The Merck Index of Chemicals and Drugs CRC-Press

The Merck Index is a one-volume encyclopedia of chemicals, drugs and biologicals that contains more than 10,000 monographs. Each monograph in this authoritative reference source is a concise description of a single substance or a small group of closely related compounds. Compounds included: •

human and veterinary drugs • biotech drugs and monoclonal antibodies • substances used for medical imaging • biologicals and natural products • plants and traditional medicines • nutraceuticals and cosmeceuticals • agriculturals, pesticides and herbicides • Organic chemicals used in research • Food additives and supplements • dyes, colors and indicators • environmentally significant substances
 Information provided: • chemical, common and generic names • Over 15,000 trademarks and associated companies • CAS Registry Numbers for over 12,000 compounds • Over 8,500 chemical structures • molecular formulae, weights and percentage composition • capsule statements identifying compound classes and scientific significance • scientific and patent literature references • physical and toxicity data • therapeutic and commercial uses • caution and hazard information
 In addition, there are more than 700 new and completely revised monographs, thousands of new references, trademarks and uses added to existing monographs. Now includes a companion CD-ROM which features 989 monographs no longer available in print, organic name reactions, supplemental tables and a new user interface for user-friendly

searching. Features of the CD: Searchable by keywords, references, and numerical properties Search the complete contents of the 14th edition, plus nearly a thousand monographs archived from previous editions Comes with a free one-year subscription to the Merck Index Internet Edition Windows-compatible CD powered by CambridgeSoft's ChemFinder Extensively revised supplemental tables now including acronyms, vaccines, and physical constants More than 70 pages of hard to find information in one easy-to-use place

The Merck Index Merck

A comprehensive reference work on organic chemistry that provides information on thousands of substances and structural formulas.

The Merck Index of Chemicals and Drugs Wiley

The Merck Index Version 13.4 CD-ROM (Academic) is a single electronic reference of chemicals, drugs and biologically active molecules that includes more than 10,250 original monographs from the 13th edition, 540 monographs from the printed 12th edition, and 230 new monographs from the to-be published 14th edition. As in the printed edition for which the CD-ROM serves as an essential supplement, each monograph is a concise description of a single substance or a small group of closely related compounds. Information about these compounds includes: * Names and synonyms * Physical properties * Preparations * Therapeutic uses * 420 Organic Name Reactions * Over 60 pages of supplemental tables Search capabilities in the CD-ROM version serve as a comprehensive extension to that of the print version. Instead of simply searching individually within categories such as CAS RN, Formula, and Therapeutic Category, a user can simultaneously explore various categories using search specifics like Structure, Full Text, and Name. Additionally, searches can be narrowed down further by using the references, properties, derivatives, and therapeutic category fields, to name a few. The Merck Index Version 13.4 CD ROM also allows the user to conduct on-screen investigation by searching and browsing the Organic Name Reaction component of the CD. It provides effective visual aids with a wealth of supplementary tables as easy-to-access PDF files.
