VIII Congresso nazionale di archeologia medievale. Pré-tirages (Matera, 12-15 settembre 2018). Vol. 3 Oxford University Press

Looking beyond the border of one's own legal system is to embark on a journey with the promise of gaining knowledge of foreign legal systems, as well as a fresh perspective one's home system. This book guides students, academics, and lawyers on this journey, and shows that ideas developed elsewhere can be a treasure trove of inspiration for national courts, legislators, and legal practitioners. A particular concern for the book is to include non-Western countries in this endeavor. The first part of the book looks at the origins, purposes, and methods of comparative law, and it discusses the process of transplanting and receiving legal concepts, along with the potential pitfalls involved, using examples stretching from the reception of Roman law in Europe to the comparatively new phenomenon of European private law. The second part considers select legal systems, starting with the two most influential legal traditions, the civil law and the common law. The book examines their historical background and impact, the main sources of law, the predominant methods of dispute resolution, and the players shaping them. Then, it moves on to the legal systems in East Asia that are playing an increasingly important role in today's world, namely China, Japan, and South Korea. The book also takes a close look at those legal systems shaped by a major world religion, in particular Saudi

Arabia, the United Arab Emirates, and Israel. It closes with an Annex on how to write a thesis using the comparative law method. [Subject: Comparative Law, Private Law]

Andrology for the Clinician consists of two parts: In Part One, the busy clinician can easily find the problem-orientated information he or she needs on such issues as male factor fertility problems, male contraception, and male genital tract infection and tumours. Part Two contains in-depth subject-orientated information and adds important scientific background information to the recommendations received in Part One. Several leading experts have contributed to this work, which has been extensively subedited by world-renowned editors to ensure a well-structured didactic design and homogeneous content. This outstanding book is of great value for all Urologists, Andrologists, Dermatologists, Endocrinologists, Gynaecologists, Reproductive Biologists, GPs, Gerontologists, Psychologists, Psychiatrists, Paediatricians and anyone else interested in the problems of male sex and constitution.

In 2001, we gathered a group of researchers in Nice, France to focus discussion on performance measurement and management control. Following the success of that conference, we held subsequent conferences in 2003, 2005, 2007, and 2009. This title contains some of the exemplary papers that were presented at the most recent conference.

The protracted economic crisis since 2008, terrorist attacks, and mass immigration have been changing our democracies during the first decades of this century. The crucial questions which emerge are how and why these phenomena had an impact on the effective implementation of the two critical democratic values, freedom and equality, as well as the impact of the European Union. The book analyses France, Germany, Italy, Poland, Spain, and the United Kingdom in the 1990-2020 period, and reveals a pattern of relative decline in these values. The book explores the demand for equalities and freedoms by citizens and the political commitments of party leaders, as well as how and why equalities and freedoms are affected by domestic aspects, and the role of external factors. In doing so, *Equality, Freedom and Democracy* demonstrates three different paths for the future of democracy; balanced democracy, protest democracy, and unaccountable democracy. Book jacket.

VI SOCRATES: I think that we ought to stress that we will write only about things that we have first hand experience in, in a coherent way that will be useful to engineers and other scientists and stressing the formulation without being too mathematical. We should write with integrity and honesty, giving reference to other authors where reference is due, but avoiding mentioning everybody just to be certain that our book is widely advertised. Above all, the book should be clear and useful. PLATO: I think we should include a good discussion of fundamental ideas, of how integral equations are formed, pointing out that they are like two dimensional shadows of three dimensional objects, ... SOCRATES: Stop there! Remember you are not 'the' Plato! PLATO: Sorry, I was carried away. ARISTOTLE: I think that the book should have many applications so that the reader can learn by looking at them how to use the method. SOCRATES: I agree. But we should be careful. It is easy to include many illustrations and examples in a book in order to disguise its meagre contents. All examples should be relevant. ARISTOTLE: And we should also include a full computer program to give the reader if so he wishes, a working experience of the technique.

In questo anno, il 2023, il Ministero degli Affari Esteri e della Cooperazione Internazionale ha scelto di dedicare la XXIII Settimana della lingua italiana nel mondo all'italiano e la sostenibilità. È una scelta importante, che sottolinea come il tema della sostenibilità, nelle sue varie curvature, vada affrontato anche con il contributo della lingua; e, va sottolineato, anche con il contributo - essenziale - della lingua italiana. Il movimento di sostegno, promozione e azione a favore di uno sviluppo sostenibile è globale e pertanto internazionale, e quindi linguisticamente dominato dall'inglese. Ma perché una politica di sostenibilità sia realmente realizzabile è necessario coinvolgere tutti i cittadini, a ogni livello, perché soltanto con una reale e cosciente condivisione generale un così difficile risultato può essere raggiunto; e per avere l'appoggio di tutti è necessario che tutti comprendano bene le ragioni, espresse in modo chiaro a prescindere dall'età, dall'istruzione, dalla provenienza geografica e sociale. Sviluppo sostenibile significa anche farsi il giusto carico della società nelle sue molteplici sfaccettature, guardando alla parità di genere, e guardando anche alla salvaguardia e allo sviluppo delle lingue in un contesto realmente plurilingue e multilingue. Linguisti e non linguisti offrono in questo libro il loro contributo alla riflessione sulla sostenibilità, nel modo canonico della trattazione scientifica, ma anche in quello eccentrico della creazione artistica.

Lower Urinary Tract Symptoms and Benign Prostatic Hyperplasia: From Research to Bedside offers full acknowledgment of the basic research of

lower urinary tract symptoms (LUTS) and benign prostatic hyperplasia (BPH), also connecting the clinical and practice management of the disease. It provides a full comprehension of LUTS and BPH from several aspects, allowing for a schematic interpretation of the disease and subsequent medical management. Going beyond the guidelines in the field, this title enhances the knowledge of BPH onset, allowing for the advancement of research, beneficial clinical implication and treatment. Perfect for researchers, urologists, pathologists and endocrinologists, this must-have reference provides what is needed to understand LUTS and BPH in one easy to reference place. - Provides a clear understanding of the pathological mechanisms that are present in lower urinary tract symptoms (LUTS) and benign prostatic hyperplasia (BPH) - Incorporates research with the clinical aspects of LUTS and BPH, including surgical techniques - Presents an overview of LUTS and BPH in one easy to reference place

Il volume esamina, con completezza e chiarezza espositiva, i riferimenti normativi, interni e comunitari, che disciplinano la tutela della vittima del reato nel nostro ordinamento. Scopo del testo è soprattutto individuare e approfondire profili di discussione a favore di una revisione della Carta Costituzionale al fine di riconoscere una specifica disciplina volta a ricercare una maggior tutela per tutte le vittime del reato. La prefazione è a cura dell'avv. Enrico Sirotti Gaudenzi. I compensi degli autori verranno devoluti all'Osservatorio Nazionale Sostegno Vittime.

Il presente Volume si rivolge a decisori pubblici, università, giudici, avvocati ed economisti per una pronta consultazione e per approfondimenti scientifici nei settori della tutela dell'ambiente, della biodiversità, degli ecosistemi, del clima e dello sviluppo economico sostenibile. La trattazione degli argomenti, affidata ad Autori del mondo accademico e professionale, si propone di offrire una lettura sistematica e unitaria, di tipo relazionale e interdisciplinare, delle più significative disposizioni sovraordinamentali e ordinamentali (Agenda 2030, Green Deal, NGEU, RFF, PNRR) dell'attuale fase di transizione ecologica, climatica ed energetica: si tratta delle fonti degli emergenti principi, diritti e doveri della sostenibilità ambientale, da combinare con i principi di precauzione e di azione preventiva tradizionalmente preposti alla tutela dell'ambiente e alla lotta ai cambiamenti climatici. La finalità è quella di orientare il lettore di fronte alla imponente mole di regole adottate (quasi con cadenza mensile) per centrare gli obiettivi di sostenibilità e neutralità climatica entro le date indicate nel calendario mondiale e di facilitare la individuazione ad ogni livello (legislativo, amministrativo e giudiziario) delle azioni e rimedi idonei a garantire la più elevata ed efficace tutela dell'ambiente, del clima e della salute

The world of artificial systems is reaching complexity levels that escape human understanding. Surface traffic, electricity distribution, air planes, mobile communications, etc. , are examples that demonstrate that we are running into problems that are beyond classical scientific or engineering knowledge.

There is an ongoing world-wide effort to understand these systems and develop models that can capture its behavior. The reason for this work is clear, if our lack of understanding deepens, we will lose our capability to control these systems and make they behave as we want. Researchers from many different fields are trying to understand and develop theories for complex man-made systems. This book presents research from the perspective of control and systems theory. The book has grown out of activities in the research program Control of Complex Systems (COSY). The program has been sponsored by the European Science Foundation (ESF) which for 25 years has been one of the leading players in stimulating scientific research. ESF is a European association of more than 60 leading national science agencies spanning more than 20 countries. ESF covers has standing committees in Medical Sciences, Life and Environmental Sciences, Physical and Engineering Sciences, Humanities and Social Sciences. The COSY program was ESF's first activity in the Engineering Sciences. The program run for a period of five years starting January 1995.

This collection of essays deals with various issues related to the history of aesthetics from antiquity to the modern day, with a view to focusing on scholarly research through a specific aesthetic lens. The highly original approach of the analysis combines philological and philosophical knowledge of ancient, medieval, renaissance and modern culture. These notions form the background to a reconstruction of the aesthetic attitudes of different ages not only philosophically, but also with an eye to the results of artistic production. The essays consider various subjects, all linked by their aesthetic relevance: Callimachus' position on poetry and his use of Plato's and Aristotle's writings is discussed in connection to his likely knowledge of the Socratic school of Cyrene. The issue of when a work of art should be considered finished is linked to the creative process from antiquity to Renaissance, when artists and thinkers reflected on the efficacy of the artistic results and engaged with Neoplatonic ideas and culture. Plotinus' views on the ethical response to human beauty shed light on man's individual responsibility within the erotic and aesthetic experience. The last essay brings the perspective of aesthetic discussion right up to date with interior design, focusing on the classically inspired interiors of Renzo Mongiardino. From poetry to philosophy, from Renaissance artistic practice to contemporary interior design and decoration, this book presents innovative points of view together with fascinating insights into the creative process and its protagonists.

Paulo Freire's Philosophy of Education in Contemporary Context

Springer Science & Business Media

"Whither the seminal thinking and practice of Paulo Freire in contemporary

times? If Covid 19 is the most seismic health crisis in living memory, it is also just as much an unprecedented crisis for education and society. While Paulo Freire's work so often calls attention to the deprivations and exploitations suffered by the weakest in our society, at no stage does Freire's work succumb to a negativism or a pessimism about the possibilities of transformation. To the contrary, Freire's work is always animated by a strong and fundamental affirmative spirit which calls on people to join together to make change, as opposed to simply waiting around for it to happen. This text on Freire's contemporary importance thus seems a timely intervention. Originally a conversation between engaged interlocutors at a University of Catania symposium, this discussion then broadens out to include connection to the particular rendering of these issues across different national and international contexts. Including essays by established and new thinkers in the Critical Pedagogy perspective, the book also includes up to date and exciting interviews with contemporary practitioners of Theatre of the Oppressed and related social-therapeutic approaches in Italy"--

The book addresses the topic of EU legitimacy by exploring the forms,

origins and effects of citizens' support to EU institutions. Through examining the wide-ranging levels of support, the authors show how these multi-faceted attitudes cast shade on the outdated, somewhat one-dimensional concept of Euroscepticism. Di Mauro and Memoli not only observe how political issues and the economic crisis affect public opinion, but also demonstrate how national contexts play a crucial role in shaping attitudes towards Europe at any level of support. This volume shows how the lack of accountability in the EU system makes

it increasingly vulnerable to the negative effects of economic and societal shocks, and the 'national lens' that we view the EU through influences our voting choices.
