Scientific Basis for Ayurvedic Therapies Elsevier

This groundbreaking work calls for the overhaul of traditional Ayurveda and its transformation into a progressive, evidence-based practice. This book begins by looking back at the research of the last three centuries, Indian medicinal plants, and Ayurveda in a twenty-first-century context. The first part of this book explores the limitations of contemporary Ayurvedic pharmacognosy and pharmacology, discussing the challenges the practice faces from research and clinical trials. It makes a compelling argument for the necessity of change. The second part of the book defines and elaborates upon a new, scientific path, taking the reader from identification of the herb through all stages of drug development. An essential tool for herbal drug development, this text is designed for knowledgeable students, practitioners, and scholars of Ayurveda, pharmacy, and herbal medicine.

Traditional Herbal Remedies for Primary Health Care

Routledge

Regulatory affairs and pharmacological drug safety issues of Ayurvedic medicine has been overlooked by practitioners for many years. Research in Ayurveda is now a world-wide phenomenon, and several large pharmaceutical corporations are investing money for novel drug discovery from Ayurvedic sources. This book examines the regulatory and pharmacological aspects and includes extensive data on scientific evaluation carried out on Ayurvedic formulations. It will also serve as a reference book on standardization, pre-clinical studies, and clinical and toxicological studies on Ayurvedic formulations.

Ayurvedic Pharmacopoeia of India Springer Science & Business Media

This book on medicinal plant biotechnology covers recent developments in this field. It includes a comprehensive up-to-date survey on established medicinal plants and on molecules which gained importance in recent years. No recently published book has covered these carefully selected topics. The contributing scientists have been selected on the basis of their involvement in the related plant material as evident by their internationally recognised published work.

The Siddha Pharmacopoeia of India CRC Press

Ayurvedic Pharmacopoeial Plant Drugs: Expanded Therapeutics is the first review of all the therapeutic sections of 456 plant drugs in the first six volumes of the Ayurvedic Pharmacopoeia of India. It covers pharmacognosy of classical Ayurvedic herbs, their chemical constituents, therapeutic uses, and doses on the basis of contemporary scientific literature. The book reviews the classical attributes, compounds, and textual references of Ayurvedic plant drugs and updates the pharmacopoeial attributes of Ayurvedic herbs and formulations to make them more industry-oriented and facilitate their implementation. Sanskrit terminology has been converted into English equivalents, and botanical names assigned to Ayurvedic herbs in the text have been reviewed in historical as well as contemporary contexts. This will assist those who are not conversant with Sanskrit or have found multiple names of the same herb in Ayurvedic reference works and in different regions of India. With these salient features, this book provides an added scientific edge to the new generation of Ayurvedic students, faculty members, researchers, and enterprising phytopharmaceutical scientists. In addition, the scientific temper of this resource will help unravel many of the intricacies of classical Ayurveda.

Powdered Crude Drug Microscopy of Leaves and Barks

Springer Science & Business Media

Herbal medicines constitute the main component of traditional medicine, which have been used for thousands of years. They have made significant contribution to human health through their health promotive, curative and rehabilitative properties and in the prevention of illnesses. Indeed, many herbal remedies used traditionally have become modern medicines through drug development. Digoxin, morphine, colchicine, and artemisinin are some notable examples. Long tradition of use of many herbal remedies and experiences passed on from generation to generation has brought about reliance by the people on herbal medicines. At present, the use of herbal medicinal plants for health products is increasing worldwide. This publication contains 28 monographs on common ailments which can be readily treated with simple herbal remedies. They can be prepared easily and used within the ambit of primary health care. Each monograph provides description of the ailment, the form of traditional preparation, its composition, English name, Latin name and family of the plant, plant part used, main chemical constituents, quality standards, method of preparation, dosage form, therapeutic properties, indications and uses, dose and mode of administration, precautions and safety aspects, and important references. This manual can be used by health planners, policy makers, national and district health authorities and others involved in the health sector development and reform. It is also an attempt to increase availability and accessibility to cost-effective treatment of commonly encountered health problems with herbal remedies. It will be useful for education and training of community health workers as well.

The seventh edition of the Indian Pharmacopoeia (IP 2014) is published by the Indian Pharmacopoeia Commission (IPC) on behalf of the Government of India, Ministry of Health & Family Welfare. The Indian Pharmacopoeia (IP) is published in fulfilment of the requirements of the Drugs and Cosmetics Act, 1940 and Rules thereunder. It prescribes the standards for drugs produced

and/or marketed in India and thus contributes in the control and assurance of the quality of the medicines. The standards of this pharmacopoeia are authoritative and legally enforceable. It intends to help in the licensing of manufacturing, inspection and distribution of medicines. IP is published in continuing pursuit of the mission of IPC to improve the health of the people through ensuring the quality, safety and efficacy of medicines. The Commission has been receiving significant inputs from regulatory, industrial houses, academic institutions, national laboratories, individual scientists and others. Publication of IP at regular and shorter intervals is one of the main mandates of the Commission. The seventh edition of Indian Pharmacopoeia is published in accordance with the principles and designed plan decided by the Scientific Body of the IPC. To establish transparency in setting standards for this edition the contents of new monographs, revised appendices and other informations have been publicized on the website of the IPC, besides following conventional approach of obtaining comments. The feedback and inputs were reviewed by the relevant Expert Committee to ensure the feasibility and practicability of the standards and methods revised. The principle of "openness, justice and fairness" is kept in mind during compiling and editing the contents of this edition. The Indian Pharmacopoeia 2014 is presented in four volumes. The scope of the Pharmacopoeia has been extended to include products of biotechnology, indigenous herbs and herbal products, veterinary vaccines

The Ayurvedic Pharmacopoeia of India [New Delhi] : Government of India, Ministry of Health and Family Planning, Department of Health

Ayurveda or "the sacred knowledge of longevity" has been practiced in India and many Asian countries since time immemorial. Interest in Ayurveda started growing all over the world in the late 1970s, following the Alma Ata Declaration adopted by the W.H.O. in 1978. Ayurveda in the New Millennium: Emerging Roles and Future Challenges attempts to survey the progress made in this field and to formulate a course of action to take Ayurveda through the new millennium. It also identifies the many stumbling blocks that need to be removed if Ayurveda is to cater to the needs of a wider audience. Features: Newer insights into the history of Ayurveda Regulatory aspects of the manufacture of ayurvedic medicines Industrial production of

traditional ayurvedic medicines Quality control The scientific rationale of single herb therapy Biological effects of ayurvedic formulations Optimization of ancient wisdom and newer knowledge Conservation of threatened herbs Nutraceuticals and cosmeceuticals from Ayurveda Critical view of Ayurveda in the West Direction for the Ayurveda renaissance Ayurveda in the New Millennium: Emerging Roles and Future Challenges describes the strength of Ayurveda and how to usher in the Ayurveda renaissance. This book will be of interest to proponents of Ayurveda and all branches of traditional and alternative medicine. Experts from the fields of medicine, pharmacology, new drug discovery and food technology will also find it useful.

Powdered Crude Drug Microscopy of Leaves and Barks

investigates various microscopic techniques used in the

examination of structural and cellular features in order to determine their botanical origin. These methods are useful in identifying species with similar morphological characters. Today, there is a variety of methods available to authenticate herbal drugs, ranging from simple morphological examination to physical and chemical analysis, and DNA molecular biology. Due to cost, powder microscopy is the most practical method for primary authentication. Botanical microscopy is a unique, valuable, rapid and cost-effective assessment tool, and plays an important role in the authentication and assessment of medicinal plants. This book is an essential resource for students and researchers involved in the study of plants and natural products, as well as professionals in industries manufacturing plant-based products for use during quality control and assurance steps. Provides a fundamental understanding of the macroscopic and microscopic characteristics of crude drugs, including photographs of herbs in their raw and powder forms. Presents specific characteristics and sub-features for identifying barks and leaves, including stone cells, calcium oxalate crystals, starch grains, medullary rays, fibres, sclereids, cork, isolated oil cells, tubular lactiferous canals, phloem parenchyma, masses, rhytidoma, parenchyma and secretory canals. Includes specific characteristics for identifying leaves, such as epidermis, stomata, trichomes, calcium oxalate crystals, fibres, cell contents, cystoliths, lamina, starch grains, tracheids, lactiferous canals and xylem vessels. Demonstrates how the specificity of characteristics for a particular bark or leaf in powder form can lead to its authentication. Features standard operating protocols for preparation of slides and lab samples using industrially operated grinders to observe general as well as distinguishing microscopical characters of barks and leaves. The Ayurvedic Pharmacopoeia of India World Health Organization In an easy to use dictionary style of A-Z presentation, this volume lists the taxonomy and medicinal usage of Indian plants. Also given are both traditional Indian and international synonyms along with details of the habitats of the plants. This book, illustrated by over 200 full-color figures, is aimed at bringing out an updated Acute Study Dictionary of plant sources of Indian medicine. The text is based on authentic treatises which are the outcome of scientific screening and critical evaluation by eminent scholars. The Dictionary is presented in a user-friendly format, as a compact, handy, easy to use and one-volume reference work.

Indian Pharmacopoeia, 2007 Routledge

Arguably the oldest form of health care, Ayurveda is often referred to as the "Mother of All Healing." Although there has been considerable scientific research done in this area during the last 50 years, the results of that research have not been adequately disseminated. Meeting the need for an authoritative, evidence-based reference, Scientific Ba

The Ayurvedic Formulary of India CRC Press

Updated and revised throughout. Second Edition explores the chromatographic methods used for the measurement of drugs, impurities, and excipients in pharmaceutical preparations--such as tablets, ointments, and injectables. Contains a 148-page table listing the chromatographic data of over 1300 drugs and related substances--including sample matrix analyzed, sample handling procedures, column packings, mobile phase, mode of detection, and more.

... Kruger Brentt Publisher Uk. Limited

The Indian population has used Ayurvedic herbs for centuries, but now modern scientific work has led to recognition and acceptance at a global level. The major cause of the increased popularity of Ayurvedic medicine stems from recent scientific validation and its potential in lifestyle management. This growth in research in India and worldwide has created the need for a resource covering the scientific development of Ayurvedic herbs for practice during the postclassical period. The Modern Ayurveda: Milestones Beyond the Classical Age explores a host of topics essential to understanding the surge of scientific work now being conducted on this ancient practice. A one-point source for the modern explorer attempting to appreciate the transformation of Ayurveda from an empirical to a rationalist understanding, the book enumerates more than 400 Ayurvedic herbs with compiled information including their botanical name, common Ayurvedic name and family, their attributes, chemical constituents, phytochemical markers, pharmacological actions, and their interactions and toxicity. It explores current research methodologies for the evaluation of efficacy and safety of herbal medicine and discusses the contemporary international regulatory status of herbal drugs. Ayurvedic medicine can be better understood and utilized through the application of modern scientific analytical tools for standardization, modern pharmacological tools for safety and efficacy evaluation, and the application of biotechnology to elicit the mechanism of drug actions. Bringing Ayurveda into the 21st century, this volume will inform further progress and open new doors to treatment.

The Book Covers Complete Details Of Ayurvedic Medicines With Formulae And The Chapters Covered In This Book Are: Herbal Medicine, Herbs, General Directions For The Preparation And Use Of Herbs, Tonic Herbs, Herbs Used To Treat Disease, Churna Powder, Mishra Churna, Asava-Medicated Wine, Quatha-Decocotion, Guti-Vati Tablets, Guti-Vati Rasa Mercurial And Other Tablets, Guti Vati Suvarnyukta Tablets Containing Gold Bhasma, Parpati Vati Parpati Tablets, Pishti Fine Processed Powder, Bhasma (Calx), Kupipakwa Rasayana, Ghana Avaleha And Paka, Pravahi Avaleha (Syrups), Taila, Siddha Taila (Medicated Oils), Ghrita-Ghee Medicated Ghee, Sattva, Parpati, Malahara (Ointment), Other Preparations Kshara-Lepa Guti-Manjana Modaka, Putapaka, Upanaha-Varti Etc.

The Ayurvedic Pharmacopoeia of India

The Ayurvedic Pharmacopoeia of India recommends dosage of medicinal plants (crude herbs). In this book an effort has been made to present authentic treatises, the outcome of scientific screening and evaluation of the individual medicinal plants from Western Ghats with reference to research publications as cited from the original source aiding the reader to consult the source. As part of about a few hundred medicinal plants, this volume details those medicinal plants starting with alphabets A and B. I would like to indicate that this is a sincere effort of presenting research on medicinal plants in a format wherein its different aspects have been compiled and presented so a the reader could access it in one go.
