RICHARDSON REBEKAH

The Bright Family, 1 My World

In this book, the author builds on decades of complex research to examine the gender pay gap and the unequal distribution of labor between couples in the home. The author argues that although public and private discourse has brought these concerns to light, the actions taken - such as a single company slapped on the wrist or a few progressive leaders going on paternity leave - are the economic equivalent of tossing a band-aid to someone with cancer. These solutions, the author writes, treat the symptoms and not the disease of gender inequality in the workplace and economy. Here, the author points to data that reveals how the pay gap widens further down the line in women's careers, about 10 to 15 years out, as opposed to those beginning careers after college. She examines five distinct groups of women over the course of the twentieth century: cohorts of women who differ in terms of career, job, marriage, and children, in approximated years of graduation - 1900s, 1920s, 1950s, 1970s, and 1990s - based on various demographic, labor force, and occupational outcomes. The book argues that our entire economy is trapped in an old way of doing business; work structures have not adapted as more women enter the workforce. Gender equality in pay and equity in home and childcare labor are flip sides of the same issue, and the author frames both in the context of a serious empirical exploration that has not yet been put in a long-run historical context. This book offers a deep look into census data, rich information about individual college graduates over their lifetimes, and various records and sources of material to offer a new model to restructure the home and school systems that contribute to the gender pay gap and the quest for both family and career. --

Family Communication in the Age of Digital and Social Media HarperCollins

"This engaging collection gathers theoretical and empirical insights from leading family policy experts. The authors - representing diverse countries, disciplines, and methods - bring to life the volume's innovative conceptual framework, which is organized around policy institutions, both public and private. The volume closes with a call for new lines of research that should inform family policy scholars for years to come."--Janet Gornick, Professor of Political Science and Sociology, and Director of the Stone Center on Socio-Economic Inequality, The Graduate Center, City University of New York, USA "Featuring exciting contributors from a range of often-siloed scholarly disciplines, countries and cultures, this Handbook offers nuanced insights into how interacting societal inequality factors influence family policy enactment to reinforce or improve inequality outcomes across gender, class, and nations. It is ambitious, broad-reaching, and succeeds in providing a strategic view within and across nations to inspire thoughtful evidence-based policy implications to improve societies in the future."--Ellen Ernst Kossek, Basil S. Turner Professor of Management, Purdue University, USA This open access handbook provides a multilevel view on family policies, combining insights on family policy outcomes at different levels of policymaking: supra-national organizations, national states, sub-national or regional levels, and finally smaller organizations and employers. At each of these levels, a multidisciplinary group of expert scholars assess policies and their implementation, such as child income support, childcare services, parental leave, and leave to provide care to frail and elderly family members. The chapters evaluate their impact in improving children's development and equal opportunities, promoting gender equality, regulating fertility, productivity and economic inequality, and take an intersectional perspective related to gender, class, and family diversity. The editors conclude by presenting a new research agenda based on five major challenges pertaining to the levels of policy implementation (in particular globalization and decentralization), austerity and marketization, inequality, changing family relations, and welfare states adapting to women's empowered roles

What Makes a Family? Charlesbridge Publishing

Faith Elliot's book has a coherence unusual in a textbook. As its title suggests, it directs our attention to change and continuity in the family. It reviews debates about the biological origins of the nuclear family and gender roles, accounts of the development of the conjugal family as the dominant family form in modern Western societies and of change in the roles of men and women within and without the family, the remodelling of the conjugal family consequent on the legitimization of divorce and the emergence of one-parent families and remarriage families, and the development of alternative lifestyles as exemplified in unmarried cohabitation, same-sex pairings and group living. The book considers Marxist and feminist approaches alongside the functional approaches which have been more traditional in the sociological study of the family.

Using the common term family council to refer to family governance, the book will be a practical manual for all business families seeking structure to manage how their family governs itself and relates to their business. The book will answer several basic questions: 1. What are the forms of structured family governance? 2. What purpose is served, and disasters avoided, by using structure like a family council? 3. How does one select the form of family council that is appropriate for the size, age and complexity of the business family? 4. How are family councils established and maintained, and how do they evolve?

This book tells the stranger-than-fiction story of how a poor white family from Indiana was scapegoated into prominence as America's "worst" family by the eugenics movement in the early

twentieth century, then "reinvented" in the 1970s as part of a vanguard of social rebellion. In what becomes a profoundly unsettling counter-history of the United States, Nathaniel Deutsch traces how the Ishmaels, whose patriarch fought in the Revolutionary War, were discovered in the slums of Indianapolis in the 1870s and became a symbol for all that was wrong with the urban poor. The Ishmaels, actually white Christians, were later celebrated in the 1970s as the founders of the country's first African American Muslim community. This bizarre and fascinating saga reveals how class, race, religion, and science have shaped the nation's history and myths. In the tradition of *The Promise of a Pencil* and *Kisses from Katie* comes an inspirational memoir by the founder of Comfort Cases about his turbulent childhood in the foster care system and the countless obstacles and discrimination he endured in adopting his four children. Rob Scheer never thought that he would be living the life he is now. He's happily married to his partner and love of his life, he's the father of four beautiful children, and he's the founder of an organization that makes life better for thousands of children in the foster care system. But life wasn't always like this. Growing up in an abusive household before his placement in foster care, Rob had all the odds stacked against him. Kicked out of his foster family's home within weeks after turning eighteen—with a year left of high school to go—he had to resort to sleeping in his car and in public bathrooms. He suffered from drug addiction and battled with depression, never knowing when his next meal would be or where he would sleep at night. But by true perseverance, he was able to find his own path and achieve his wildest dreams. "A heartwarming, hopeful memoir brimming with humanitarianism and compassion" (Kirkus Reviews), Rob's story provides a glimpse into what it's like to grow up in the foster care system, and sheds necessary light on the children who are often treated without dignity. Both a
