 Smart Cities Cybersecurity and Privacy examines the latest research developments and their outcomes for safe, secure, and trusting smart cities residents. Smart cities improve the quality of life of citizens in their energy and water usage, healthcare, environmental impact, transportation needs, and many other critical city services. Recent advances in hardware and software, have fueled the rapid growth and deployment of ubiquitous connectivity between a city's physical and cyber components. This connectivity however also opens up many security vulnerabilities that must be mitigated. Smart Cities Cybersecurity and Privacy helps researchers, engineers, and city planners develop adaptive, robust, scalable, and reliable security and privacy smart city applications that can mitigate the negative implications associated with cyber-attacks and potential privacy invasion. It provides insights into networking and security architectures, designs, and models for the secure operation of smart city applications. Consolidates in one place state-of-the-art academic and industry research Provides a holistic and systematic framework for design, evaluating, and deploying the latest security solutions for smart cities Improves understanding and collaboration among all smart city stakeholders to develop more secure smart city architectures

 As an eyewitness to Fidel Castro's rise to power in Cuba and other key episodes, Néstor T. Carbonell sheds new light on how the ruler and his allies deceived and subjugated the Cuban people and defied twelve U.S. presidents. Just as important - if not more so - he reveals how the regime continues to pose a serious threat to the United States in collusion with Russia, China, and Venezuela. The author draws on declassified documents and reliable unpublished testimonies, as well as personal experiences, to delve into the Communist takeover of Cuba, which he denounced while on the island. He ponders the causes and consequences of the botched Bay of Pigs operation, which he joined as a refugee. From the battle to expel the Castro regime from the Organization of American States, which Carbonell helped achieve, to the Congressional Joint Resolution on Cuba, which he tenaciously pursued; from the looming Missile Crisis, which the author persistently flagged, to the myriad subversive activities he warned against and condemned, Néstor T. Carbonell debunks the myths and fallacies surrounding the longest-running subversive

tyranny in modern times. Join the author as he shares a critical analysis of the Castro-Communist regime and explores the challenges and opportunities that will likely arise when freedom finally dawns in Cuba.

 In Havana Youth, Greg Kahn explores Cubans born after 1989, who have only known a time after the USSR dissolved and left the Caribbean nation with few resources and a growth-crippling, US-led economic embargo. Those kids, born during what is called "The Special Period", are now in their twenties and developing a sense of individuality in a society that was historically focused on collectivism. This is their cultural counter-revolution, and they are redefining what it means to be Cuban.

 This book analyzes the economic reforms and political adjustments that took place in Cuba during the era of Raúl Castro's leadership and its immediate aftermath, the first year of his successor, Miguel Díaz-Canel. Faced with economic challenges and a political crisis of legitimacy now that the Castro brothers are no longer in power, the Cuban Revolution finds itself at another critical juncture, confronted with the loss of Latin American allies and a more hostile and implacable US administration.

 The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

A Los Angeles Times Book Prize Finalist in History "Full of...lively insights and lucid prose" (The Wall Street Journal) an epic, sweeping history of Cuba and its complex ties to the United States—from before the arrival of Columbus to the present day—written by one of the world's leading historians of Cuba. In 1961, at the height of the Cold War, the United States severed diplomatic relations with Cuba, where a momentous revolution had taken power three years earlier. For more than half a century, the stand-off continued—through the tenure of ten American presidents and the fifty-year rule of Fidel Castro. His death in 2016, and the retirement of his brother and successor Raúl Castro in 2021, have spurred questions about the country's future. Meanwhile, politics in Washington—Barack Obama's opening to the island, Donald Trump's reversal of that policy, and the election of Joe Biden—have made the relationship between the two nations a subject of debate once more. Now, award-winning historian Ada Ferrer delivers an "important" (The Guardian) and moving chronicle that demands a new reckoning with both the island's past and its relationship with the United States. Spanning more than five centuries, *Cuba: An American History* provides us with a front-row seat as we witness the evolution of the modern nation, with its dramatic record of conquest and colonization, of slavery and freedom, of independence and revolutions made and unmade. Along the way, Ferrer explores the sometimes surprising, often troubled intimacy between the two countries, documenting not only the influence of the United States on Cuba but also the many ways the island has been a recurring presence in US affairs. This is a story that will give Americans unexpected insights into the history of their own nation and, in so doing, help them imagine a new relationship with Cuba; "readers will close [this] fascinating book with a sense of hope" (The Economist). Filled with rousing stories and characters, and drawing on more than thirty years of research in Cuba, Spain, and the United States—as well as the author's own extensive travel to the island over the same period—this is a stunning and monumental account like no other.

*New Threats in America's Backyard* Henry Holt Books For Young Readers

"Cuban Communism remains, like its previous ten editions, an important contribution to the field of Cuban Studies. It includes many useful chronological facts, as well as a selection of Fidel Castro's speeches which are interesting and informative for any reader interested in the island." -- Maria Gropas, Department of Social Anthropology, University of Cambridge This new 11th edition of a classic text, come to be known as "the bible of Cuban Studies," emphasizes two key issues of the twenty-first century.

First, transition concerns in a world without Castro, and second, the continuing embargo of Cuba by the United States in the aftermath of a major change in the presidency. Cuban Communism has been updated to take account of changes in the 44 years of Castro's rule since seizing power in 1959. In addition to articles and essays that represent new developments in Cuba, the work boasts a database upgrade that makes it more important to students, scholars, and researchers. The volume has expanded the section on future prospects for civil society and democracy in a post-Castro environment; including "Regime Change in Cuba" by Eusebio Mujal-Leon and Joshua W. Busby; "Transition Scenarios" by Randolph H. Pherson, and "A Policy Conundrum over Cuba" by Edward Gonzalez. It also contains a chronology of events from 1959 through 2002. Finally, the new work contains a carefully constructed Who's Who of important players in Cuba and the regime during the Castro period up to the present. Other articles new to the 11th edition of Cuban Communism are by Ernesto Betancourt, "Cuba's Balance of Payment Gap"; Carmelo Mesa-Lago, "The Cuban Economy From 1999-2001"; Taylor Boas, "The Internet and U.S. Policy toward Cuba"; Aldo M. Leiva, "Environmental Technology Transfer and Foreign Investment"; Moises Asis, "Judaism in Cuba"; Wolf Grabendorff, "A View from the European Union." More than ever, it is a must volume for those interested in political systems and social structures. Irving Louis Horowitz is Hannah Arendt Distinguished Professor Emeritus of Sociology and Political Science at Rutgers University. Among his works are *Three Worlds of Development*, *Beyond Empire and Revolution*, and his *Bacardi Lectures on Cuba* that was published as *The Conscience of Worms* and the *Cowardice of Lions*. Jaime Suchlicki is Bacardi Professor of History at the Graduate School of International Studies at the University of Miami, and executive director of its Cuban-American and Cuban Center. He is author of *From Columbus to Castro*, *University Students and Revolution in Cuba*, and *Mexico: From Montezuma to NAFTA and Beyond*.

The Routledge Companion to Automobile Heritage, Culture, and Preservation explores automotive heritage, its place in society, and the ways we might preserve and conserve it. Drawing on contributions from academics and practitioners around the world and comprising six sections, this volume carries the heritage discourse forward by exploring the complex and sometimes intricate place of automobiles within society. Taken as a whole, this book helps to shape how we think about automobile heritage and considers how that heritage explores a range of cultural, intellectual, emotional, and material elements well outside of the automobile body itself. Most importantly, perhaps, it questions how we might better acknowledge the importance of automotive heritage now and in the future. The Routledge Companion to Automobile Heritage, Culture, and Preservation is unique in that it juxtaposes theory with practice, academic approaches with practical experience, and recognizes that issues of preservation and conservation belong in a broad context. As such, this volume should be essential reading for both academics and practitioners with an interest in automobiles, cultural heritage, and preservation.

Incorporated by veteran automakers in 1913, the Chandler Motor

Car Company was initially successful in a fiercely competitive industry, manufacturing an array of quality automobiles at a range of prices. Yet by the late 1920s the company was floundering under mismanagement. Producing four lines of cars with numerous body styles, Chandler and its lower-priced companion marque, Cleveland, were unable to find markets for their numerous models and seemed in effect to be competing against themselves. Drawing on numerous automotive histories and two large private collections of memorabilia, this exhaustive study of the Chandler Motor Car Company covers the automobiles in detail, including all body styles, and their changes during production. The author chronicles the growth, expansion and later troubles of Chandler and Cleveland, providing fresh insight into the formative years of the auto industry and the personalities who made it go.

*A History of the Cuban Revolution*

Cuba's Car Culture drives through Cuba's love of American cars of the '40s and '50s, and the ingenuity that keeps them running despite the U.S. embargo. 2017 Silver Medal Winner of the International Automotive Media Competition! The story of how Cuba came to be trapped in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular culture, one marked by great creativity, such as: -Keeping a car alive with no opportunity to acquire replacement parts -Customizing a car with no access to aftermarket parts -Drag racing with no drag strip In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have been cut off from the world so long that they've morphed into something else in the spirit of automotive survival. Authors Tom Cotter and Bill Warner (founder of the Amelia Island Concours) take readers on a whirlwind tour of all things automotive, beginning with Cuba's pre-Castro car and racing history, up to today's lost collector cars, street racing, and the challenges of keeping decades-old cars on the road. Cuba's Car Culture is illustrated throughout with rare historical photos as well as contemporary photos of Cuba's current car scene. For anyone who enjoys classic cars, whether they're old Chevy Bel-Airs, Studebakers, or Ford Fairlanes, a cruise around Cuba will make you feel like a kid in a candy store.
