This book focuses on biogas production by anaerobic digestion, which is the most popular bioenergy technology of today. Using anaerobic digestion for the production of biogas is a sustainable approach that simultaneously also allows the treatment of organic waste. The energy contained in the substrate is released in the form of biogas, which can be employed as a renewable fuel in diverse industrial sectors. Although biogas generation is considered an established process, it continues to evolve, e.g. by incorporating modifications and improvements to increase its efficiency and its downstream applications. The chapters of this book review the progress made related to feedstock, system configuration and operational conditions. It also addresses microbial pathways utilized, as well as storage, transportation and usage of biogas. This book is an up-to-date resource for scientists and students working on improving biogas production.

This book contains high-quality papers presented in the

conference Recent Advances in Mechanical Infrastructure (ICRAM 2020) held at IITRAM, Ahmedabad, India, from 21-23 August 2020. The topics covered in this book are recent advances in thermal infrastructure, manufacturing infrastructure and infrastructure planning and design.

**Proceedings of HSFEA 2020** Springer Nature

Loss prevention engineering describes all activities intended to help organizations in any industry to prevent loss, whether it be through injury, fire, explosion, toxic release, natural disaster, terrorism or other security threats. Compared to process safety, which only focusses on preventing loss in the process industry, this is a much broader field. Here is the only one-stop source for loss prevention principles, policies, practices, programs and methodology presented from an engineering vantage point. As such, this handbook discusses the engineering needs for manufacturing, construction, mining, defense, health care, transportation and quantification, covering the topics to a depth that allows for their functional use while providing additional references should more information be required. The reference nature of the book allows any engineers or other professionals in charge of safety concerns to find the information needed to complete their analysis, project, process, or design.

**Guide for All-Hazard Emergency Operations Planning**

Pointer Publishers

New India Assurance Company Limited (NIACL), based in Mumbai, Maharashtra is a public sector general insurance company of India. "It is the largest general insurance company of India on the basis of gross premium collection inclusive of foreign operations". It was founded by Sir Dorabji Tata in 1919, and was nationalized in 1973. NIACL is going to recruit the candidates for the posts of NIACL Assistant over many vacancies. NIACL Assistant is a clerical level job with various roles and responsibilities. It is a public sector job that focuses on legal and non-legal insurance claims, data-entry processes and multiple financial transactions. The New India Assurance Company Limited is a leading General Insurance Company and conducts NIACL exam annually for the posts of NIACL Assistant and NIACL Administrative Officer. NIACL selection process is based on three phases : Preliminary Exam, Mains Exam and Regional Language Test. The minimum qualification required for NIACL Assistant 2020 exam is graduation in any discipline from a recognized university. The applicant should have English as a subject at SSC/HSC/Intermediate/Graduate level and also should have proficiency in the regional language of the state, from which the candidates wish to apply.

*Handling and Management of Chemical Hazards, Updated Version* Diamond Pocket Books Pvt Ltd

Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

*Handbook of Loss Prevention Engineering* Partridge Publishing

This book comprises selected papers on advances in the field of health and environment safety that were presented at the International Conference on Advances in the field of Health, Safety, Fire, Environment, Allied sciences and engineering (HSFEA 2020). This book presents a number of research papers which focuses on basic concept of sustainable development and

its role in modern world for clean development technology. The book also presents methods that can be used to effectively monitor and measure climate change and global warming. Further, the contents of this work stress the importance of maintaining safety and healthy work environments that are free of occupational health hazards. This book will be of interest to researchers, professionals, and policy makers alike.

Giving this Nine Monthly manual, we all team members are very happy, as this will be very helpful to every aspirants in their current affairs norms, as well as for all competitive exams. This manual virtually is covering most of the current affairs related events from June 2017 Till Date. We have prepared this special manual keeping in mind that students need updated current affairs for several examinations like UPSC, State PSCs, Railways and other competitive examinations. We have prepared this manual in bullets with bold facts which eventually would be helpful for the students. This issue fulfills the need of a manual that will provide to students latest current affairs of the latest months in concise form. This issue covers Union Budget 2018-19, Economic Survey 2017-18, India State of Forest report -2017 and Census 2011 in easy format. In addition UP Budget 2018-19 is also included in briefs. In this manual Current affairs related to National, International, Sports, States, Science and Tech., Environment and ecology are also given. Apart from this more than thousand MCQs are given in this. Kindly send us your feedbacks and suggestions in order to make this magazine more meaningful and helpful. Wishing you all the luck for your brilliant future and bright success

Myths and Realities William Andrew

The trucking business in India deserves special attention. It is estimated that about 8 million goods vehicles ply on Indian roads, out of which about 25 per cent are heavy commercial vehicles (with a load capacity of 7.5 tonnes and above). More than 75 per cent of the trucks are owned by fleet operators with a fleet size of five or less. Fleet operators are mostly family-run businesses and hence they evolve with the ideologies and business principles of the family. Such evolution has led to varying business practices and levels of technology adoption. Decisions were not taken in line with modern business practices. Another trend was the relative reluctance of the next generation of these families to join their family business due to the perception that the trucking business was less appealing vis-à-vis the other options that they had after higher education. To fill this widening business-practice gap and in an attempt to impart a professional approach towards enabling the trucking business to grow, the Mahindra Truck and Bus Division (MTBD) partnered with the Indian Institute of Management (IIM) Ahmedabad to impart management education to the next generation transporters in trucking business. This youth transport Management Development Program (MDP) was called MPOWER, signifying youth transporter empowerment. Typically, a second-generation transport entrepreneur (son and daughter of a transporter/truck fleet owner) in the age group 21 to 40 years was targeted to be a participant for the MDP. Most of the participants were well educated (many of them had obtained degrees from foreign universities), ambitious and progressive, keen to be the change agents in the road transport ecosystem, innovative, and technology savvy. They shared a common vision, which was to professionalize their family business and take it to the next level. In this book, we include teaching cases based on real-life transport business situations that highlight some of the above-mentioned issues. Through these cases, the reader would be able to appreciate the decisions in the transport business, the challenges that are faced, and use appropriate decision tools to develop solutions. We include a collection of two chapters and 12

cases. The first chapter discusses the significance and structure of the trucking business. The second chapter highlights the HR practices in the trucking business particularly related to driver management. The 12 cases have been developed with close cooperation from several transport companies such as Agarwal Packers and Movers Limited, Navigators Logistics Company Private Limited, Shreeji Transport Services Private Limited, KM Trans Logistics, and Instant Transport Solution Private Limited. There are other companies whose names have been disguised to protect their identity. Apart from the new cases, we have consciously decided to include a few cases of earlier vintage, since the issues raised and the analytical approach adopted continue to be valid.

Bombs, IEDs, and Explosives Springer Nature

Technology driven witty solutions to everyday Managerial Problems Like it is often told "Solutions at your doorstep", we are completely surrounded by profound managerial solutions waiting to be unearthed from our everyday machines in the form of phones, computers, safety devices, automobile etc. The world of machines abounds with managerial thoughts and solutions. This inspiring book provides us with a new approach in problem solving and addresses the diverse challenges faced in managerial functions today. "Learning Management Back From Machines", is the wonderful story of Krish and his latest creation, MANU - an advanced hyper-intelligent, direct-neural interface-capable humanoid, which helps Krish along in deriving managerial solutions from fellow-machines and machine-processes alike. In the process of learning and observing the history of various technological marvels along with the need for these inventions, we discover a whole new dimension of creative intelligence and learning, waiting to reveal itself all over again. The book is aimed at understanding the core essence of how machines have been made to work and help us discover new and innovative solutions to our everyday social and managerial problems. • RELIGIONS TEACH US MANAGEMENT. • STORIES AND FABLES TEACH US MANAGEMENT. • MANAGEMENT THEORIES TEACH US MANAGEMENT. • NOW EVERYDAY MACHINES WILL TEACH US MANAGEMENT

Current Affairs Manual 2019 The Energy and Resources Institute (TERI)

This publication explores how India could boost its exports by addressing nontariff trade barriers. It focuses on sanitary and phytosanitary measures and technical barriers to trade, and on export products that have the potential to increase their market share in Bangladesh, Bhutan, Maldives, Nepal, and Sri Lanka. It considers options including legal reforms, the upgrade of quality standards and laboratory equipment, and institution building of accrediting bodies and conformity assessment bodies. Practical recommendations suggest ways forward for both the public and private sectors.

A Guidebook for First Responders during the Initial Phase of a Dangerous Goods/Hazardous Materials Transportation Incident CRC Press

This volume presents a novel framework to understand urban climate co-benefits in India, that is, tackling climate change and achieving sustainable development goals in cities. It utilizes methods and tools from several assessment frameworks to scientifically evaluate sector co-benefits for informed decision making. The co-benefits approach can lead to significant improvements in the way societies use environmental resources and distribute their outputs. The volume discusses four main themes: (1) Concepts and theories on cities and climate co-benefits; (2) Contextualizing co-benefit issues across spatial scales and sectors; (3) Sectoral analyses of co-benefits in energy, transport, buildings, waste, and biodiversity, and (4) Innovations and reforms needed to promote co-benefits in cities. The discussions are based on empirical research conducted in Indian cities and aligned with the international discourse on the 2030 UN Development Agenda and New Urban Agenda created at the UN-Habitat III in 2016. The analyses and recommendations in this volume are of considerable interest to policy experts, scholars and researchers of urban and regional studies, geography, public policy, international development/law, economics, development planning, environmental planning, climate change, energy studies, and so on.

Learning Management Back from Machines DHEERAJ SHARMA Global Trade Law Series, Volume 55 India, one of the world's foremost trading nations, exhibits a particularly complex regulatory landscape with a variety of standard-setting bodies, regulators, accreditation and certification bodies, inspection agencies, as well as several state-level regulators. This is the first book to extensively describe the nature of standard-setting processes in India and the key agencies involved with this task, greatly clarifying the scope of market opportunities in the country. Lucid contributions from experienced practitioners and regulators with first-hand experience in formulating and advising on standards-related issues in international trade help disentangle the web of laws, regulations, operations, and functions of India's standard setters in governmental, non-governmental, and industry contexts. The chapters describe how standards apply to such crucial trade aspects as the following: conformity assessment practice and procedure; environmental, ethical, social, and safety issues; import bans and import licensing; certification and labelling measures; mutual recognition agreements; food safety; and standardisation of the digital economy. The book is drafted throughout in an easy-to-read

style, with numerous tables, flowcharts, and figures illustrating step-by-step compliance procedures. Informative annexes guide the reader to relevant agencies and identify their roles and responsibilities. This book provides a clear and concise guide to the operations, functions, and compliance and documentation requirements of India's standard-setting and regulatory bodies across all sectors and products, and thus will serve as an unmatched guide for manufacturers, traders, and exporters operating in the Indian market or seeking to export to India. It will also serve as a useful Handbook to policymakers, academics, and researchers interested in understanding the role of standard-setting bodies in the field of international trade.

the examinations.

Chemical disasters (industrial). Universities Press

Written by an engineer for engineers, this book is both training manual and on-going reference, bringing together all the different facets of the complex processes that must be in place to minimize the risk to people, plant and the environment from fires, explosions, vapour releases and oil spills. Fully compliant with international regulatory requirements, relatively compact but comprehensive in its coverage, engineers, safety professionals and concerned company management will buy this book to capitalize on the author's life-long expertise. This is the only book focusing specifically on oil and gas and related chemical facilities. This new edition includes updates on management practices, lessons learned from recent incidents, and new material on chemical processes, hazards and risk reviews (e.g. CHAZOP). Latest technology on fireproofing, fire and gas detection systems and applications is also covered. An introductory chapter on the philosophy of protection principles along with fundamental background material on the properties of the chemicals concerned and their behaviours under industrial conditions, combined with a detailed section on modern risk analysis techniques makes this book essential reading for students and professionals following Industrial Safety, Chemical Process Safety and Fire Protection Engineering courses. A practical, results-oriented manual for practicing engineers, bringing protection principles and chemistry together with modern risk analysis techniques Specific focus on oil and gas and related chemical facilities, making it comprehensive and compact Includes the latest best practice guidance, as well as lessons learned from recent incidents
