This volume offers a nuanced picture with specific instances of religion and politics in Muslim,

Jewish, Christian, Buddhist, and Hindu contexts, broadly presenting the phenomenon of religion and politics via country and thematic case studies. Qualitative, quantitative, material, philosophical, and theological analyses draw upon social theory to show how (and why) religion matters deeply in each time and place. The authors and contributors demonstrate

that religion is a significant force that drives societies and politics around the world, and that a radical change in the Western understanding of value-driven global politics is needed. Beyond the Death of God offers new, local voices to Western audiences—through essays that suggest the need for an appreciation of Divinity as a quintessence holding a significant

SAGE The study of Indian politics has witnessed a dramatic revival worldwide in the last few decades. There have been

significant developments in national politics since 2014 with the advent of the single-party majority government of the Bharatiya Janata Party, the first such majority since 1984. Moreover, the results of the 17th Lok Sabha (Lower House) election in India in 2019 have had major implications for the party system in India. In the light of these developments, The Oxford Handbook of Indian Politics

provides the most comprehensive, up-to-date coverage of the state of contemporary Indian politics. To that end, it examines the evolution of core institutions, processes, policies, and associated issues that are being debated in India's politics. It also provides historical contexts, discusses the state of the extant literature in each issue area, and suggests avenues for future

research. The contributors to this volume are all noted scholars and researchers in their respective fields of specialization located both in India and around the world. The major topics covered include the Constitution, citizenship, the houses of Parliament, the Cabinet, the judiciary, federalism and local governments, elections, parties and coalitions, secularism and minorities, caste, gender and migration, political violence, political finance, political economy, and foreign and defence policies. In effect, The Oxford Handbook of Indian Politics offers scholars, analysts, and students a sweeping overview of the current landscape of Indian politics, with particular attention to issues that have emerged over the past decade.

financial health of businesses and consumers to analyse the effectiveness of economic and business strategies. Rapid technological advancements along with the need for cost-effectiveness and convenience are making service providers embrace technology as a partner rather than a tool in their economic journey. Relatedly, traditional management philosophy is coming under a scanner, with an increasing emphasis on holistic development of the organization, rather than a top-down approach, as has been the case in the past. Understanding major developments in economic and financial policymaking has perennially been a key concern of public policy, shaped by recent global and related developments, this has necessitated a relook at these issues, couched in a cross-cutting perspective. Viewed from this standpoint, the present volume, written to honour the rich academic work of the eminent economist Professor Anindya Sen intersects this triad of economics, finance and public policy that are integral to policy thinking and its formulation. The smorgasbord of research ideas,

involving both theoretical analysis and empirical evidence, presented in this volume, provides useful perspectives on the drivers that are continually reshaping the dynamism in the world around us and, in the process, integrates a multidisciplinary perspective of focusing on several pertinent policy challenges. This book will be useful to researchers and students of economics,

finance and public policy, economic theorists, microeconomists, and even to those with a broader canvass such as researchers in macroeconomics, international economics, business, management and marketing. *Revolutions in Learning and Education from India* Rudra Publications The winners of the Nobel Prize show how economics, when done right, can help

us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and

inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed,

history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a

persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world. Cultural Heritage and Tourism Bloomsbury Publishing This book covers themes related to the geosphere, biosphere,

sociosphere and ecosphere dealing with changing geographical, environmental and socio-economic realities to plan a sustainable future for the northeast region (NER) of India. The NER consists of eight states—Assam, Arunachal Pradesh, Tripura, Nagaland, Manipur, Mizoram, Meghalaya and Sikkim—and they carry political, economic and social importance.

The book integrates the past, present and future of geospheric attributes incorporating progress towards the Sustainable Development Goals (SDGs) to meet the demands for improving human wellbeing under diverse and challenging socio-economic, political and environmental conditions. The key SDGs, as in food and agriculture, health, education, water, energy and other

overarching goals of the region, have yet to incorporate providing sustainable jobs and promoting equality and inclusive development, although there have been a few studies in that regard. The challenges to achieve SDGs in the NER are formidable compared to the rest of India. The NER has put a great deal of effort into achieving the SDGs, mainly in poverty (SDG-1), good health

(SDG-3), education (SDG-4), gender (SDG-5), decent work (SDG-8) and reduced inequalities (SDG-10), similar to the rest of the country. However, the standard development indicators such as road length, access to health care, power consumption and other measures are far below the national average. A multi-pronged strategy has played a pivotal role in the region, but development strategy to attain the SDGs 2030 must be more inclusive in empowering people with maximising self-governance, considering the resources, needs and aspirations of the people. This book evaluates the performance of the SDGs and fills in the gaps. It includes case studies focusing on different SDGs using advanced cartographic, statistical and GIS techniques and methods. It also provides unique findings that serve as valuable resources for planners and policy-makers so that a sustainable future in Northeast India can be achieved. *Perspectives on Economics and Management* Taylor & Francis Understanding the place of religion in Early Childhood Education and Care is of critical importance for the

development of cultural literacy and plays a key role in societal coherence and inclusion. This international handbook provides a comprehensive overview of the place of religion in the societal educational arenas of the very youngest children across the globe. Drawing together contributions from leading international experts across disciplinary backgrounds, it offers a critical view of how to

approach the complexities around the place of religion in Early Childhood Education and Care. Through its four parts, the book examines the theoretical, methodological, policy and practice perspectives and explores the complex intersections of transmission of "cultural heritage" and "national values" with the diverse, changing societal contexts. Each chapter contributes to

an increased understanding of how the place of religion in Early Childhood Education and Care can be understood across continents, countries and educational systems.
