Teaching Business, Economics and Enterprise 14-19 Oxford University Press, USA
 This pathbreaking collection of thirteen original essays examines the moral rights of the subjects of documentary film, photography, and television. Image makers--photographers and filmmakers--are coming under increasing criticism for presenting images of people that are considered intrusive and embarrassing to the subject. Portraying subjects in a "false light," appropriating their images, and failing to secure "informed consent" are all practices that intensify the debate between advocates of the right to privacy and the public's right to know. Discussing these questions from a variety of perspectives, the authors here explore such issues as informed consent, the "right" of individuals and minority groups to be represented fairly and accurately, the right of individuals to profit from their own image, and the peculiar moral obligations of minorities who image themselves and the producers of autobiographical documentaries. The book includes a series of provocative case studies on: the documentaries of Frederick Wiseman, particularly *Titicut Follies*; British documentaries of the 1930s; the libel suit of General Westmoreland against CBS News; the film *Witness* and its portrayal of the Amish; the film *The Gods Must be Crazy* and its portrayal of the San people of southern Africa; and the treatment of Arabs and gays on television. The first book to explore the moral issues peculiar to the production of visual images, *Image Ethics* will interest a wide range of general readers and students and specialists in film and television production, photography, communications, media, and the social sciences.

Success with Ethics Cambridge University Press

We once idolized tech entrepreneurs for creating innovations that seemed like modern miracles. Yet our faith has been shattered.

We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In *The Venture Alchemists*, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank, Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures—making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses, alongside many good intentions and moral compromises. But this story remains unfinished, and *The Venture Alchemists* ultimately offers hope from the people who, decades ago, warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.

Care is a human ability we all need for growing and flourishing. It implies considering the needs and interests of others, and the quality of how we relate to each other is often defined by care. While the value of care in private life is widely recognized, its role in the public sphere is contested and subject to political debates. In work organizations, instrumentality frequently overrides considerations for colleagues' and co-workers' well-being, while relationships are often sacrificed in the service of performance and meeting organizational targets. The questions this volume attempts to address concerns the organizational conditions that make care flourish and how a caring organization functions in practice. Specifically, we examine what it means to care for each other and what enhances caring behaviours in organizations. The volume ultimately focuses on how caring relations can contribute to making organizations better places. In this perspective, care involves the recognition of, and the limitations of, work as a key aspect of personal and social identity. Because care exceeds the sphere of individual intimacy, the book will also centre on the necessity for building caring institutions through a political process that considers the needs, contributions, and prospects of many different actors. This book aims to contribute to academic discussions on care in organizations, care work, business and organizational ethics, diversity, caring leadership, well-being in organizations, and research ethics. Managers, consultants, policy-makers, and students will find reflections about the goodness of care in organizations, and guidance about the ethical and practical difficulties of pursuing the project of building caring organizations.
