Education* Springer Science & Business
Media

This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy,

and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research

methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.

Scales, Norms, and Equivalent Scores
Springer Nature

Blaschke Products and Their Applications
presents a collection of survey articles
that examine Blaschke products and

several of its applications to fields such as approximation theory, differential equations, dynamical systems, harmonic analysis, to name a few. Additionally, this volume illustrates the historical roots of Blaschke products and highlights key research on this topic. For nearly a century, Blaschke products have been researched. Their boundary behaviour, the asymptomatic growth of various integral means and their derivatives, their applications within several branches of mathematics, and their membership in different function spaces and their dynamics, are a few examples of where Blaschke products have shown to be important. The contributions written by experts from various fields of mathematical research will engage graduate students and researches alike, bringing the reader to the forefront of research in the topic. The readers will also discover the various open problems, enabling them to better pursue their own research.

Emotions in Second Language Teaching
Routledge

Policy and the Political Life of Music Education is the first book of its kind in the

field of Music Education. It offers a far-reaching and innovative outlook, bringing together expert voices who provide a multifaceted and global set of insights into a critical arena for action today: policy. On one hand, the book helps the novice to make sense of what policy is, how it functions, and how it is discussed in various parts of the world; while on the other, it offers the experienced educator a set of critically written analyses that outline the state of the play of music education policy thinking. As policy participation remains largely underexplored in music education, the book helps to clarify to teachers how policy thinking does shape educational action and directly influences the nature, extent, and impact of our programs. The goal is to help readers understand the complexities of policy and to become better skilled in how to think, speak, and act in policy terms. The book provides new ways to understand and therefore imagine policy, approximating it to the lives of educators and highlighting its importance and impact. This is an essential read for anyone interested in change and how to better understand decision-making within

music and education. Finally, this book, while aimed at the growth of music educators' knowledge-base regarding policy, also fosters 'open thinking' regarding policy as subject, helping educators straddling arts and education to recognize that policy thinking can offer creative designs for educational change.

Mathematics and Science Education Around the World
Routledge

The laboratory manual and study guide supports your teaching with a broad range of practicals, emphasising safety and risk assessment. It is an essential companion to Chemistry in Context and can also be used alongside other Advanced Chemistry books. It offers practicals with detailed instructions, for openended investigations and opportunities for assessed practical work in the four skill areas of planning, implementing, analysing and evaluating.

Engineering in Pre-college Settings

Springer Science & Business Media
In science, technology, engineering, and mathematics (STEM) education in pre-college, engineering is not the silent "e" anymore. There is an accelerated interest in teaching engineering in all grade levels. Structured engineering programs are

emerging in schools as well as in out-of-school settings. Over the last ten years, the number of states in the US including engineering in their K-12 standards has tripled, and this trend will continue to grow with the adoption of the Next Generation Science Standards. The interest in pre-college engineering education stems from three different motivations. First, from a workforce pipeline or pathway perspective, researchers and practitioners are interested in understanding precursors, influential and motivational factors, and the progression of engineering thinking. Second, from a general societal perspective, technological literacy and understanding of the role of engineering and technology is becoming increasingly important for the general populace, and it is more imperative to foster this understanding from a younger age. Third, from a STEM integration and education perspective, engineering processes are used as a context to teach science and math concepts. This book addresses each of these motivations and the diverse means used to engage with them. Designed to be a source of background and inspiration for researchers

and practitioners alike, this volume includes contributions on policy, synthesis studies, and research studies to catalyze and inform current efforts to improve pre-college engineering education. The book explores teacher learning and practices, as well as how student learning occurs in both formal settings, such as classrooms, and informal settings, such as homes and museums. This volume also includes chapters on assessing design and creativity.

Globalisation and Education Reforms
Springer

This edited volume explores the multifaceted nature of teacher emotions, presenting current research from different approaches and perspectives, focused towards the second language classroom. Twenty three chapters by well-known scholars from the applied linguistics, TESOL and educational psychology fields provide the reader with a holistic picture of teacher emotions, making this collection a significant contribution to the field of second language teaching. Given the emotional nature of teaching, the book explores a number of key issues or dimensions of L2 teachers' emotions that

were until now rarely considered. The contributions present the views of a select group of applied linguistic researchers and L2 teacher educators from around the world. This international perspective makes the book essential reading for both L2 teachers and teacher educators.

Cooperative Stochastic Differential Games Springer Science & Business Media

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview

of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale.” Guangwei Hu, National Institute of Education, Singapore

Additional online resources are available at www.oup.com/elt/teacher/emi

Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university.

Blaschke Products and Their Applications
 Springer

If you are like most people, you may desire to achieve many financial goals such as owning assets, saving money for emergency purposes, protecting yourself and your loved ones with insurance, and many more. Nonetheless, achieving these goals with limited resources can be challenging, especially given the complexity of modern financial markets. In this fourth and latest edition, *Personal Financial Planning* expands on the

important skill of financial planning, covering more topics than before. This volume is designed to help you formulate financial goals and develop specific financial plans to achieve your goals. Topics covered in this volume include the benefits of personal financial planning, financial planning tools, managing credit, insurance planning, income tax planning, retirement planning, and personal financial risk management, among others. The authors are professionals with many years of experience in the field, and key terms and concepts are explained in a fuss-free manner with clear and relevant examples. This book is suitable for a wide range of audiences, including polytechnic students, undergraduates, MBA students, and those pursuing the Chartered Financial Analyst (CFA) and Chartered Financial Planning (CFP) qualifications as well as financial planners and advisers in banks, insurance and stock broking firms.

Maths Quest Springer

This book provides a comparative look at key issues that characterize and contextualize upper secondary science education in sixteen countries in Oceania, South America, Asia, Europe, North

America, Africa, and the Middle East, including links with elementary and early science, final assessment, and the secondary/tertiary education interface.

Mainstreaming Gender in Hong Kong Society Jacaranda

This book provides critical insights into the English-medium instruction (EMI) experiences which have been implemented at a number of universities in countries such as China, Finland, Israel, the Netherlands, South Africa, Spain and the USA, which are characterised by differing political, cultural and sociolinguistic situations. In particular, it reflects on the consequences of implementing EMI as an attempt to gain visibility and as a strategy in response to the need to become competitive in both national and international markets. The pitfalls and challenges specific to each setting are analysed, and the pedagogical issues and methodological implications that arise from the implementation of these programmes are also discussed. This volume will serve to advance our awareness about the strategies and tools needed to improve EMI at tertiary level.

[Chemistry in Context - Laboratory Manual](#)

Stationery Office Books (TSO)
 Socio-scientific issues (SSI) are open-ended, multifaceted social issues with conceptual links to science. They are challenging to negotiate and resolve, and they create ideal contexts for bridging school science and the lived experience of students. This book presents the latest findings from the innovative practice and systematic investigation of science education in the context of socio-scientific issues. Socio-scientific Issues in the Classroom: Teaching, Learning and Research focuses on how SSI can be productively incorporated into science classrooms and what SSI-based education can accomplish regarding student learning, practices and interest. It covers numerous topics that address key themes for contemporary science education including scientific literacy, goals for science teaching and learning, situated learning as a theoretical perspective for science education, and science for citizenship. It presents a wide range of classroom-based research projects that offer new insights for SSI-based education. Authored by leading researchers from eight countries across four continents, this

book is an important compendium of syntheses and insights for veteran researchers, teachers and curriculum designers eager to advance the SSI agenda.

DSE Mathematics (M2) Mock Exam Springer

Illustrating the effect of class relationships upon the institutionalizing of elaborate codes in the school, the papers in this volume each develop from the previous one and demonstrate the evolution of the concepts discussed.

DSE Math Extended Part(M2) Mock Exam Papers [Chinese and English Bilingual Version-for HK DSE Students]

Extensive coverage of topics *Each chapter includes numerous exercises

*Detailed answer key included *Each paper includes clearly explained solution manual

*Designed with reference to HKDSE curriculum *Can be used with courses or for self-learning or assessment

Emerging Practices in Scholarship of

Learning and Teaching in a Digital Era

Springer

This book explores the interrelationship between ideology, the state, and education reforms, placing it in a global context. It examines some of the major education reforms and policy issues in a global culture, particularly in light of recent shifts in quality and standards-driven education, and policy research. The book critiques the neo-liberal ideological imperatives of current education and policy reforms, and illustrates the way the shifts in the relationship between the state and education policy affect current trends in education reforms and schooling globally. With this as its focus, the book's individual chapters highlight hand-picked scholarly research on major discourses in the field of comparative education. A compendium of the very latest thinking on the subject, the book – like the other volumes in the series – offers a state-of-the-art sourcebook for researchers, practitioners and policymakers alike. Not only do the chapters offer a timely overview of current issues affecting comparative education and education policy research in what is now a global educational culture; they also outline

future directions that education and policy reforms could take. By doing so, they provide a comprehensive picture of the intersecting and diverse discourses of globalisation and policy-driven reforms in education. Individual chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, they address globalisation, ideology and democracy and examine both the reasons for and outcomes of education reforms and policy change. As such, they provide an informed critique of models of quality and standards-driven education reforms that are informed by Western dominant ideologies and social values.

Ofqual's Reliability Compendium Springer
This volume gives an up-to-date account of the language situation and social context in multilingual Hong Kong. After an in-depth, interpretive analysis of various language contact phenomena, it shows why it is such a tall order for Hongkongers to live up to the Special Administrative Region government's language policy goalpost, 'bilingualism and

trilingualism'. A detailed contrastive analysis between Cantonese and (a) English, (b) Modern Written Chinese, and (c) Putonghua helps explain the nature of the linguistic and acquisitional challenges involved. Economic forces and sociopolitical realities helped shape the 'mother tongue education' or 'dual Mol streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another Mol debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning experiences,

recommendations are made to help redress that social inequity problem.
Socio-scientific Issues in the Classroom
Springer

Numerical Optimization presents a comprehensive and up-to-date description of the most effective methods in continuous optimization. It responds to the growing interest in optimization in engineering, science, and business by focusing on the methods that are best suited to practical problems. For this new edition the book has been thoroughly updated throughout. There are new chapters on nonlinear interior methods and derivative-free methods for optimization, both of which are used widely in practice and the focus of much current research. Because of the emphasis on practical methods, as well as the extensive illustrations and exercises, the book is accessible to a wide audience. It can be used as a graduate text in engineering, operations research, mathematics, computer science, and business. It also serves as a handbook for researchers and practitioners in the field. The authors have strived to produce a text that is pleasant to read, informative, and

rigorous - one that reveals both the beautiful nature of the discipline and its practical side.

Teaching and Learning by Doing Corpus Analysis Springer

This book focuses on Hong Kong as a multilingual society. It investigates how trilingual education is implemented in Hong Kong primary schools. Based on a large scale survey of 155 Hong Kong schools and in-depth case studies in 3 selected schools, the book gives an overview of trilingual education in Hong Kong primary schools, revealing the views on trilingual education of all stakeholders: school principals, panel chairs, subject teachers, students, and parents. The research findings presented in this book suggest that the implementation of trilingual education varies significantly from school to school, as does the effectiveness of the trilingual education models used. It shows how students' views towards the use of different media of instruction (Mols) also vary, and how their mother-tongue backgrounds affect their perceptions. By documenting views, policies and implementation methods, the book provides insight into the practice of

trilingual education in Hong Kong and offers suggestions on potentially effective implementation methods.

Mathematics Counts Palgrave Macmillan

The book is an in-depth and comprehensive analysis of the case of language in education reform and language policy controversies of Hong Kong over the initial two decades after 1997. It is a scholarly monograph of conscientious educators and researchers who have been active during the education reform, collaborating with different parties on school development and classroom teaching experiments. This book provides a multiple-perspective investigation into the education and language matters. Besides socio-political perspectives, this book also emphasizes the frontline educational and practical perspectives. The book explores the benefits and effective methods of mother-tongue and multi-lingual teaching that have emerged in the period. Based on the problematic experience of language purism and bifurcation in the reform, the book argues for an inclusive multilingual education policy with mother-tongue as the core. This book provides potential

solutions and good practices to tackle the complex issues brought about by medium of instruction policy reforms in post-colonial times.

English Language Education and Assessment Springer Science & Business Media

Are teachers ready for inclusion? What is appropriate teacher education? Traditional approaches to inclusive education focused on learners with disabilities. Modern approaches, however, conceptualise inclusion in terms of providing educational equity and equality of access for all students within the same regular school system. Future Directions for Inclusive Teacher Education provides a wealth of ideas about how to support teachers to become inclusive through the application of positive training approaches. Written by some of the most influential internationally acknowledged experts in teacher education for inclusion and highly experienced researchers, together the authors provide a plethora of ideas for teacher educators to ensure that their training is pertinent, accessible, and futures-orientated. This up to date and accessible book combines three key areas

related to teacher education for inclusion, which provide: A review of what is happening across the globe by offering examples from different regions; Preparation for teachers to support learners with a range of diverse needs including disability, poverty, ethnicity, gender, cultural diversity, learning disabilities, Autism Spectrum Disorder, sensory impairments and those who are considered gifted and talented; A consideration of systemic approaches, policy, and partnerships, and how these can be better employed in the future. This

highly topical text will support all teaching professionals, educational systems, and schools in their transformation of inclusive teacher education.

Personal Financial Planning Multilingual Matters

This book discusses the recent assessment movements in the eastern and western worlds with particular focuses on the policies, implementation, and impacts of assessment reform on education. A new perspective of assessment sees assessment as a means to enhance learning. This book examines the tensions, challenges and outcomes (intended and

unintended) of assessment reform arising at the interface of policy and implementation, and implementation and student learning. The book reviews the experiences insights gained from research, and identifies the facilitators and hindrances to effective change. It reflects current thinking of assessment and provides the readers with ample background information of assessment development in many countries including USA, England, Scotland, Wales, Northern Ireland, Australia, Singapore, Taiwan, and Hong Kong.
