Speaking is a central yet complex area of language acquisition. The assessment of this crucial skill is equally complex because of its interactive nature. This book takes teachers and language testers through the research on the assessment of speaking as well as through current tests of speaking. The book then guides language testers through the stages of test tasks, rating practices and design.

Examining Reading Multilingual Matters
This publication highlights the need for test developers to provide clear explanations of the ability constructs which underpin tests offered in the public domain. An explanation is increasingly required or if the validity of test score interpretation and use are to be supported both logically and with empirical evidence. The book demonstrates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines Cambridge ESOL writing tasks from the following perspectives: Test Taker,

Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.

let's listen to / the green voice / of the rainforest The animals of the Iguazú speak for themselves, creating a collection of poems that will resonate with readers of all ages. In the magical rainforest of the Iguazú National Park, butterflies are the multicolored flowers of the air. Great dusky swifts watch over the park, and the untamed spirits of jaguars roam the jungle. Spanning three countries--Argentina, Brazil, and Paraguay--the thundering waterfalls and lush green rainforests of the Iguazú have dazzled visitors for centuries, and are now in danger of being lost. Following the Amerindian oral tradition, award-winning Chicano poet Francisco X. Alarcón lets the animals of the Iguazú speak for themselves in their own soaring, roaring, fluttering voices, and the resulting poems are as urgent as they are beautiful and humorous. Maya Christina Gonzalez's mixed media illustrations bring the colors and textures of the Iguazú rainforest to vibrant life.

The importance of the Low Countries as a centre for the study of foreign languages is well-known. The mutual relationship between the Dutch grammatical tradition and the Western European context has, however, been largely neglected. In this collection of papers on the history of linguistics in the

Low Countries the editors have made an effort to present the Dutch tradition in connection with that of the neighbouring countries. Three articles by Claes, Dibbets and Klifman deal with the earliest stages of the development of a grammar for the Dutch vernacular. Several important European figures worked in the Low Countries; their contribution to linguistics is discussed in articles on Vossius (Rademaker), Spinoza (Klijnsmit), and one of the most original phoneticians of European linguistics, Montanus (Hulsker). Vivian Salmon's article is a survey on the relations between English and Dutch linguistics in the field of foreign language teaching. In the 19th century Dutch linguistics had a special relationship with German general and historical linguistics; four articles deal with this period (Jongeneelen, van Driel, le Loux-Schuringa, Noordegraaf). Finally, there are three articles by Kaldewij, Hagen and van Els/Knops on the development of three branches of linguistics in the 20th century: structuralism, dialectology and applied linguistics. This volume should be of interest for all specialists in the history of linguistics in Europe, who are interested in the interdependence of the various traditions.

Hydrocolloids are among the most widely used ingredients in the food industry. They function as thickening and gelling agents, texturizers, stabilisers and emulsifiers and in addition have application in areas such as edible coatings and flavour release. Products reformulated for fat reduction are particularly dependent on hydrocolloids for satisfactory sensory quality. They now also find increasing applications in the health area as dietary

fibre of low calorific value. The first edition of Handbook of Hydrocolloids provided professionals in the food industry with relevant practical information about the range of hydrocolloid ingredients readily and at the same time authoritatively. It was exceptionally well received and has subsequently been used as the substantive reference on these food ingredients. Extensively revised and expanded and containing eight new chapters, this major new edition strengthens that reputation. Edited by two leading international authorities in the field, the second edition reviews over twenty-five hydrocolloids, covering structure and properties, processing, functionality, applications and regulatory status. Since there is now greater emphasis on the protein hydrocolloids, new chapters on vegetable proteins and egg protein have been added. Coverage of microbial polysaccharides has also been increased and the developing role of the exudate gums recognised, with a new chapter on Gum Ghatti. Protein-polysaccharide complexes are finding increased application in food products and a new chapter on this topic as been added. Two additional chapters reviewing the role of hydrocolloids in emulsification and their role as dietary fibre and subsequent health benefits are also included. The second edition of Handbook of hydrocolloids is an essential reference for post-graduate students, research scientists and food manufacturers. Extensively revised and expanded second edition edited by two leading international authorities Provides an introduction to food hydrocolloids considering regulatory aspects and thickening characteristics
Comprehensively examines the manufacture, structure, function and

applications of over twenty five hydrocolloids

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

Intriguing. Absorbing. A truly eye-opening glimpse into the world's most mysterious and fascinating country. North Korea is a land of unrivalled natural beauty with more than 5,000 years of history and culture. From the top of mythical Mount Paekdu to the lush valleys and the incredible rock formations of stunning Mount Kumgang, and from the white beaches of the East Sea to the hidden getaways on the West coast, the DPRK's natural attractions are now finally starting to be recognized.

This resilient land has lived through many periods of historical significance, yet its people have always maintained their dignity and humility. The veil that has until now shrouded places such as Pyongyang, Mount Myohyang, Kuwol and Nampo has been lifted, and the imagery that is being revealed will astonish the mind of even the most experienced travellers. The power of each image carefully challenges the way in which we look at this land and its people. For many of us, this is the first time we see the North Korean people as they truly are. The only question remaining is, why was such an insightful photographic record not published much earlier?

The assessment of language learners is having a growing impact in English language teaching and applied

linguistics. A formal evaluation of students writing abilities is important for language teachers in order to assess the pedagogical needs of their students. While there has been a considerable body of work undertaken on assessing the writing abilities of native speakers, the issues surrounding the assessment of second language learners writing abilities are still emerging. At present, no one volume has explored these issues and their implications for language teaching practitioners wishing to evaluate their students writing. This book outlines in an accessible manner the major tenets of research in the field and provide language teachers with guidelines to design and develop suitable writing assessment tasks for their students.

The IB English Ab Initio Student Portfolio is an interactive practice and revision

resource that helps the students prepare for the four assessment components of this language acquisition course. With the help of 321 questions and 321 answer tables that cover the complete Ab Initio course, the students will be able to fully develop their personalized answers and thus establish an organic Portfolio of their learning. The answer tables in the Portfolio apply to reading, writing, listening and speaking, and the Portfolio is also supported by online resources on the author's personal website. The IB English Ab Initio Student Portfolio is best used together with the Language Ab Initio Student Workbook but can also be used independently, both in the classroom and at home. [Testing the Untestable in Language Education](#) Hachette UK

The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research. This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered: learner autonomy,

intercultural competence, literature and literary competence, and the integration of content and language learning. Each area is considered through a theoretical framework, followed by two empirical studies, raising questions of importance to all language teachers: How can one test literary competence? Can intercultural competence be measured? What about the integrated assessment of content-and-language in CLIL and teaching? Is progress in autonomous learning skill gaugeable? The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign language competence. "The title of this book is well chosen. Despite the apparent oxymoron, this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles. This book will open new options for testers, for teachers and for those who make policy decisions." Michael Byram, School of Education, University of Durham, UK
