

Dream and the Text, The Northwestern University Press

Always controversial, Thomas DeGregori has released another classic volume that is sure to inform, confound, and present new perspectives on today’s environmental issues. This time he is taking on the environmentalists, naturalists, green consumerists, and those that hail the natural lifestyle as the healthy, politically correct thing to do. DeGregori examines the economics of green consumerism, the reality of saving the environment, how historical cultures may have influenced environmental damage, and how being ecologically correct may have a more damaging effect on our environment. Not just a regurgitation of theories; DeGregori offers real-time strategies and alternatives to enhance our natural resources and our environment in harmony with today’s modern technology. This is the book everyone will be talking about for years to come.

The Prophetic Tradition and the Battle for the Soul of the World Routledge

First published in 1988. Routledge is an imprint of Taylor & Francis, an informa company.

The Speech of the Grail Northwestern University Press

The Planets Within asks us to return to antiquity with new eyes. It centers on one of the most psychological movements of the prescientific age--Renaissance Italy, where a group of “inner Columbuses” charted territories that still give us today a much-needed sense of who we are and where we have come from, and the right routes to take toward fertile and unexplored places. Chief among these masters of the interior life was Marsilio Ficino, presiding genius of the Florentine Academy, who taught that all things exist in soul and must be lived in its light. This study of Ficino broadens and deepens our understanding of psyche, for Ficino was a doctor of soul, and his insights teach us the care and nurture of soul. Moore takes as his guide Ficino’s own fundamental tool--imagination. Respecting the integrity and autonomy of images, The Planets Within unfolds a poetics of soul in a kind of dialogue between the laconic remarks of Ficino and the need to give these remarks a life and context for our day.

Re-Imagining Mary Penguin

Despite contemporary attempts to revive myth, this book argues that we are living in a world without myth and looks at what this means for humankind. In this provocative work, Sophia Heller challenges the assumption that we cannot be without myth, that myth is necessary to vital, soulful living. Indeed, Heller argues, we have been living in a world without myth for a long time. The Absence of Myth examines the loss of a religious mode of being-in-the-world and demonstrates how theorists who insist on the presence of myth deny its historical end. Absence of myth may seem obvious: evidenced by our lack of cult and ritual, and by our de-animated natural world, as well as in the emergence of conceptual thought and psychological awareness, which could only arise with the dissolution of a prereflective (mythic) mode of being-in-the-world. But what appears to be straightforward becomes complicated when myth is intentionally conflated with thought and reflection, usually in the attempt to cultivate a “mythic consciousness” that aims to restore meaning to life and assuage the spiritual malaise of contemporary culture. Myth cannot rest in peace. It must be continually unearthed, redefined, and recontextualized such that modern and postmodern notions of myth are made to substitute for something that has never been experienced, only imagined. Sophia Heller is an independent scholar with a Ph.D. in Mythological Studies from Pacifica Graduate Institute. She lives in Massachusetts.

Initiation into the Soul’s Speaking About Itself John Wiley & Sons

Wisdom is Women’s Gift to the World. In the many cultural stories that speak about the changing of the ages, it is always Feminine Spirit which brings about the transition to new life, for Feminine Spirit knows the rhythms of life, death, and rebirth and is the “opener of the way.” In times of cultural transformation, it is also our right-brain, feminine consciousness that is our best guide, for it opens us to the creative imagination, the realm of possibility. The return of the Goddess awakens the transformative energy that births the changing of the ages. In the western story of worldwide

spiritual transformation, there is a powerful image of Cosmic Woman, an image of the archetypal Feminine Spirit who transforms and gives birth to this new age. And her archetypal image gives us instructions for opening to and incarnating wisdom. This image of the awakening Feminine Spirit is an image of the Conscious Woman: a woman, clothed with the sun, standing on the moon, crowned with stars, who is in labor, giving birth to a savior. In earlier times and different traditions, this archetypal image was understood as Lady Wisdom. Today I feel this Goddess image of conscious woman can be incarnated by women everywhere. This woman clothed with the sun is Lady Wisdom, who calls all women to become her daughters. “I love Cathy’s insights into fairy tales, mythology, dreams, astrological energies, and archetypes. She makes sense of how our lives are impacted by these complex yet very beautiful elements, making them accessible and keeping them profound. Her wisdom can only enhance anyone lucky enough to have crossed her path.” —Alix Toland, Artist & Creator of Color-Scope: An Astrological Mandala

Sensuality and the Integration of Forbidden Imagery in Depth Psychology SUNY Press

This book aims to enlarge understandings of educational action research. Drawing from complexity theory, deep ecology, Eastern philosophy, hermeneutics, phenomenology, psychoanalysis, postmodernism, and literary theory, the essays in this collection show how participation in educational action research practices requires more of the researcher than the application of research methods. Each essay demonstrates how action research is a lived practice that asks the researcher to not only investigate the subject at hand but, as well, to provide some account of the way in which the investigation both shapes and is shaped by the investigator.

The Opening of Vision Echo’s Subtle BodyContributions to an Archetypal Psychology, Second Revised and Expanded Edition

The New York Times bestselling author and trusted spiritual adviser offers a follow-up to his classic Care of the Soul. Something essential is missing from modern life. Many who’ve turned away from religious institutions—and others who have lived wholly without religion—hunger for more than what contemporary secular life has to offer but are reluctant to follow organized religion’s strict and often inflexible path to spirituality. In A Religion of One’s Own, bestselling author and former monk Thomas Moore explores the myriad possibilities of creating a personal spiritual style, either inside or outside formal religion. Two decades ago, Moore’s Care of the Soul touched a chord with millions of readers yearning to integrate spirituality into their everyday lives. In A Religion of One’s Own, Moore expands on the topics he first explored shortly after leaving the monastery. He recounts the benefits of contemplative living that he learned during his twelve years as a monk but also the more original and imaginative spirituality that he later developed and embraced in his secular life. Here, he shares stories of others who are creating their own path: a former football player now on a spiritual quest with the Pueblo Indians, a friend who makes a meditative practice of floral arrangements, and a well-known classical pianist whose audiences sometimes describe having a mystical experience while listening to her performances. Moore weaves their experiences with the wisdom of philosophers, writers, and artists who have rejected materialism and infused their secular lives with transcendence. At a time when so many feel disillusioned with or detached from organized religion yet long for a way to move beyond an exclusively materialistic, rational lifestyle, A Religion of One’s Own points the way to creating an amplified inner life and a world of greater purpose, meaning, and reflection.

Jungian Literary Criticism SUNY Press

This anthology of contemporary classics in analytical psychology bring together academic, scholarly and clinical writings by contributors who constitute the “post-Jungian” generation. Carpani brings together important contributions from the Jungian world to establish the “new ancestors” in this field, in order to serve future generations of Jungian analysts, scholars, historians and students. This generation of clinicians and scholars has shaped the contemporary Jungian landscape and their work continues to inspire discussions on key topics including archetypes, race, gender, trauma and complexes. Each contributor has selected a piece of their work which they feel best represents their research and clinical interests, each aiding the expansion of current discussions on Jung and contemporary analytical psychology studies. Spanning two volumes, which are also accessible as standalone books, this essential collection will be of interest to Jungian analysts and therapists, as well as academics and students of Jungian and post-Jungian studies.

Mercury Rising Spring Publications

Artists plumb the depths of soul which Jung calls the collective unconscious, the inheritance of our ancestors’ psychic responses to life’s drama. In this sense the artist is priest, mediating between us and God. The artist introduces us to ourselves by inviting us into the world of image. We may enter this world to contemplate briefly or at length. Some paintings invite us back over and over again and we return, never tiring of them. It is especially these that lead us to the Great Mystery, beyond image. Re-Imagining Mary: A Journey through Art to the Feminine Self is about meeting the Cosmic Mary in image and imagination, the many facets of the Mary image that mirror both outer reality and inner feminine soul. Jungian analyst Mariann Burke offers personal reflections and suggests symbolic meanings in works by several artists including: Fra Angelico, Albrecht Durer, Henry Ossawa Tanner, Nicolas Poussin, Parmigianino, Duccio di Buoninsegna, Salvador Dali, Andy Warhol, and Frederick Franck. Aspects of Mary explored include: Mary not only as Mother of God, a title from the Judeo-Christian tradition, but as Mother God, a title reaching back to an ancient longing for a Female Divinity. In western Christianity this Mary bears the titles and the qualities worshipped for thousands of years in the Female images of God and Goddess. These titles include Mary as Sorrowful One and as Primordial Mother. Recovering Mary both as light and dark Madonna plays a crucial role in humanity’s search for a divinity who reflects soul. Also discussed is Mary as the sheltering Great Mother that Piero della Francesca suggest in the Madonna del Parto and Mater Misericordia. Frederick Franck’s The Original Face and the Medieval Vierge Ouvrante also suggest this motif of Mary as Protector of the mystery of our common Origin. Franck’s inspiration for his sculpture of Mary was the Buddhist koan-“What is your original face before you were born?” What is spirituality? What does it mean to grow spiritually and psychologically closer to the Feminine Self? How can we begin to see the “outer” image as a manifestation, a projection of the psyche? Can we be challenged by being “betwixt and between” a male dominated Church without a recognized female divinity where God is generally imagined external to the soul and a more feminine depth psychological approach to the Marian mystery and to the Feminine Self? Will we answer the call of the mystic within us? If so, how will we be changed?

Heidegger, Hillman, and Angels CUP Archive

Duden asserts that the most basic biological and medical terms that we use to describe our own bodies--male and female, healthy or sick--are cultural constructions. To illustrate this, she delves into records of an 18th-century German physician who documented the medical histories of 1,800 women

of all ages and backgrounds, often in their own words.

The New Gnosis Red Wheel Weiser

Explores the life and work of psychoanalyst Sabina Spielrein through a feminist and mytho-poetic lens. Long stigmatized as Carl Jung's hysterical mistress, Sabina Spielrein (1885-1942) was in fact a key figure in the history of psychoanalytic thought. Born into a Russian Jewish family, she was institutionalized at nineteen in Zurich and became Jung's patient. Spielrein went on to earn a doctorate in psychiatry, practiced for over thirty years, and published numerous papers, until her untimely death in the Holocaust. She developed innovative theories of female sexuality, child development, mythic archetypes in the human unconscious, and the death instinct. In *Sabina Spielrein*, Angela M. Sells examines Spielrein's life and work from a feminist and mytho-poetic perspective. Drawing on newly translated diaries, papers, and correspondence with Jung and Sigmund Freud, Sells challenges the suppression of Spielrein's ideas and shows her to be a significant thinker in her own right. "This book is a major, perhaps a definitive, contribution to the literature. Angela Sells documents both the demonization of a great psychoanalytic theorist—mainly because she was a woman and worse still, was once Carl Jung's patient. The book's greatest strength is its power to enlighten and inform and in so doing, to arouse indignation and amazement at Spielrein's brilliance and tenacity." — Phyllis Chesler, author of *Women and Madness* "This is a pathbreaking piece of research that not only begins to rehabilitate the reputation of a woman patient of Jung's, but also suggests that Spielrein was an important contributor in her own right to the beginnings of psychoanalysis." — Carol P. Christ, coauthor of *Goddess and God in the World: Conversations in Embodied Theology*

The Disinformation Guide to 21st Century Witchcraft BalboaPress

Echo's Subtle Body collects all of Patricia Berry's writings between 1972 and 1982, which together develop a style of psychotherapy that is based on the primacy of the image in psychical life. The book contains the often referred to but out-of-print essays "An Approach to the Dream" and "What's the Matter with Mother?" as well as newer papers. The style poetically concrete, the insights bolstered by clinical example, dream interpretation, and mythical references, each paper revises an important analytic construct - reductions, dream, defense, telos or goal, reflection, shadow - so that it more adequately and sensitively echoes the poetic basis of the mind. One of the best available introductions to the fresh ideas now enlivening the practice of Jungian analysis. This book is of special interest to psychotherapists and to all concerned with myth, dream, and feminine studies. In addition, this new and revised edition includes "Rules of Thumb Toward an Archetypal Psychology Practice," a text written in honor of James Hillman in 2008.

TRANSFORMATIONS Peter Lang Pub Incorporated

This book partakes of a long tradition of dream interpretation, but, at the same time, is unique in its cross-cultural and interdisciplinary methods and in its mix of theoretical and analytical approaches. It includes a great chronological and geographical range, from ancient Sumeria to eighteenth-century China; medieval Hispanic dream poetry to Italian Renaissance dream theory; Shakespeare to Nerval; and from Dostoevsky, through Emily Brontë, to Henry James. Rupprecht also incorporates various critical orientations including archetypal, comparative, feminist, historicist, linguistic, postmodern, psychoanalytic, religious, reader response, and self-psychology.
