 What was it that flew over with such a terrifying roar? Was it, as many said, the devil, or was it that thing a few had heard of, a flying machine? And those electric lights at Jacob Gallo's farm, were they witchcraft or were they science? The theme of this harshly powerful novel is the impact of modern technology and ideas on a few isolated, tradition-bound hamlets in the aftermath of the Mexican Revolution of 1910. The old ways are represented by Epifanio Trujillo, the cacique of the region, now ailing and losing his grip on things; by ancient Madre Matiana, the region's midwife, healer, counselor, and oracle; by penniless Rómulo and his wife Merced. "Progress" is represented by Don

Epifanio's bastard son Jacob, who acquired money and influence elsewhere during the Revolution and who now, against his father's will, brings electricity, irrigation, fertilizers, and other modernities to the lean lands—together with armed henchmen. The conflict between the old and the new builds slowly and inexorably to a violent climax that will long remain in the reader's memory. The author has given psychological and historical depth to his story by alternating the passages of narrative and dialogue with others in which several of the major characters brood on the past, the present, and the future. For instance, Matiana, now in her eighties, touchingly remembers how she was married and widowed before she had reached her seventeenth birthday. This dual technique is superbly handled, so that people and events have both a vivid actuality and an inner richness of

meaning. The impact of the narrative is intensified by the twenty-one striking illustrations by Alberto Beltrán.

Horary is the branch of astrology that provides clear, specific answers to specific questions. Quick, simple, and accurate, horary was for centuries the most valuable tool in any astrologer's work-box. Whether the question be on love, career, illness - or predicting the weather for a barbecue, this clear and comprehensive guide by a modern master of horary shows you how to answer it. The first edition of this book quickly established itself as a classic of astrological teaching. Now this master of the craft shares his deepening understanding, bringing what he has learned in the intervening years of teaching and practice to clarify, expand upon, and correct the original text. With the wit and lucidity that characterise his writing, the author guides all from beginners to seasoned practitioners to the very heart of horary astrology. "Frawley's prowess as a horary astrologer is awesome." - The Mountain Astrologer.

This early work by Sigmund Freud was originally published in 1905 and we are now republishing it with a brand new introductory biography. 'Jokes and their Relation to the Unconscious' is a psychological work on the effects on the mind of jokes. Sigismund Schlomo Freud was born on 6th May 1856, in the Moravian town of Příbor, now part of the Czech Republic. He studied a variety of subjects, including philosophy, physiology, and zoology, graduating with an MD in 1881. Freud made a huge and lasting contribution to the field of psychology with many of his methods still being used in modern psychoanalysis. He inspired much discussion on the wealth of theories he produced and the reactions to his works began a century of great psychological investigation.

In the history, the very personality, of New York City, few events loom larger than the wave of immigration at the turn of the last century. Today a similar influx of new immigrants is transforming the city again. Better than one in three New Yorkers is now an immigrant. From Ellis Island to JFK is the first in-depth study that compares

these two huge social changes. A key contribution of this book is Nancy Foner's reassessment of the myths that have grown up around the earlier Jewish and Italian immigration—and that deeply color how today's Asian, Latin American, and Caribbean arrivals are seen. Topic by topic, she reveals the often surprising realities of both immigrations. For example: • Education: Most Jews, despite the myth, were not exceptional students at first, while many immigrant children today do remarkably well. • Jobs: Immigrants of both eras came with more skills than is popularly supposed. Some today come off the plane with advanced degrees and capital to start new businesses. • Neighborhoods: Ethnic enclaves are still with us but they're no longer always slums—today's new immigrants are reviving many neighborhoods and some are moving to middle-class suburbs. • Gender: For married women a century ago, immigration often, surprisingly, meant less opportunity to work outside the home. Today, it's just the opposite. • Race: We see Jews and Italians as whites today, but to turn-of-the-century scholars they were members of different, alien races. Immigrants today appear more racially diverse—but some (particularly Asians) may be changing the boundaries of current racial categories. Drawing on a wealth of historical and contemporary research and written in a lively and entertaining style, the book opens a new chapter in the study of immigration—and the story of the nation's gateway city.

Along with Wit, Charm, Health, and Courage, Princess Amy of Phantasmorania receives a special fairy christening gift: Ordinairiness. Unlike her six beautiful sisters, she has brown hair and freckles, and would rather have adventures than play the harp, embroider tapestries . . . or become a Queen. When her royal parents try to marry her off, Amy runs away and, because she's so ordinary, easily becomes the fourteenth assistant kitchen maid at a neighboring palace. And there . . . much to everyone's surprise . . . she meets a prince just as ordinary (and special) as she is! "This delightful fairy tale is sure to please young romantics . . . Neither Kaye's princess nor her book should be considered ordinary." (School Library Journal)

You live with your tribe in a pueblo village. It hasn't rained in a long time, and the crops are dying. If rain does not come soon, there will be no food to eat next winter. You have heard stories about spirits called Kachinas that help people. Kachinas are so powerful they might even be able to change the weather. You must go find the Kachinas, and save your village. Should you go alone, or bring friends to help you? The journey will be hard, and you must be brave.

This definitive edition of Columbus's account of the voyage presents the most accurate printed version of his journal available to date. Unfortunately both Columbus's original manuscript, presented to Ferdinand and Isabella along with other evidence of his discoveries, and a single complete copy have been lost for centuries. The primary surviving record of the voyage-part quotation, part summary of the complete copy-is a transcription made by Bartolome de las Casas in the 1530s. This new edition of the Las Casas manuscript presents its entire contents-including notes, insertions, and canceled text-more accurately, completely, and graphically than any other Spanish text published so far. In addition, the new translation, which strives for readability and accuracy, appears on pages facing the Spanish, encouraging on-the-spot comparisons of the translation with the original. Study of the work is further facilitated by extensive notes, documenting differences between the editors' transcription and translation and those of other transcribers and translators and summarizing current research and debates on unanswered current research and debates on unanswered questions concerning the voyage. In addition to being the only edition in which Spanish and English are presented side by side, this edition includes the only concordance ever prepared for the Diario. Awaited by scholars, this new edition will help reduce the guesswork that has long plagued the study of Columbus's voyage. It may shed light on a number of issues related to Columbus's navigational methods and the identity of his landing places, issues whose resolution depend, at least in part, on an accurate transcription of the Diario. Containing day-by-day accounts of the voyage and the first sighting of land, of the first encounters with the native populations and the first appraisals of his islands explored, and of a suspenseful return voyage to Spain, the Diario provides a fascinating and useful account to historians, geographers,

anthropologists, sailors, students, and anyone else interested in the discovery-or in a very good sea story. Oliver Dunn received the PH.D. degree from Cornell University. He is Professor Emeritus in Purdue University and a longtime student of Spanish and early history of Spanish America. James E. Kelley, Jr., received the M.A. degree from American University. A mathematician and computer and management consultant by vocation, for the past twenty years he has studied the history of European cartography and navigation in late-medieval times. Both are members of the Society for the History of Discoveries and have written extensively on the history of navigation and on Columbus's first voyage, Although they remain unconvinced of its conclusions, both were consultants to the National Geographic Society's 1986 effort to establish Samana Cay as the site of Columbus's first landing.

Una historia retomada de la tradición oral zapoteca en la que se narra por qué el coyote siempre le aúlla a la Luna. un conejo roba chiles en una huerta y el campesino le tiende una trampa para cazarlo. A punto de ser cocinado, el conejo ve al coyote, quien por ayudarlo toma su lugar y es batido. Así comienza una cadena de aventuras donde el astuto conejo burla una y otra vez al coyote. Con este libro el FCE da continuidad a un proyecto iniciado en 2005, cuando se publicó la Muerte pies ligeros, a fin de contribuir a la preservación de las lenguas indígenas. Se trata de una edición trilingüe, en español, zapoteco e inglés, y se publica en coedición con la Galería Arvil, en una edición empastada de la colección Tezontle.

The Conquest of America is a fascinating study of cultural confrontation in the New World, with implications far beyond sixteenth-century America. The book offers an original interpretation of the Spaniards' conquest, colonization, and destruction of pre-Columbian cultures in Mexico and the Caribbean. Using sixteenth-century sources, the distinguished French writer and critic Tzvetan Todorov examines the beliefs and behavior of the Spanish conquistadors and of the Aztecs, adversaries in a clash of cultures that resulted in the near extermination of Mesoamerica's Indian population.

What if everything we think we know about how the world works--our ideas of love, education, spirituality, work, happiness, and love--are based on Brules (bullsh*t rules) that get passed from generation to generation and are long past their expiration date? This book teaches you to think like some of the greatest non-conformist minds of our era, to question, challenge, hack, and create new rules for YOUR life so you can define success on your own terms. The Code of the Extraordinary Mind is a blueprint of laws to break us free from the shackles of an ordinary life. It makes a case that everything we know about the world is shaped by conditioning and habit. And thus, most people live their lives based on limiting rules and outdated beliefs about pretty much everything--love, work, money, parenting, sex, health, and more--which they inherit and pass on from generation to generation. But what if you could remove these outdated ideas and start anew? What would your life look like if you could forget the rules of the past, and redefine what happiness, purpose, and success mean for you? Not Just a Book, but a Movement Blending computational thinking, integral theory, modern spirituality, evolutionary biology, and humor, personal growth entrepreneur Vishen Lakhiani provides a revolutionary 10-point framework for understanding and enhancing the human self. You will learn about bending reality. You will learn how to apply unique models like consciousness engineering to help you learn and grow at speeds like never before. You will learn to make a dent in the universe and discover your quest. This framework is based on Lakhiani's personal experiences, the 5 million people he's reached through Mindvalley, and 200 hours of interviews and questions posed to incredible minds, including Elon Musk, Richard Branson, Peter Diamandis, Ken Wilber, Dean Kamen, Arianna Huffington, Michael Beckwith, and other legendary leaders. In a unique fusion of cutting-edge ideas, personal stories, irreverence, and a brilliant teaching style, Lakhiani reveals the 10 powerful laws that form a step-by-step process that you can apply to life to shed years of struggle and elevate yourself to exceptional new heights. The

10 Laws to an Extraordinary Life This book challenges conventional ideas of relationships, goal-setting, mindfulness, happiness, and meaning. In a unique fusion of cutting-edge ideas, personal stories, and humorous irreverence, and not to mention, humor and napkin diagrams, this framework combines computational thinking with personal growth to provide a powerful framework for re-coding yourself--and replacing old, limiting models that hold you back with new, empowering beliefs and behaviors that set you on the path toward an extraordinary life. A life of more happiness and achievement than you might have dared to dream possible. Once you discover the code, you will question your limits and realize that there are none. Step into a new understanding of the world around you and your place in it, and find yourself operating at a new, extraordinary level in every way...happiness, purpose, fulfillment, and love. «Si los adolescentes se muestran como seres enfurruñados y distantes es porque saben algo muy precioso que solo comparten entre ellos. Y ese algo es una revelación que duele». Por eso la poesía los alcanzo. El momento de las revelaciones ha llegado. Una de las experiencias más sorprendentes para un joven que se acerca por primera vez a la poesía peruana es descubrir que muchos autores empezaron a escribir e incluso a publicar a una edad muy próxima a la suya. Entre los veinte y veinticinco años publicaron Carlos Oquendo de Amat, Javier Heraud, Luis Hernández, José Watanabe y un largo etcétera que incluye al mismo Vallejo, quien publicó Los heraldos negros apenas cumplidos los 26. Me gustas tú es un libro cómplice donde conviven poetas peruanos y peruanas de distintas generaciones, estilos y tendencias, unidos todos por situarse -con humor, desconfianza y algo de incertidumbre- en esa «terra incognita» que constituye la adolescencia. Más que una historia de movimientos literarios, este libro muestra otra historia más íntima y modesta, pero también más inquietante y decisiva: la del proceso que convierte a un adolescente que se deja seducir por las palabras en un escritor de poemas. A lo mejor a ti es a

quien la poesía ha señalado con el dedo,
diciéndote en voz baja: «me gustas tú».
