### JORDAN ENGLISH

#### Spiritual Connection in Daily Life Springer

This book provides the first broad yet thorough coverage of issues in morphological theory. It includes a wide array of techniques and systems in computational morphology (including discussion of their limitations), and describes some unusual applications. Sproat motivates the study of computational morphology by arguing that a computational natural language system, such as a parser or a generator, must incorporate a model of morphology. He discusses a range of applications for programs with knowledge of morphology, some of which are not generally found in the literature. Sproat then provides an overview of some of the basic descriptive facts about morphology and issues in theoretical morphology and (lexical) phonology, as well as psycholinguistic evidence for human processing of morphological structure. He takes up the basic techniques that have been proposed for doing morphological processing and discusses at length various systems (such as DECOMP and KIMMO) that incorporate part or all of those techniques, pointing out the inadequacies of such systems from both a descriptive and a computational point of view. He concludes by touching on interesting peripheral areas such as the analysis of complex nominals in English, and on the main contributions of Rumelhart and McClelland's connectionism to the computational analysis of words.

*Macro and Micro Perspectives* Bloomsbury Publishing

This book constitutes the thoroughly revised selected papers of the 8th International Conference on Information and Communication Technology in Teaching and Learning, ICT 2013, held in Hong Kong, China, in July 2013. The 21 revised papers presented were carefully reviewed and selected from various submissions. The papers are organized in topical sections such as management and application of open education resources, application of ICT in support of knowledge sharing, application of mobile devices and social media to knowledge sharing, knowledge sharing for teaching and learning.

*The Tyranny of Writing* Spartacus forlag

English for Specific Purposes (ESP), addressing the communicative needs and practices of particular professional or occupational groups, has developed rapidly in the past fifty years and is now a major force in English language teaching and research. This critical volume helps innovate the theory, practice, and methodology for ESP teaching and research in Asian countries and areas. Promoting communication and enhancing cooperation on ESP research and pedagogy across cultures, it provides ESP scholars, educators and practitioners with an opportunity to benefit from each other's research and expertise in an age of globalization and digitalization. The volume provides an in-depth analysis of the latest scholarship on English teaching and research for general and specific academic and occupational purposes; the intercultural communication in ESP contexts; corpus linguistics and data-driven instruction for ESP; computer-assisted language learning and mobile-assisted language learning; evaluation of English writing courses; and ESP translation strategies.

*A Foundation for Analysis in the Health Sciences* John Wiley & Sons

The ability to analyze and interpret enormous amounts of data has become a prerequisite for success in allied healthcare and the health sciences. Now in its 11th edition, *Biostatistics: A Foundation for Analysis in the Health Sciences* continues to offer in-depth guidance toward biostatistical concepts, techniques, and practical applications in the modern healthcare setting. Comprehensive in scope yet detailed in coverage, this text helps students understand—and appropriately use—probability distributions, sampling distributions, estimation, hypothesis testing, variance analysis, regression, correlation analysis, and other statistical tools fundamental to the science and practice of medicine. Clearly-defined pedagogical tools help students stay up-to-date on new material, and an emphasis on statistical software allows faster, more accurate calculation while putting the focus on the underlying concepts rather than the math. Students develop highly relevant

skills in inferential and differential statistical techniques, equipping them with the ability to organize, summarize, and interpret large bodies of data. Suitable for both graduate and advanced undergraduate coursework, this text retains the rigor required for use as a professional reference.

*Validating Technological Innovation* Springer

How things are divided up or pieced together matters. Half a bridge is of no use at all. Conversely, many things would do more good if they could be divided up differently: Perhaps you would prefer a job that involves a third less work and a third less pay or a car that materializes only when needed and is priced accordingly? Difficulties in "slicing" and "lumping" shape nearly every facet of how we live and work—and a great deal of law and policy as well. Lee Anne Fennell explores how both types of challenges—carving out useful slices and assembling useful lumps—surface in myriad contexts, from hot button issues like conservation and eminent domain to developments in the sharing economy to personal struggles over work, money, time, diet, and exercise. Yet the significance of configuration is often overlooked, leading to missed opportunities for improving our lives. With a technology-fueled entrepreneurial explosion underway that is dividing goods, services, and jobs in novel ways, and as urbanization and environmental threats raise the stakes for assembling resources and cooperation, this is an especially exciting and crucial time to confront questions of slicing and lumping. The future of the city, the workplace, the marketplace, and the environment all turn on matters of configuration, as do the prospects for more effective legal doctrines, for better management of finances and health, and more. This book reveals configuration's power and potential—as a unifying concept and as a focus of public and private innovation.

*A Dictionary of Arts, Sciences, and General Literature* Routledge

This book offers a comprehensive look at the current literatures and research based on empirical data from across different countries in Africa. It focuses on the work of leading scholars of management in and around Africa and the African Context, exploring whether we can at this point refer to 'African Management' as an emerging and distinct stream in the scholarly discourse in management. The main themes are macro and micro issues of Management in Africa, each chapter illustrating the historical or traditional view of Management in Africa versus the newer western business management perspective. This book presents current, in-depth, rigorous research and identifies future research and propositions, enabling scholars and students to gain an in-depth understanding of management as it is evolving and practiced in Africa.

*Slices and Lumps* Yellowreef Limited

The need to reform secondary-level education to prepare young people for new economic realities has emerged. In an age of constant career changing, cognitive flexibility is a top-priority skill to develop in today's students. This shift requires methodological innovation that enhances children's natural abilities as well as updated, focused teacher education in order to prepare them adequately. Educational Reform and International Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the development and implementation of IB curricula. Highlighting a wide range of topics including critical thinking, student evaluation, and teacher training, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students.

*Governance and Governmentality for Projects* A&C Black

This book demonstrates the value of approaching education from a sociological and philosophical perspective. Specifically, it addresses current and long-standing educational issues in the Asia-Pacific region, integrating sociological and philosophical insights with practical applications in four key areas: educational aims, moral education, educational policy, and the East-West dichotomy. It discusses educational aims in terms of rationality, philosophical thinking, and sustainable

development and presents the literary, religious, and analytical approaches to moral education. Four educational policies are then considered: Hong Kong's language policy, Hong Kong's policy on the internationalization of education, East Asia's policies on English education, and Australia's policy on teacher education. Different aspects of the East-West dichotomy are analysed: Confucian rationalism versus Western rationalism, Confucian learning culture versus Western learning culture, and Asian research methodology versus Western research methodology. Taken as a whole, the book shows that issues in education are rarely simple, and looking at them from multiple perspectives allows for rich and informed debates. It presents a rare philosophical and sociological analysis of the cultures and experiences of education in the Asia-Pacific region, and promotes research that leads to more culturally rooted educational policies and practice.

*Management in Africa* IGI Global

Questions about what to teach and how best to teach it are what drive professional practice in the English language classroom. Innovation and change in English language education addresses these key questions so that teachers are able to understand and manage change to organise teaching and learning more effectively. The book provides an accessible introduction to current theory and research in innovation and change in ELT and shows how these understandings have been applied to the practical concerns of the curriculum and the classroom. In specially commissioned chapters written by experts in the field, the volume sets out the key issues in innovation and change and shows how these relate to actual practice offers a guide to innovation and change in key areas grounded in research relates theory to practice through the use of illustrative case studies and examples brings together the very best scholarship in TESOL and language education from around the world This book will be of interest to upper undergraduate and graduate students in applied linguistics, language education and TESOL as well as pre-service and in-service teachers, teacher educators, researchers and administrators keen to create and manage teaching and learning more effectively.

*Discipline-Specific Writing* OECD Publishing

This volume identifies, problematizes, and discusses issues specific to the design of educational programs for teacher candidates from working class, ethnic- and language-minority, and immigrant backgrounds, taking as its starting point the distinctive, complex perspectives that these candidates bring to the university classroom.

*Overvåkingskapitalismens tidsalder* Springer Science & Business Media

Exploring contemporary issues and challenges facing education in East Asia, including recent reforms and global contexts, from China and Japan to Mongolia and Korea.

*Theory and Practice* Yellowreef Limited

The trade-investment-service-intellectual property (IP) nexus remains at the heart of economic development and the main features of which are global value chains (GVCs) and digitalisation. The protection of intellectual property rights (IPR) has become a critical issue not only for advanced economies but also for emerging markets. This edited volume contributes to the debates on IPR protection and economic development from the perspective of Association of Southeast Asian Nations (ASEAN) member states. The book provides insights into the mechanism and evidence on how effective IPR protection will increase economic and social welfare via promoting innovation activities and providing incentives to diffuse knowledge and transfer technologies. Written by economists and lawyers from the region, these experts share their latest findings and thoughts on how countries in Southeast Asia have been progressively improving IPR protection and increasing the interoperability of different IPR regimes through regional cooperation to facilitate business operations in the context of digital transformation.

*Morphology and Computation* Routledge

*Approaches to Specialized Genres* provides a timely update of the field of genre studies, with 14 cutting-edge contributions split into five sections using and integrating an exceptionally wide variety of methods and perspectives (such as ESP genre research, corpus linguistics, systemic functional linguistics, ethnographic and multimodal research) to analyse genres in written, spoken, visual and auditory modes across a multiplicity of pedagogic, professional and digital settings. It highlights and illustrates the growing trend of a multiperspective and inter-theoretic approach to genre studies and demonstrates how such methodological rigour can extend our knowledge of language, in general, and genres, in particular. It also examines a rich variety of underexplored genres such as the digital genre of synchronous videoconferencing, instructional slides, video ads, engineers' training log book entries, the narrative story genres, fundraising letters and retraction notices. It demonstrates not only the prominent value of genre research, but wide applications of genre knowledge in various educational and professional domains. The book brings together experts spreading across the world, including countries in South-East Asia, Europe, America, West Africa and South America.

Accordingly, it will appeal to readers of diversified socio-cultural backgrounds working in all the aforementioned inter-related fields of applied linguistics and communication studies.

**Ten-year Supplement, 1956-1965** Multilingual Matters

In an era of climate change, the need to manage our water resources effectively for future generations has become an increasingly significant challenge. Indigenous management practices have been successfully used to manage inland water systems around the world for thousands of years, and Indigenous people have been calling for a greater role in the management of water resources. As First Peoples and as holders of important knowledge of sustainable water management practices, they regard themselves as custodians and rights holders, deserving of a meaningful role in decision-making. This book argues that a key (albeit not the only) means of ensuring appropriate participation in decision-making about water management is for such participation to be legislatively mandated. To this end, the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation, consultation and representation in the water management landscape.

*Disability Studies* IGI Global

Med sine "gratis" tjenester har giganter som Google og Facebook gitt oss et tilbud vi ikke kunne takke nei til. Til gjengjeld forsyner de seg med enorme mengder data om vår oppførsel og

preferanser, som de ganske uforstyrret selger videre til høystbydende. Det er dette Shoshana Zuboff kaller overvåkingskapitalisme, et fenomen som truer med å omforme samfunnet like mye som den industrielle revolusjonen gjorde på 1800-tallet. I overvåkingskapitalismens tid er vi ikke bare konsumenter, vi utgjør selve råvaren. Den skjulte og stadig mer sofistikerte bruken av dataene om oss bidrar ikke bare til å gi oss skreddersydd innhold og reklame. Den er blitt et verktøy til å forutsi og påvirke vår atferd, både som kunder, borgere og som velgere. Og den utgjør en mektig trussel mot så vel demokratiet som vår personlige frihet. Shoshana Zuboff er filosof, sosialpsykolog og professor emerita ved Harvard Business School. Hennes tre tidligere bøker har alle åpnet dører til ny forståelse av hvordan teknologien påvirker mennesket.

**Ideologies of the Written Word** Tata McGraw-Hill Education

Offers a wide-ranging overview of the issues and research approaches in the diverse field of applied linguistics Applied linguistics is an interdisciplinary field that identifies, examines, and seeks solutions to real-life language-related issues. Such issues often occur in situations of language contact and technological innovation, where language problems can range from explaining misunderstandings in face-to-face oral conversation to designing automated speech recognition systems for business. The Concise Encyclopedia of Applied Linguistics includes entries on the fundamentals of the discipline, introducing readers to the concepts, research, and methods used by applied linguists working in the field. This succinct, reader-friendly volume offers a collection of entries on a range of language problems and the analytic approaches used to address them. This abridged reference work has been compiled from the most-accessed entries from The Encyclopedia of Applied Linguistics ([www.encyclopediaofappliedlinguistics.com](http://www.encyclopediaofappliedlinguistics.com)), the more extensive volume which is available in print and digital format in 1000 libraries spanning 50 countries worldwide. Alphabetically-organized and updated entries help readers gain an understanding of the essentials of the field with entries on topics such as multilingualism, language policy and planning, language assessment and testing, translation and interpreting, and many others. Accessible for readers who are new to applied linguistics, The Concise Encyclopedia of Applied Linguistics: Includes entries written by experts in a broad range of areas within applied linguistics Explains the theory and research approaches used in the field for analysis of language, language use, and contexts of language use Demonstrates the connections among theory, research, and practice in the study of language issues Provides a perfect starting point for pursuing essential topics in applied linguistics Designed to offer readers an introduction to the range of topics and approaches within the field, The Concise Encyclopedia of Applied Linguistics is ideal for new students of applied linguistics and for researchers in the field.

Routledge

The aim of the Handbook is to present readily accessible, but scholarly sources of information about educational research in the Asia-Pacific region. The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing, the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising, the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified. Thus, the articles do not involve the reporting of newly conducted research, but rather require a synthesis of the research undertaken in a particular area, with reference to the research methods employed and the theoretical frameworks on which the research is based. In general, the articles do not advocate a single point of view, but rather, present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore, it should be noted, that the Handbook is not concerned with research methodology, and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region.

*Asian Research on English for Specific Purposes* Springer

This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula, as well as the huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong, whereby all examinations from 2012 onwards are marked onscreen, to quality control issues in the administration of China's College English Test, which is taken by over 10 million candidates every year.

**Shifting the Locus of Learning in Urban Teacher Education** Routledge

*Discipline-Specific Writing* provides an introduction and guide to the teaching of this topic for students and trainee teachers. This book highlights the importance of discipline-specific writing as a critical area of competence for students, and covers both the theory and practice of teaching this crucial topic. With chapters from practitioners and researchers working across a wide range of contexts around the world, *Discipline-Specific Writing: Explores teaching strategies in a variety of specific areas including science and technology, social science and business; Discusses curriculum development, course design and assessment, providing a framework for the reader; Analyses the teaching of language features including grammar and vocabulary for academic writing; Demonstrates the use of genre analysis, annotated bibliographies and corpora as tools for teaching; Provides practical suggestions for use in the classroom, questions for discussion and additional activities with each chapter. Discipline-Specific Writing is key reading for students taking courses in English for Specific Purposes, Applied Linguistics, TESOL, TEFL and CELTA.*
