Exploring the medieval heritage of Aberdeenshire and Moray, the essays in this volume contain insights and recent work presented at the British Archaeological Association Conference of

2014, based at Aberdeen University. The opening, historical chapters establish the political, economic and administrative context of the region, looking at both the secular and religious worlds and include an examination of Elgin Cathedral and the bishops' palaces. The discoveries at the excavations of the kirk of St Nicholas, which have revealed the early origins of religious life in Aberdeen city,

are summarized and subsequent papers consider the role of patronage. Patronage is explored in terms of architecture, the dramas of the Reformation and its aftermath highlighted through essentially humble parish churches, assailed by turbulent events and personalities. The collegiate church at Cullen, particularly its tomb sculpture, provides an unusually detailed view of the spiritual and dynastic needs of its patrons. The decoration of spectacular ceilings, both carved and painted, at St Machar's Cathedral, Provost Skene's House and Crathes Castle, are surveyed through the eyes of their patrons and the viewers below. Saints and religious devotion feature in the last four chapters, focusing on the carved wooden panels from Fetteresso,

which display both piety and a rare glimpse of Scottish medieval carnal humour, the illuminated manuscripts from Arbuthnott, the Aberdeen Breviary and *Historia Gentis Scotorum*. The medieval artistic culture of north-east Scotland is both battered by time and relatively little known. With discerning interpretation, this volume shows that much high-quality material still survives, while the lavish illustrations restore some glamour to this lost medieval world.

Aesthetics and Style in Strategy

Metropolitan Museum of Art

The representation of abstract data and ideas can be a difficult and tedious task to handle when learning new concepts; however, the advances of emerging technology have allowed for new

methods of representing such conceptual data. The Handbook of Research on Maximizing Cognitive Learning through Knowledge Visualization focuses on the use of visualization technologies to assist in the process of better comprehending scientific concepts, data, and applications. Highlighting the utilization of visual power and the roles of sensory perceptions, computer graphics, animation, and digital storytelling, this book is an essential reference source for instructors, engineers, programmers, and software developers interested in the exchange of information through the visual depiction of data.

Francis Picabia and Dada in Paris IGI Global

Art History: The Basics is a concise and accessible introduction for the general reader and the undergraduate approaching the history of art for the first time at college or university. It will give you answers to questions like: What is art and art history? What are the main methodologies used to understand art? How have ideas about form, sex and

gender shaped representation? What connects art with psychoanalysis, semiotics and Marxism? How are globalization and postmodernism changing art and art history? Each chapter introduces key ideas, issues and debates in art history, including information on relevant websites and image archives. Fully illustrated with an international range of artistic examples, Art History: The Basics also includes helpful subject summaries, further ideas for reading in each chapter, and a useful glossary for easy reference.

This book walks the educator through six technology-rich, customizable projects

aligned to Common Core and ISTE Standards. Beginning with a look at the objectives, the author then presents subject-specific recommendations for tailoring the project to fit English, math, science, social studies, foreign language or art classrooms. A discussion of applicable technology tools accompanies each project, followed by step-by-step guidance, grading considerations, examples and tips on troubleshooting.

The title of the volume is also that of the Pacific Arts Association's Fourth International Symposium on Arts in the Pacific, held at the Honolulu Academy of Arts, in August 1989. Twenty-two diverse papers address various aspects of preserving artistic heritage and commuting that heritage to modern *Which University?* Cambridge University Press

A companion to the Getty's prize-winning exhibition catalogue *Illuminating the Renaissance: The Triumph of Flemish Manuscript Painting in Europe*, this volume contains thirteen selected

papers presented at two conferences held in conjunction with that exhibition. The first was organized by the Getty Museum, and the second was held at the Courtauld Institute of Art under the sponsorship of the Courtauld Institute and the Royal Academy of Arts. Added here is an essay by Margaret Scott on the role of dress during the reign of Charles the Bold. Texts include Lorne Campbell's research into Rogier van der Weyden's work as an illuminator, Nancy Turner's investigation of materials and methods of painting in Flemish manuscripts, and trenchant commentary by Jonathan Alexander and James Marrow on the state of current research on Flemish illumination. A recurring theme is the structure of collaboration in manuscript production. The essays also

reveal an important new patron of manuscript illumination and address the role of illuminated manuscripts at the Burgundian court. A series of biographies of Burgundian scribes is featured.

A new theory of the readymade via a new reading of Picabia and a new writing of Dada. The artist Francis Picabia—notorious dandy, bon vivant, painter, poet, filmmaker, and polemicist—has emerged as the Dadaist with postmodern appeal, and one of the most enigmatic forces behind the enigma that was Dada. In this first book in English to focus on Picabia's work in Paris during the Dada years, art historian and critic George Baker reimagines Dada through Picabia's eyes. Such reimagining

involves a new account of the readymade—Marcel Duchamp's anti-art invention, which opened fine art to mass culture and the commodity. But in Picabia's hands, Baker argues, the Dada readymade aimed to reinvent art rather than destroy it. Picabia's readymade opened art not just to the commodity, but to the larger world from which the commodity stems: the fluid sea of capital and money that transforms all objects and experiences in its wake. The book thus tells the story of a set of newly transformed artistic practices, claiming them for art history—and naming them—for the first time: Dada Drawing, Dada Painting, Dada Photography, Dada Abstraction, Dada Cinema, Dada Montage. Along the way, Baker describes a series of nearly forgotten

objects and events, from the almost lunatic range of the Paris Dada “manifestations” to Picabia's polemical writings; from a lost work by Picabia in the form of a hole (called, suggestively, The Young Girl) to his “painting” Cacodylic Eye, covered in autographs by luminaries ranging from Ezra Pound to Fatty Arbuckle. Baker ends with readymades in prose: a vast interweaving of citations and quotations that converge to create a heated conversation among Picabia, André Breton, Tristan Tzara, James Joyce, Friedrich Nietzsche, Jacques Derrida, Gilles Deleuze, and others. Art history has never looked like this before. But then again, Dada has never looked like art history.

The retrospective exhibition of Arie Allweil, which is on show in the spring of 2015 at the Mishkan Museum of Art, Ein Harod, is accompanied by a comprehensive book that embraces all the phases of his oeuvre. The artist's life story evokes a particular connection with this museum because of its place in the history of communal settlement: Arie Allweil, a leader of the Hashomer Hatzair group that settled in Bitanya Ilit on 1920, was a central figure in a communal settlement which became known as one of the most challenging ever attempted in this country – and which later became the subject of a play, The Night of the Twentieth, which has itself become a myth. Allweil, an artist and a leader, chose a life of art, set out to study art at the academy in Vienna, did exceedingly

well there, joined the “Kunstschau” group of artists which had formed around Gustav Klimt and Egon Schiele, exhibited with them in the '20s, and created early works some of which – such as his Gray Tura series – have recently attained renewed recognition. On his return to Palestine in 1926 he became an artist and a teacher. He was one of the founders of the Tel Aviv Museum and of the Midrasha Art Teachers' College when it was first established in Tel Aviv.

The Artwork Caught by the Tail OECD Publishing

Is authenticity a sham? a widening rift confronts art museum visitors and workers alike, between traditional presentation of artifacts in the name of authenticity and critical comment that

recognises it only as a relative and power-laden term. Both points of view are explored here to arrive at a liberating view of art museums. Medieval Art, Architecture and Archaeology in the Dioceses of Aberdeen and Moray University of Hawaii Press The this report assesses the policies, institutions and tools employed by the Peruvian government to design, implement and enforce high-quality regulations.

Exhibiting Authenticity Archaeopress Publishing Ltd

Provides a broad view of the history and current state of scholarship on the art of the ancient Near East This book covers the aesthetic traditions of Mesopotamia, Iran, Anatolia, and the Levant, from Neolithic times to the end of the

Achaemenid Persian Empire around 330 BCE. It describes and examines the field from a variety of critical perspectives: across approaches and interpretive frameworks, key explanatory concepts, materials and selected media and formats, and zones of interaction. This important work also addresses both traditional and emerging categories of material, intellectual perspectives, and research priorities. The book covers geography and chronology, context and setting, medium and scale, while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence. Part One of the book considers the methodologies and approaches that the field has drawn on and refined. Part Two addresses terms and concepts critical to understanding

the subjects and formal characteristics of the Near Eastern material record, including the intellectual frameworks within which monuments have been approached and interpreted. Part Three surveys the field's most distinctive and characteristic genres, with special reference to Mesopotamian art and architecture. Part Four considers involvement with artistic traditions across a broader reach, examining connections with Egypt, the Aegean, and the Mediterranean. And finally, Part Five addresses intersections with the closely allied discipline of archaeology and the institutional stewardship of cultural heritage in the modern Middle East. Told from multiple perspectives, *A Companion to Ancient Near Eastern Art* is an enlightening, must-have book for

advanced undergraduate and graduate students of ancient Near East art and Near East history as well as those interested in history and art history.

FOREWORD BY GUY KAWASAKI

Presentation designer and internationally acclaimed communications expert Garr Reynolds, creator of the most popular Web site on presentation design and delivery on the Net —

presentationzen.com — shares his experience in a provocative mix of illumination, inspiration, education, and guidance that will change the way you think about making presentations with

PowerPoint or Keynote. Presentation Zen challenges the conventional wisdom of making "slide presentations" in today's world and encourages you to think differently and more creatively about the preparation, design, and delivery of your presentations. Garr shares lessons and perspectives that draw upon practical advice from the fields of communication and business. Combining solid principles of design with the tenets of Zen simplicity, this book will help you along the path to simpler, more effective presentations.

One of the major challenges facing librarians and curators of digital repositories are the innovative 'born digital' documents created by scholars in

the humanities. These documents range from the parsed corpora created by linguists to traditional reference information presented in electronic databases, to rich, multi-media hypertexts combining audio, still and moving video and text, and many other sorts of material. Too often, librarians think of electronic resources solely as providing access to subscription databases. This book encourages librarians to think holistically of the life cycle of electronic resources from new items being created at their institution, to end-user access, to long term preservation of digital resources. Focuses on role of a digital library in the complete life cycle (creation, access, long term preservation) of digital objects created by scholars in the humanities

Covers recent developments in humanities computing and their implications for digital libraries Presents accessible technical information about fields such as information retrieval and computational linguistics for a non-technical audience
