 After saving Alfa Romeo from oblivion in 1987, it took Fiat nearly five years to debut the first new Alfa produced under its control.

This is the story of how the competition versions of the 155/156/147 family of cars were developed and subsequently raced to many championship titles and race wins. Alfa Romeo's 155 saloon was a comprehensively successful racing touring car that won the German and world-wide DTM Championship, and later ITC races. The model also took on the role of representing the company in national touring car championships throughout the world, most notably winning the British Touring Car Championship in 1994. The 156 was Alfa's successor to the 155 and was also raced with much success. This book follows the development and competition history of this model too, along with its sibling, the 147. Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.
 - *F1 cars, Indycars & racing tyres: the autobiography of Nigel Bennett* Veloce Publishing Ltd
 Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.

Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.

Alfa Romeo 156 JTD 750639-0002 GT2256V Turbocharger Rebuild and Repair Guide: Veloce Publishing Ltd

The past decade has been one of the most volatile periods in global petroleum markets in living memory, and future oil supply

security and price levels remain highly uncertain. This poses many questions for the professional activities of planners and urbanists because contemporary cities are highly dependent on petroleum as a transport fuel. How will oil dependent cities respond, and adapt to, the changing pattern of petroleum supplies? What key strategies should planners and policy makers implement in petroleum vulnerable cities to address the challenges of moving beyond oil? How might a shift away from petroleum provide opportunities to improve or remake cities for the economic, social and environmental imperatives of twenty-first-century sustainability? Such questions are the focus of contributors to this book with perspectives ranging across the planning challenge: overarching petroleum futures, governance, transition and climate change questions, the role of various urban transport nodes and household responses, ways of measuring oil vulnerability, and the effects on telecommunications, ports and other urban infrastructure. This comprehensive volume – with contributions from and focusing on cities in Australia, the UK, the US, France, Germany, the Netherlands and South Korea – provides key insights to enable cities to plan for the age beyond petroleum.
