Theories of Human Development
 Routledge

This 7th Edition helps students unravel the mysteries of human behavior through its highly readable introduction to the ideas of the most significant personality theorists. Engaging biographical sketches begin each chapter, and unique capsule summaries help students review key concepts. Theories come alive through the inclusion of quotations from the theorists' writings and numerous applications such as dream interpretation, psychopathology, and psychotherapy. Significant changes in the 7th edition include an extended discussion of the practical applications of

personality theory, with an emphasis on guidelines that can help people increase their self-knowledge, make better decisions, and live more fulfilling lives. Fictionalized but true-to-life examples illustrating the perils of inadequate self-knowledge include college students, parents, terrorists, business executives, and politicians, while other examples show the positive outcomes that can result from a better understanding of one's unconscious. This 7th edition also includes a more extensive discussion of how a lack of self-understanding caused difficulties for such noted theorists as Freud and Erikson, and a new section that explains how behavior can be strongly influenced by the situation as well as by one's personality. Finally, a new interactive web site provides practice test questions and other topics of interest.

An Introduction to Theories of Learning John Wiley & Sons

With this introductory text, Steve Wilkens takes a fresh, friendly approach to understanding and evaluating various ethical systems. Beginning each chapter with a "bumper sticker" slogan ("If it feels good, do it"; "God said it, I believe it, that settles it;" "When in Rome..."), he then moves on to examine the complex questions, conclusions and assumptions

that lie at its heart. Wilkens acquaints students with the vast array of classic and contemporary approaches to ethics: cultural relativism, emotivism, behaviourism, hedonism, ethical egoism, atheistic existentialism, utilitarianism, categorical imperative, hierarchicalism, situation ethics, theistic existentialism, theological voluntarism, and natural law ethics. For each system, his thorough introduction explores its popular "bumper sticker" expression, its core assumptions and basic elements, the questions that give rise to it, and its strengths and weaknesses. Students, professors and general readers will welcome Wilkens's engaging text which simultaneously offers a well-rounded assessment of ethical systems and shows the relevance and prevalence of ethical ideas in daily life. Introduction to Theories of Learning Ninth Edition

Theories of Discourse Taylor & Francis

This is the first critical introduction to the theories of discourse advanced by Foucault, Althusser, Pêcheux and Hirst. Discourse theory proposes that

in our daily activities the way we speak and write is shaped by the structures of power in our society, and that because our society is defined by struggle and conflict our discourses reflect and create conflicts. The words, expressions and forms of knowledge in institutions (schools and universities, the church and the media) become political as they are traversed and rearranged by the pressure of forces. Diane Macdonell reveals the various lines of thought in recent work on discourse, showing how the central conception of discourse as a political and social tool could diversify into several different critical theories and ideologies. This book is of particular interest as it calls for a reappraisal of Althusser whose work, Macdonell argues, has been wrongly debunked. This is the first overview and introduction to a notoriously complex area of critical theory, an area which is at the heart of debates about form, meaning, ideology, literary criticism and the humanities.
