The essential theme of the book is "career" as a fluid process. A career is not stagnant or simply a "job." A career is a process that needs to be nurtured, constantly grown, and managed. A career is an opportunity for nurses to find their voice and use it to promote both the individual and professional impact of their expertise. A career should be challenging, always giving way to more learning and mentoring opportunities. A career has the uniqueness of being a global concept. The intricacies of career development and management across the globe cannot be overlooked. A career journey ebbs and flows, one of the great characteristics of a professional nursing career. There are always options to consider on one's career path. There are always opportunities to gain experience and expertise in diverse areas, often never considered, by a professional nurse. The second edition of *Take Charge of Your Nursing Career* will provide a unique and distinct perspective on career development and management

for a nurse's complete career journey. The book covers timely and relevant topics, tips, strategies, and examples for professional nurses to use to develop and manage their careers from beginning to end. The topics discussed in the book are ones that professional nurses at all points on their career path are asking about and dealing with in their careers today and for their future. This "one stop shop" approach provides the professional nurse with a user-friendly book that can be referenced throughout their career, while also providing resources and applicable websites that they can access when they are needed as they create their personal career trajectory. Unique to this time, globally, as the Covid-19 pandemic, continues to impact our daily lives, career development and management has taken on even more importance to nursing professionals. New graduates are entering a nursing workforce where expectations are expanded and challenging. Many more experienced nurses have changed roles. Many nurses have seen their positions eliminated and are expected to change with the times, but without having the education or "skill set" and a "how to"

approach to make those changes.
