“The heart-pounding
space race is on . . . in
this riveting SF thriller”
from the Hugo and
Nebula Award-winning
author of *Red Lightning*
and *Rolling Thunder*
(Publishers Weekly,
starred review). As
Chinese and US
spacecraft compete to
be the first to land on
Mars, a former
astronaut, his cousin,
and four teens from
Florida decide to take
matters into their own
hands. If they can

quickly build their own space-worthy ship using scrap metal, appliances, and power tools, they have a chance to come from behind—thanks to an inventive new power source that can propel them to the Red Planet within three days. No guts, no glory . . . “Varley’s great strength is in his characterizations, but in *Red Thunder* he also shows a strong sense of place. . . . If you are willing to simply fantasize about fleeing your office cubicle and becoming a heroic space explorer, this novel will fulfill your wishes.” —The Washington Post “Fast paced . . . Engaging characters.” —Rocky Mountain News “Full of little gems of wit and intelligence.” —Booklist “[A] fun-

filled adventure. Varley matches a serious literary style with an outrageous plot, and he’s one of the few writers in the field who could make it work.” —Chronicle
Space cadet Simon and Schuster
 Originally published for a young adult audience in the 1950s, a classic Heinlein tale depicts a future world where overpopulation has necessitated travel to other planets in spite of limited communications technology, a challenge for which identical twins Tom and Pat are enlisted for a human telepathy project. Reprint. 15,000 first printing.

Three young men do what we all wanted to - they build Rocket Ship Galileo and fly it to the moon. Of course it's not so simple: there are rivals and red tape to overcome, and a totally unexpected and possibly lethal -- surprise waiting for them when they get there. Matt Dodson has heroic dreams of joining Space Patrol, so he becomes a Space Cadet and embarks on the long and difficult training that will show if he can do the job. His mettle is tested to the

utmost when, on his first training flight he finds himself in the midst of an interplanetary crisis. Jim Marlowe grew up on the Red Planet, and when he's sent off to boarding school at Syrtis Major, he insists on taking his Martian pet with him. He doesn't anticipate how much trouble friendly little Willis will get him into -- and how paradoxically lucky that will turn out to be. Bill Lerner can't wait to leave an overcrowded Earth and become a Farmer in the Sky on Ganymede. He thinks he's ready for hard work and hardship -- but he has no idea what it will mean when things go wrong and the nearest help is four hundred million miles away!

Danger in Deep

Space Baen

From Grandmaster Robert A. Heinlein comes a long-lost first novel, written in 1939 and never before published, introducing ideas and themes that would shape his career and define the genre that is synonymous with his name. July 12, 1939 Perry Nelson is driving along the palisades when suddenly another vehicle swerves into his lane, a tire blows out, and his car careens off the road and over a bluff. The last thing he sees before his head connects with the boulders below is a girl in a green bathing suit, prancing along the shore.... When he wakes, the girl in green is a woman dressed in furs and the sun-drenched shore has

transformed into snowcapped mountains. The woman, Diana, rescues Perry from the bitter cold and takes him inside her home to rest and recuperate. Later they debate the cause of the accident, for Diana is unfamiliar with the concept of a tire blowout and Perry cannot comprehend snowfall in mid-July. Then Diana shares with him a vital piece of information: The date is now January 7. The year...2086. When his shock subsides, Perry begins an exhaustive study of global evolution over the past 150 years. He learns, among other things, that a United Europe was formed and led by Edward, Duke of Windsor; former New York City mayor LaGuardia served two

terms as president of the United States; the military draft was completely reconceived; banks became publicly owned and operated; and in the year 2003, two helicopters destroyed the island of Manhattan in a galvanizing act of war. This education in the ways of the modern world emboldens Perry to assimilate to life in the twenty-first century. But education brings with it inescapable truths -- the economic and legal systems, the government, and even the dynamic between men and women remain alien to Perry, the customs of the new day continually testing his mental and emotional resolve. Yet it is precisely his knowledge of a bygone

era that will serve Perry best, as the man from 1939 seems destined to lead his newfound peers even further into the future than they could have imagined. A classic example of the future history that Robert Heinlein popularized during his career, *For Us, The Living* marks both the beginning and the end of an extraordinary arc of political, social, and literary crusading that comprises his legacy. Heinlein could not have known in 1939 how the world would change over the course of one and a half centuries, but we have our own true world history to compare with his brilliant imaginings, rendering *For Us, The Living* not merely a novel, but a time capsule view into our

past, our present, and perhaps our future. The novel is presented here with an introduction by acclaimed science fiction writer Spider Robinson and an afterword by Professor Robert James of the Heinlein Society. Elephants never forget! Wildside Press comic book published by Dell. Based on the TV series which was based on Robert A. Heinlein's novel, Space Cadet. The comic reprints from Escamilla Comics are reproduced from actual classic comics, and sometimes reflect the imperfection of books that are decades old.

Ein Science Fiction-Roman. Createspace Independent Publishing Platform
This is the seminal novel of a young man's

education as a member of an elite, paternalistic non-military organization of leaders dedicated to preserving human civilization, the Solar Patrol, a provocative parallel to Heinlein's famous later novel, Starship Troopers (which is about the military). Only the best and brightest--the strongest and the most courageous--ever manage to become Space Cadets, at the Space Academy. They are in training to be come part of the elite guard of the solar system, accepting missions others fear, taking risks no others dare, and upholding the peace of the solar system for the benefit of all. But before Matt Dodson can earn his rightful place in the ranks, his mettle is to

be tested in the most severe and extraordinary ways--ways that change him forever, from the midwestern American boy into a man of the Solar Patrol. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Pursuit of the

Pankera Open Road Media

The message had seemed simple, yet it was more complex than Don could have imagined. He was being called from Earth to an alien world for reasons

unknown^¾save only that his life depended on it. But setting out for Mars and getting there in good shape turned out to be a lot more complicated than Don ever would have guessed possible. It was trouble enough being inexplicably hounded by Earth's secret police. But when he was hijacked by Venusian rebels, Don suddenly realized that he was trapped in the center of a war between worlds that could change the fate of the Solar System forever! At the

publisher's request, this title is sold without DRM (Digital Rights Management).

Have Space Suit, Will Travel Simon and Schuster

Robert A. Heinlein (1907-1988) is generally considered the greatest American SF writer of the 20th century. A famous and bestselling author in later life, he started as a navy man and graduate of Annapolis who was forced to retire because of tuberculosis. A socialist politician in the 1930s, he became one of the sources of Libertarian politics in the USA in his later years. His most famous works include the Future History series (stories and novels collected in *The Past Through Tomorrow* and continued in later

novels), *Starship Troopers*, *Stranger in a Strange Land*, and *The Moon is a Harsh Mistress*. Given his desire for privacy in the later decades of his life, he was both stranger and more interesting than one could ever have known. This is the first of two volumes of a major American biography. This volume is about Robert A. Heinlein's life up to the end of the 1940s and the mid-life crisis that changed him forever. *Space Cadet* Createspace Independent Publishing Platform
Carey Rockwell is the pseudonym used for the author of the Tom Corbet Space Cadet series of books written for young boys. This 1950's series included books, comic strips,

coloring books and television shows. The Tom Corbett space series consists of eight books, which may have been based on the novel Space Cadet by Robert Heinlein. The series follows the adventures of Tom and his friend Roger as they train to be members of the Solar Guard. The stories center around the academy, the bunkroom and their training ship Polaris. Their adventures take them to alien worlds in our solar system and beyond.

 "There is no such thing as luck. There is only adequate or inadequate preparation to cope with a statistical universe."
 ¾Robert A. Heinlein, from Time Enough for

Love. Be Prepared _ Or Die! Bill Lermer travels with his father, stepmother and stepsister to colonize a Jovian moon in the process of being terraformed. Out here, self-reliance is the key to survival¾and Bill finds that his Boy Scout motto isn't merely a pretty saying. It's a necessary rule for survival! This is it: what we think is the best of the classic Robert Heinlein adventure novels that influenced a generation of engineers and space scientists and still set the heart racing and the mind afire! At the publisher's request, this title is sold without DRM (Digital Rights Management).
